

PDF CIPS L4M1 Cram Exam | Latest L4M1 Exam Answers

CIPS L4M1 - Question & Answer Past exam questions latest 2023/2023

1). Stakeholders

✓ Ans: In any activity an organization undertakes, whether strategic, operational or tactical, the activity can only be successful with the input, commitment and support of its key stakeholders. Gaining and maintaining the support and commitment of stakeholders requires a continuous process of engaging the right stakeholders at the right time and understanding and managing their expectations.

2). Global supply chains

✓ Ans: a dynamic worldwide network when a company purchases or uses goods or services from overseas. It involves people, information, processes and resources involved in the production, handling and distribution of materials and finished products or providing a service to the customer.

3). Whole life costing

✓ Ans: takes into account the total cost of a product or service over its lifetime, from concept through to disposal including purchase, hire or lease, maintenance, operation, utilities, training and disposal. It is important for procurement to take all these elements into consideration when making decisions and comparing the costs of buying, renting or leasing equipment particularly. In most cases the purchase costs are only a small proportion of the cost of operating it.

4). Stakeholder mapping

✓ Ans: A systematic way to identify the expectations, needs, importance, and relative power of various stakeholders.

5). Value generation

✓ Ans: Creating value from the supply base can be achieved by not only focusing on price but also increasing operational performance, driving efficiencies, working collaboratively or developing continuous improvement activities.

CIPS L4M1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Understand and analyse aspects of organisational infrastructure that shape the scope of procurement and supply chain functions: This section measures that skill of supply chain strategists and organizational analysts in understanding corporate governance, documented policies, accountability, and ethics. It also covers the impact of organisational policies and procedures on procurement and supply
Topic 2	<ul style="list-style-type: none"> Public, private, charity, not-for-profit, manufacturing, retail, construction, financial, agriculture, and service sectors. It also covers analyzing the impact of the public sector on procurement and supply chain activities public sector objectives, regulations, competition, accountability, and value for money. It finally covers the impact of the private sector on procurement or supply chain activities.

Topic 3	<ul style="list-style-type: none"> Understand and analyse the added value through procurement and supply chain management: This section of the exam measures skills of supply chain managers related to identifying added value outcomes in procurement and supply and evaluating cost savings, service improvements, and innovations contributions. It also measures procurement and supply processes that contribute to added value.
Topic 4	<ul style="list-style-type: none"> Procedures, strategies, manuals, and internal function involvement.

CIPS Scope and Influence of Procurement and Supply Sample Questions (Q22-Q27):

NEW QUESTION # 22

Describe regulation that govern the Public Sectors and explain how this may impact upon procurement activities (25 marks).

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- You do need to know some legislation for public sector here. This may be difficult if you don't work in the Public Sector. If you're struggling with this, you could also talk about general legislation that governs all types of organisations such as the Equalities Act and Modern Slavery Act.

- This is also a tough question if you're not British. CIPS is a UK based organisation and the syllabus therefore only talks about British legislation. If you're in a different country you could talk about the legislation in your own country, providing the question doesn't specifically mention UK Law.

- Either way I would recommend knowing a couple of pieces of British Legislation. You don't need to be an expert but just state what they are and what the purpose is should be enough to get you a pass.

Example essay

The public sector, which encompasses various governmental and state-owned enterprises, plays a pivotal role in the governance and provision of essential services. This sector operates under a strict framework of regulations and policies, ensuring that its operations are fair, transparent, and accountable. Among the most critical aspects of these operations is procurement, the process through which the public sector acquires goods, services, and works. This essay will explain key regulations governing the public sector, focusing on the Public Contracts Regulations (PCR) 2015, Late Payment Regulations 2016, Equalities Act 2010, and Public Services (Social Value) Act 2012, and explores how these regulations impact procurement activities.

