Answer: B,C

NEW QUESTION # 33

Which of the following is part of the SAP S/4HANA central UI component?

- A. SAP Fiori launchpad
- B. SAP Fiori transactional application
- C. SAP Fiori analytical application
- D. SAP Fiori object page

Answer: A

Explanation:
The SAP Fiori launchpad is the central UI component in SAP S/4HANA, serving as the primary entry point for users to access Fiori applications. It provides a unified, role-based interface where users can navigate to transactional, analytical, or object page applications via tiles organized in catalogs and spaces. The launchpad integrates with the SAP Fiori infrastructure, ensuring consistent user experience and secure access to applications. SAP Fiori object pages, transactional applications, and analytical applications are specific types of Fiori apps accessed through the launchpad, not central UI components themselves. The launchpad's role as the central hub supports personalized navigation, single sign-on, and application management, making it a cornerstone of the S/4HANA user interface. By centralizing access, the Fiori launchpad enhances usability and security, ensuring that users only interact with applications authorized by their roles, aligning with SAP's modern, user-centric design philosophy for enterprise systems.

NEW QUESTION # 34

What does a status text value of "Old" mean during the maintenance of authorizations for an existing role?

- A. Field values were changed as a result of the merge process.
- B. Field values were unchanged and no new authorization was added.
- C. The field delivered with content was changed but the old value was retained.
- D. Field values have not been changed.

Answer: C

Explanation:
* Context:During role maintenance in SAP, status values indicate changes or actions applied to field values.
* Solution Explanation:
* A status of "Old" means the field value was delivered with content but has since been modified, retaining the old value.
