300-710 Exam Topics Pdf | Latest 300-710 Material

BrindumpsPrep follows the career ethic of providing the first-class 300-710 practice questions for you. Because we endorse customers' opinions and drive of passing the 300-710 certificate, so we are willing to offer help with full-strength. With years of

experience dealing with 300-710 Learning Engine, we have thorough grasp of knowledge which appears clearly in our 300-710 study quiz with all the keypoints and the latest questions and answers.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q296-Q301):

NEW QUESTION # 296

With Cisco FTD software, which interface mode must be configured to passively receive traffic that passes through the appliance?

- **A. tap**
- B. firewall
- C. ERSPAN
- D. IPS-only

Answer: A

Explanation:

With tap mode, the FTD is deployed inline, but the network traffic flow is undisturbed. Instead, the FTD makes a copy of each packet so that it can analyze the packets. Note that rules of these types do generate intrusion events when they are triggered, and the table view of intrusion events indicates that the triggering packets would have dropped in an inline deployment. There are benefits to using tap mode with FTDs that are deployed inline.

NEW QUESTION # 297

Which two OSPF routing features are configured in Cisco FMC and propagated to Cisco FTD? (Choose two.)

- A. MD5 authentication to OSPF packets
- B. SHA authentication to OSPF packets
- **C. area boundary router type 1 LSA filtering**
- **D. virtual links**
- E. OSPFv2 with IPv6 capabilities

Answer: C,D

Explanation:

NEW QUESTION # 298

Network traffic coming from an organization's CEO must never be denied.

Which access control policy configuration option should be used if the deployment engineer is not permitted to create a rule to allow all traffic?

- **A. Configure a trust policy for the CEO.**
- B. Create a NAT policy just for the CEO.
- C. Change the intrusion policy from security to balance.
- D. Configure firewall bypass.

Answer: A

NEW QUESTION # 299

A network administrator reviews the attack risk report and notices several low-impact attacks.

What does this type of attack indicate?

- **A. The host is not vulnerable to those attacks.**
- B. All attacks are listed as low until manually recategorized.
- C. The attacks are not dangerous to the network.
- D. The host is not within the administrator's environment.

Answer: A

NEW QUESTION # 300

A Cisco FTD has two physical interfaces assigned to a BVI. Each interface is connected to a different VLAN on the same switch. Which firewall mode is the Cisco FTD set up to support?

- A. active/active failover
- **B. routed**
- C. transparent
- D. high availability clustering

Answer: B

NEW QUESTION # 301