The Public Contracts Regulations (PCR) 2015

The PCR 2015 plays a foundational role in public sector procurement in the UK. It sets out the procedures for procuring contracts, aiming to ensure fairness and transparency in the process. The regulations mandate that all procurement processes must be conducted in a manner that prevents discrimination and allows equal access to potential contractors, regardless of their size or location. For example, the open tendering process under PCR 2015 has enabled a more diverse range of companies, including small and medium-sized enterprises, to participate in government contracts, enhancing competition and innovation. The four 'pillars' of the PCR are derived from EU Procurement Directives and are: non-discrimination, free movement of goods, equality of treatment and transparency.

Late Payment Regulations 2013

The Late Payment Regulations 2013 address a critical aspect of procurement: the timely payment for goods and services. This regulation ensures that public sector organizations pay their suppliers within a stipulated time frame, significantly impacting the financial stability of these suppliers. For instance, the regulation has been particularly beneficial for small businesses that rely on prompt payments to maintain cash flow. The introduction of these regulations has improved the trust between public sector entities and their suppliers, leading to more efficient procurement processes.

Equalities Act 2010

The Equalities Act 2010 is another crucial piece of legislation impacting public sector procurement. This Act prohibits discrimination in the workplace and in the provision of services, extending its influence to the procurement process. Public sector entities must ensure that their procurement decisions do not discriminate against any group and that they promote equality. For instance, when a public sector organization issues a tender, it must ensure that the selection criteria do not unfairly disadvantage any potential supplier based on irrelevant characteristics. This approach not only fosters a more inclusive procurement environment but also helps to tap into a wider talent and supplier pool, enhancing the quality and effectiveness of public services.

Public Services (Social Value) Act 2012

The Public Services (Social Value) Act 2012 marks a significant shift in how procurement is approached in the public sector. This Act requires public sector organizations to consider how the services they procure can improve the economic, social, and environmental well-being of their area. This means that when a public sector entity procures goods or services, it must consider factors beyond just the price and quality. For example, a local government might prioritize suppliers who can demonstrate a commitment to environmental sustainability or who offer employment opportunities to local residents. This approach to procurement encourages a more holistic view of value for money, factoring in the wider impact of procurement decisions on society.

Public Accountability and Freedom of Information Requests

In addition to these specific regulations, the concept of public accountability and the mechanism of Freedom of Information requests play a crucial role in the public sector, especially in procurement activities. Public accountability ensures that entities are answerable to the public and their actions are transparent. Freedom of Information requests enable individuals and organizations to access information held by public authorities, which includes details of procurement decisions and contracts. This transparency is critical in ensuring that procurement activities are conducted ethically and responsibly, deterring corruption and mismanagement.

In conclusion, the regulation of the public sector, particularly in the realm of procurement, are complex.

Regulations such as the PCR 2015, Late Payment Regulations 2016, Equalities Act 2010, and the Public Services (Social Value) Act 2012, along with the principles of public accountability and transparency, ensure that procurement activities are conducted in a fair, transparent, and socially responsible manner. These regulations not only safeguard the interests of suppliers, especially smaller businesses, but also ensure that the public sector remains a model of integrity and efficiency and that taxpayers' money is well spent.

Tutor Notes

- Okay this is important: The PCR 2015 regulations are being rescinded in 2024. They're based on EU Law and the UK has left the EU. I know we left a while ago now but it's taken us a long time to address the issue and figure out what we want to do about it. There was also a pandemic that got in the way of people making any decisions in parliament that weren't to do with Covid. The PCR 2015 will be replaced in late 2024 with new 'British' rather than European rules.

- At the time of writing this (December 2023) we don't 100% know what the new rules are going to look like and if you're taking this exam from November 2024 onwards, I recommend doing a bit of research into the new regulations.

- Now the complicated bit- the CIPS syllabus is valid from 2024-2028 and doesn't address that legislation is changing. I therefore don't really know what they're going to expect when students are taking this exam and the study guide information is out of date. If you're not working in the Public Sector, how are you to know the legislation has changed?

- My advice is this- briefly learn PCR 2015- the four pillars in particular, and when the new legislation comes out, have a quick google and see if these pillars are still the same. The regs aren't going to change THAT much - things like transparency and equal treatment are still going to be really important, but there may be some slight language changes. Plus, if you're able to mention in an essay that there's new legislation, it's going to make you sound super clever.

- LO 4.2 p.211

NEW QUESTION # 23

What is 'supply chain management'? Outline the drivers, advantages and disadvantages of using this approach within the Procurement Department of an organisation (25 points) See the solution in Explanation part below.

Answer:

Explanation:

How to approach the question

- There are 4 main components to this question that you will have to answer, so my advice is to first write down subheadings for your essay so you don't miss any out: definition of supply chain management, drivers, advantages and disadvantages

- The question also brings up 2 concepts - supply chain management and tiered supply chains, it would be good to include a definition of both of these.

- Because of the number of things you'll have to write, you don't need to go into lots of detail - one paragraph per section will be enough.

Proposed Essay Structure

Intro - what is supply chain management and what is a tiered supply chain P1 - drivers P2 - advantages P3 - disadvantages

Conclusion - supply chains are complex due to globalisation Essay Ideas:

- Definition of supply chain management = Making something available in response to a buyer's requirements. The transformation of goods from raw material into an end product (input > conversion)

> output)

- Drivers = Cost, Time/ Speed, Reliability, Responsiveness, Transparency, Globalisation
- Advantages = reduced costs by elimination of waste, improved responsiveness to customer requirements, joint-ventures with supply partners leading to innovations, tech sharing, improved communication leads to faster lead times for product development
- Disadvantages = needs considerable investment and internal support, closer relationships may be risky (IP, loss of control), issues in fairly distributing gains and risks (you don't need to talk about all of these- pick 1 or 2 you feel you know the best and focus on that)

Example Essay Supply Chain Management (SCM) is the arrangement of processes involved in the production and distribution of goods / services - from the origin to the end consumer. In simple terms, it's taking a raw product and transforming it into an end product that a consumer would purchase. For example taking a potato from a farmer, giving it to a manufacturer to make into chips and sending these to retailers to be sold. SCM relies on close relationships between the parties in the supply chain and adds value to the product at every stage. A Tiered Supply Chain is a specific configuration within SCM that involves multiple levels of suppliers and sub-suppliers. A buyer will work with a small amount of Tier 1 suppliers who will in turn work with their own suppliers. In a tiered system there can be many, many layers of suppliers who all ultimately work towards creating the same product. This essay aims to delve into the drivers, advantages, and disadvantages associated with implementing a complex supply chain, such as the Tiered Supply Chain model.

The main drivers of using a tiered supply chain are often rooted in the pursuit of efficiency, cost- effectiveness, and flexibility. By consolidating suppliers into distinct tiers, organizations can streamline their management processes, reduce complexity, and enhance overall supply chain performance.

Additionally, tiered supply chains are often employed in response to the global nature of modern business, accommodating the need to source materials and components from various regions while maintaining a manageable and responsive supply network.

One of the advantages of a Tiered Supply Chain is the streamlined management of suppliers. In this model, there are fewer direct suppliers to oversee, simplifying the coordination and communication processes. This can lead to increased efficiency and responsiveness as organizations deal with a smaller, more manageable pool of suppliers. The consolidation of suppliers in a tiered system may also result in potential cost savings and improved collaboration with a select group of trusted partners.

However, the complexity of a Tiered Supply Chain brings disadvantages. One significant drawback is reduced visibility. As the supply chain extends across multiple tiers, organizations may struggle to have a comprehensive view of the entire process. This lack of visibility can lead to challenges in tracking and responding to potential disruptions. Moreover, ethical risks emerge when companies have limited oversight over lower-tier suppliers, potentially exposing organizations to issues such as labour exploitation, environmental concerns, or violations of ethical standards.

In conclusion, supply chain management has evolved into a complex discipline due to the forces of globalization and consumer demands for speed and quality. The Tiered Supply Chain model, driven by these factors, presents both advantages and disadvantages. While managing fewer suppliers can enhance efficiency, the trade-off includes diminished visibility and increased ethical risks.

Organizations must carefully evaluate the specific needs of their operations and weigh the benefits against the challenges when deciding whether to adopt a Tiered Supply Chain. In this intricate landscape, the ability to balance complexity and efficiency becomes paramount for sustained success in the global marketplace.

Tutor Notes

- Definition of supply chain management is from p.5

- Drivers, advantages and disadvantages p.9

- This topic used to be much more in depth in the old syllabus and has been drastically simplified in the new study guide. The guide is actually quite light on this topic stating simply that "globalisation and localisation are both drivers of using supply chain tiering". If you don't work in manufacturing, or an industry that uses supply chain tiering, this concept may be a bit alien to you and I'd recommend doing a little extra research. The best example of supply chain tiering is in car manufacturing- and that would be a good example to use in an essay. Some additional links for research:

- Sustainable Sourcing - Definition, Examples, Benefits & Best Practices (brightest.io)

- <https://youtu.be/fs1rDgBQy1M>

NEW QUESTION # 24

Explain 5 stages of the sourcing cycle that occur in the pre-contract stage (25 points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question:

- The Sourcing Cycle is the first half of the CIPS Procurement Cycle and includes these steps:

- 1) Define Business Need

- 2) Market Analysis + Make vs Buy
- 3) Develop Strategy and Plan
- 4) Pre-Procurement Market Testing
- 5) Develop Documents and Specification
- 6) Supplier Selection
- 7) Issue Tender
- 8) Bid Evaluation
- 9) Contract Award and Implementation

Your response should detail 5 of these. It is a good idea to pick the ones you know most about and where there is more to write about. You won't get any extra points for naming more than 5 so focus on getting as much detail down about 5, rather than explaining more of them.

Essay Plan

Introduction - explain what the sourcing cycle is - the stages of the procurement cycle before a contract is signed. It describes the steps an organisation will take to source/ procure goods or services.

Paragraph 1 - Define the business need

How is the need identified? E.g. by end user, stores department, ERP system.

Procurement should challenge this - is it really necessary? Suggest alternatives - this could be a key source of added value

Put together business case / requisition / project initiation document

What type of purchase? Straight rebuy, modified rebuy, new purchase

Decide on what type of specification would be best - Conformance vs performance specification

This stage may include early supplier involvement

Paragraph 2 - Market Analysis and Make vs Buy Decision

Create an Analysis by segmenting the market by buyer, product, distribution channel, geography, customer market etc.

Make vs Buy - use Carter's Matrix to decide whether the organisation should make vs buy.

Also consider outsourcing at this stage

Paragraph 3 - Documents and Specification

Draft documents. These may include a RFQ or ITT, a specification and a proposed form of contract

Specification may be conformance or performance based

A contract sets out the roles, rights, responsibilities and obligations of the parties and shows intention to enter into 'legal relations'

This stage defines the 'offer' which becomes binding once other party accepts

Documentation may also include proposed KPIs and SLAs

Paragraph 4 - Supplier Selection

For a new purchase, supplier selection is very important - investigation should be proportionate to the value of the procurement. For rebuys or low-risk purchases you could use the same supplier or a list of pre-approved suppliers.

You can locate potential suppliers by; catalogues, websites, trade registers, market exchanges and review sites, trade or industry press, fairs and conferences, networking and recommendations/ referrals.

You can shortlist suppliers by sending out a pre-qualification questionnaire. This adds value by reducing wasted time / costs / risks to entering into a contract with the wrong supplier.

Other criteria for supplier selection include using Carter's 10 Cs (competency, consistency, capability, control, cost, cash, clean, communication, culture, commitment), the supplier's financial standing (e.g. liquidity and gearing), references and considering their CSR policy.

Paragraph 5 - Issue Tender

Competitive bidding should only be done when there's sufficient time and resources available, there's sufficient suppliers in the marketplace, they're keen to win business (ie that there's appetite for competition) and there is a strong specification

Best practice is to issue tenders electronically as it ensures equal treatment of suppliers and transparency

Consider open vs closed procurement processes

Use a cross-functional team - particularly when marking responses

Conclusion - you could mention here that different sourcing activities may require more or less effort at each of the stages e.g. procuring a new item may require more market analysis than a re-buy.

Tutor Notes:

- If you want to add in extra details, you could think about ways procurement can add value at each stage

- In the old syllabus, CIPS were a bit obsessed with Michael Porter. In the Market Analysis bit you could talk about using Porter's 5 forces (buyer and supplier power, threat of new entrants, threat of substitutions, supplier rivalry) and Porter's 3 generic strategies for competing (cost leadership, differentiation, niche segment). This has been removed from the study guide so it's not essential to know this for this module, but if you've seen it before it's a nice one to throw in.

- You could also mention that there are differences between the public and private sector procurement at the different stages. E.g. Public Sector requires open competitions for contracts of a certain value and must follow the rules set out in Public Contract Regulations - the private sector doesn't have such strict regulations so there is much more flexibility in how tenders are completed. Also in the public sector, the evaluation criteria needs to be agreed beforehand and presented in the ITT- not the same for the private sector.

- Study guide p.71

NEW QUESTION # 25

Explain what is meant by added value (5 points). Describe 4 ways the Procurement Department can add value for their organisation (20 points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

What to include in the essay:

- Definition of added value: the economic enhancement given to products or services before offering them to customers. Examples may include a product which has additional features at no additional cost to the customer or the provision of an extended warranty.
- Description of four of the following with examples and Explanations: providing better customer service levels, risk management, cost control and reduction, relationship management, reputation management, innovation, use of technology, streamlining processes, improving specifications, increasing sustainability, improving quality, ordering processes such as bulk ordering, inventory management, improving the product from the customer's perspective (e.g. packaging, exclusivity), sustainability, convenience, market development.

Example essay:

Added value in procurement refers to the enhancement or improvement in the economic worth, quality, or utility of products or services before they are offered to customers or end-users. In the context of procurement, the goal is to go beyond simply obtaining goods or services at the lowest cost. Instead, procurement aims to contribute additional value to the organization through various means. This essay explores the concept of added value and outlines four ways the Procurement Department can contribute to organizational improvement.

Improving Specifications

Procurement can add value firstly by ensuring all critical items are procured against a specification, and secondly by improving and regularly updating those specifications. For example, the procurement department might be responsible for procuring light-bulbs for an office. Having an effective specification for this purchase (lightbulbs must meet X safety standard and Y environmental standard) would result in less maverick buying for the organisation and the procurement of a better-quality product. Furthermore, regularly updating specifications ensures that purchases are made against current safety standards and regulations (e.g. the use of low-energy lightbulbs). If procurement don't update specifications, then there is a risk that items are bought that don't meet the correct standards. Added value in this regard could also therefore be considered the removal of risks of procuring the wrong item.

Stream-lining Processes

Procurement can add value by stream-lining processes such as requisitions and POs. This reduces the time it takes to procure an item, thus saving the company money. Another process that could be streamlined is the re-ordering process of regularly bought items. This could be automated when the stock levels reach a certain level. For example if an organisation requires its staff to wear PPE, an automatic request could be made once there are only 50 face masks left.

Managing Supplier Relationships

Having strong, positive relationships with suppliers is a source of added value as it means suppliers value you as a buyer and are therefore more likely to help in situations which are adversely affecting business. For example, if a manufacturer puts an order in for 300 items with their supplier but then realises that they have made an error in the amount, if there is a strong relationship, the supplier may allow the buyer to amend the order after the fact. If there is a poor relationship, the supplier may not be as flexible. The flexibility in the supply chain is therefore a source of added value.

Improving Quality / Innovation

This involves adding value from the customer's perspective. E.g. a customer may choose to purchase a phone that has a longer battery life than others. Procurement's role in this may be in completing a Value Engineering exercise or procuring higher quality components or materials at the same price in order to achieve this additional feature.

In conclusion, the Procurement Department plays a crucial role in organizational success by adding value through improved specifications, streamlined processes, strong supplier relationships, and a focus on quality and innovation. These strategies contribute to enhanced efficiency, reduced risks, and increased customer satisfaction, making procurement an essential function for organizational excellence.

Tutor Notes

- The question asks specifically to name 4 ways of adding value. You therefore won't get any additional points if you talk about 5 or 6, even though it may be tempting. Instead, focus your response on providing more information on the 4 you have chosen and bulking out your answer with examples. This demonstrates to the examiner that you fully understand the topic AND that you can apply the theory to real situations.
- You could use real-life examples from your own organisation/ experience or you could give a hypothetical situation such as a cake manufacturer. You could talk through how the procurement department at the cake manufacturer can add value by doing the four things in your essay: by amending the specification so the cakes are more tasty, by streamlining the process for ordering flour, by managing the relationship with the company that fixes the machines when they break down, and by introducing innovation such as

using an e-procurement system to source raw materials and the benefits that these will bring to the organisation.

- Added value is part of the syllabus for Learning Outcome 1.2 starting from p.19 but I'm gonna be honest, I think the new study guide is a bit crap on this part of the syllabus. The section starts talking about the 5 rights of procurement and I think that makes things very confusing for students. The 5 rights and added value are linked subjects, but they're not the same. Getting the rights right, CAN lead to sources of added value, but added value is value that is IN ADDITION to what is expected. So, when you have a question on added value, focus on stuff that's listed under 1.1.4 'other sources of added value' on p.35 rather than talking about the 5 rights of procurement. My list at the top is more exhaustive than the one in the study guide.

- If you're looking to be really clever you can quote Michael Porter on 'what is added value?'. Michael Porter looks at this from a customer perspective - 'added value' refers to the addition of greater value (either by reducing the cost to produce it, or by adding something that customers are willing to pay more for). These could be; marketing / design, customer service, maintenance, delivery etc. This comes up at Level 5 / 6.

NEW QUESTION # 26

What is meant by the 'Third Sector'? Describe the sector (10 points) and explain the main objectives of organisations who operate in this sector (15 points).

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question

- Description of the 'third sector' - the part of an economy comprising non-governmental and non-profit-making organisations including charities, voluntary and community groups, and cooperatives. These organisations reinvest surplus profits back into the enterprise to further their objectives. This is worth 10 points so should be a good 2-3 paragraphs, with examples.

- Main objectives - these could include engaging with stakeholders, social or environmental aims, education, providing a service to the community, stewardship role. There's more points for this question so you should have more content here.

Example Essay

The 'Third Sector' refers to a segment of the economy distinct from the public (government) sector and the private (for-profit) sector. It encompasses a diverse range of non-governmental organizations (NGOs), charities, foundations, social enterprises, cooperatives, and other non-profit entities. These organizations are primarily driven by social, environmental, cultural, or community objectives rather than the pursuit of profit.

They often operate based on values such as democracy, equality, and social justice. The Third Sector plays a crucial role in providing services, advocating for social causes, and filling gaps left by the public and private sectors.

The third sector is often called the 'not-for profit' sector. It's distinguished from the private sector in that the main aim isn't to make money for money's sake. The main aim is to generate money to reinvest back into the organisation so that the organisation can achieve the purpose it was set up for. Whereas the private sector may exist solely to make money, the third sector has a 'higher aim'. Organisations operate in a very narrow marketplace. They may be the only provider in that marketplace. For example the RNLI is the only operator of lifeboats and the only organisation that sets out to save lives at sea- there is no 'competitor'.

3rd Sector Organisations have multiple sources of income; e.g. subscriptions or donations, or from donated goods that they then sell on (such as Oxfam shops), fundraising activities or selling merchandise. The sector also has a wide range of stakeholders.

The third sector is subject to same regulations as private and public companies but also has its own regulations imposed by the Charities Commission. This is a statutory regulation body which checks charities are run for public benefit and not private advantage, ensures charities are independent, and sets out to remedy serious mismanagement. They can audit, offer advice and investigate complaints. Therefore the sector is highly regulated.

Organisations in this sector have a huge range of objectives depending on why they were set up. These can be very specific, for example: charities such as Cancer Research (objective- find a cure for cancer), Museums (objective- educate the public), CIPS (objective - provide professional services to a particular industry), trade unions (objective- defend the rights of workers), pressure groups (objective- change laws and practices they morally disagree with).

However organisations in this sector do have overarching objectives in common.

1. Survival - Generating Enough Money to Continue Operations: Survival is a fundamental objective for Third Sector organizations. Unlike for-profit entities, these organizations do not aim to generate profits for shareholders but need sufficient funding to sustain their operations. This funding often comes from donations, grants, fundraising activities, and sometimes income from services provided. The challenge lies in balancing the mission with the need for financial stability, ensuring that the organization can continue to serve its community and pursue its goals over the long term. Financial sustainability is crucial, particularly in a sector where funding sources can be uncertain and competition for donations is high.

2. Creating Awareness of Their Cause: Raising awareness is vital for Third Sector organizations, as it helps to educate the public, garner support, attract volunteers, and drive fundraising efforts. Awareness campaigns are essential in highlighting the issues these organizations address, whether it's health, environmental conservation, social justice, or cultural preservation. Effective communication strategies, including the use of social media, public events, and collaborations, are employed to reach a wider

audience. The more people know about a cause, the more likely they are to support it, either through donations, volunteering, or advocacy.

3. Compliance with Regulations and the Charities Commission: Compliance with legal and regulatory requirements is a critical objective. In many countries, including the UK, Third Sector organizations are regulated by bodies like the Charities Commission. These organizations must adhere to specific legal standards, including financial transparency, governance practices, and ethical guidelines. Compliance ensures credibility and trustworthiness, which are essential for maintaining public confidence and the continued support of donors and volunteers. It also ensures that the organization operates within the law, avoiding legal issues that could jeopardize its mission.

4. Providing a Service to the Community: The core of a Third Sector organization's mission is to provide services or benefits to the community. These organizations often address needs that are unmet by the private or public sectors, focusing on improving the quality of life for certain populations or addressing specific societal issues. This objective can take many forms, from offering direct services like healthcare and education to advocating for policy changes that benefit underserved communities. The impact of these services on the community can be profound, often bringing about significant social change.

5. Fulfilling a 'Gap in the Market': Many Third Sector organizations exist to fill gaps in services not provided by the public or private sectors. A classic example is the provision of air ambulance services in the UK. While the government provides comprehensive healthcare services, there's a gap in the rapid transportation of critically ill patients, which is filled by charities operating air ambulances. These organizations identify specific needs that are not adequately addressed and work to meet them, often innovating in the process. By fulfilling these gaps, they play a crucial role in complementing existing services and enhancing the overall welfare of society.

In conclusion, Third Sector organizations operate with a unique set of objectives that distinguish them from other sectors. Their focus on survival, awareness-raising, compliance, community service, and filling market gaps is essential not only for their existence but also for the significant societal impact they make. These objectives align with the overarching mission of the Third Sector to contribute positively to society, addressing needs and issues often overlooked by other sectors.

Tutor Notes:

- A strong essay will use real life examples of organisations in the third sector and their objectives. I've mentioned a couple above such as Cancer Research UK: Our strategy to beat cancer | Cancer Research UK and North West Air Ambulance Charity: Home | North West Air Ambulance Charity (nwairambulance.org.uk) but pick charities you know well.
- LO 4.4. P.230

NEW QUESTION # 27

.....

Once you decide to pass the L4M1 exam and get the certification, you may encounter many handicaps that you don't know how to deal with, so, you may think that it is difficult to pass the L4M1 exam and get the certification. In order to help you solve these problem and help you pass the exam easy, we compiled such a L4M1 Exam Torrent. We can promise that you will have no regret buying our L4M1 exam dumps. Our L4M1 exam questions have a high pass rate as 99% to 100%, you will pass with it for sure.
