

New Salesforce Mule-Arch-201 Test Notes, Reliable Mule-Arch-201 Test Answers

BONUS!!! Download part of ValidBraindumps Mule-Arch-201 dumps for free: <https://drive.google.com/open?id=1Gneff9wdqK7-3Z8WOkWa4CaFgEA5PHyu>

We provide you the free download and tryout of our Mule-Arch-201 study tool before your purchase our product and we provide the demo of the product to let the client know our product fully. After you visit the pages of our Mule-Arch-201 test torrent on the websites, you can know the characteristics and merits of the Mule-Arch-201 Guide Torrent. In the pages of our product on the website, you can find the details and guarantee and the contact method, the evaluations of the client on our Mule-Arch-201 test torrent and other information about our Mule-Arch-201 exam questions. So it is very convenient for you.

Our Mule-Arch-201 practice materials are suitable to exam candidates of different levels. And after using our Mule-Arch-201 learning prep, they all have marked change in personal capacity to deal with the Mule-Arch-201 exam intellectually. The world is full of chicanery, but we are honest and professional in this area over ten years. Even if you are newbie, it does not matter as well. To pass the exam in limited time, you will find it as a piece of cake with the help of our Mule-Arch-201 study engine!

Reliable Mule-Arch-201 Test Answers | Mule-Arch-201 Latest Exam Testking

We provide online customer service to the customers for 24 hours per day and we provide professional personnel to assist the client in the long distance online. If you have any questions and doubts about the Salesforce Certified MuleSoft Platform Architect guide torrent we provide before or after the sale, you can contact us and we will send the customer service and the professional personnel to help you solve your issue about using Mule-Arch-201 Exam Materials. The client can contact us by sending mails or contact us online. We will solve your problem as quickly as we can and provide the best service. Our after-sales service is great as we can solve your problem quickly and won't let your money be wasted. If you aren't satisfied with our Mule-Arch-201 exam torrent you can return back the product and refund you in full.

Salesforce Certified MuleSoft Platform Architect Sample Questions (Q141-

Q146):

NEW QUESTION # 141

A client has several applications running on the Salesforce service cloud. The business requirement for integration is to get daily data changes from Account and Case Objects. Data needs to be moved to the client's private cloud AWS DynamoDB instance as a single JSON and the business foresees only wanting five attributes from the Account object, which has 219 attributes (some custom) and eight attributes from the Case Object.

What design should be used to support the API/ Application data model?

- A. Create separate entities for Account and Case Objects by mimicking all the attributes in SAPI, which are combined by the PAPI and filtered to provide JSON output containing 13 attributes.
- B. Create separate entities for Account with five attributes and Case with eight attributes in SAPI, which are combined by the PAPI to provide JSON output containing 13 attributes.
- C. Start implementing an Enterprise Data Model by defining enterprise Account and Case Objects and implement SAPI and DynamoDB tables based on the Enterprise Data Model,
- D. Request client's AWS project team to replicate all the attributes and create Account and Case JSON table in DynamoDB. Then create separate entities for Account and Case Objects by mimicking all the attributes in SAPI to transfer JSON data to DynamoD for respective Objects

Answer: B

Explanation:

Understanding the Requirements:

The business needs to transfer daily data changes from the Salesforce Account and Case objects to AWS DynamoDB in a single JSON format.

Only a subset of attributes (5 from Account and 8 from Case) is required, so it is not necessary to include all 219 attributes of the Account object.

Design Approach:

A System API (SAPI) should be created for each Salesforce object (Account and Case), exposing only the required fields (5 attributes for Account and 8 for Case).

A Process API (PAPI) can be used to aggregate and transform the data from these SAPIs, combining the 13 selected attributes from Account and Case into a single JSON structure for DynamoDB.

Evaluating the Options:

Option A: Mimicking all attributes in the SAPI is inefficient and unnecessary, as only 13 attributes are required.

Option B: Replicating all attributes in DynamoDB is excessive and would result in higher storage and processing costs, which is unnecessary given the requirement for only a subset of attributes.

Option C: Implementing an Enterprise Data Model could be useful in broader data management but is not required here, as the focus is on a lightweight integration.

Option D (Correct Answer): Creating separate entities in SAPI for Account and Case with only the required attributes and using the PAPI to aggregate them into a single JSON is the most efficient and meets the requirements effectively.

Conclusion:

Option D is the best choice as it provides a lightweight, efficient design that meets the requirements by transferring only the necessary attributes and minimizing resource use.

Refer to MuleSoft's best practices for API-led connectivity and data modeling to structure SAPIs and PAPIs efficiently.

NEW QUESTION # 142

A code-centric API documentation environment should allow API consumers to investigate and execute API client source code that demonstrates invoking one or more APIs as part of representative scenarios.

What is the most effective way to provide this type of code-centric API documentation environment using Anypoint Platform?

- A. Make relevant APIs discoverable via an Anypoint Exchange entry
- B. Enable mocking services for each of the relevant APIs and expose them via their Anypoint Exchange entry
- C. Ensure the APIs are well documented through their Anypoint Exchange entries and API Consoles and share these pages with all API consumers
- D. Create API Notebooks and include them in the relevant Anypoint Exchange entries

Answer: D

Explanation:

Correct Answer: Create API Notebooks and Include them in the relevant Anypoint exchange entries

>> API Notebooks are the one on Anypoint Platform that enable us to provide code-centric API documentation Reference:

Top of Form

NEW QUESTION # 143

What is a typical result of using a fine-grained rather than a coarse-grained API deployment model to implement a given business process?

- A. An overall tower usage of resources because each fine-grained API consumes less resources
- B. A better response time for the end user as a result of the APIs being smaller in scope and complexity
- C. A higher number of discoverable API-related assets in the application network
- D. A decrease in the number of connections within the application network supporting the business process

Answer: C

Explanation:

Correct Answer: A higher number of discoverable API-related assets in the application network.

>> We do NOT get faster response times in fine-grained approach when compared to coarse-grained approach.

>> In fact, we get faster response times from a network having coarse-grained APIs compared to a network having fine-grained APIs model. The reasons are below.

Fine-grained approach:

1. will have more APIs compared to coarse-grained
2. So, more orchestration needs to be done to achieve a functionality in business process.
3. Which means, lots of API calls to be made. So, more connections will need to be established. So, obviously more hops, more network i/o, more number of integration points compared to coarse-grained approach where fewer APIs with bulk functionality embedded in them.
4. That is why, because of all these extra hops and added latencies, fine-grained approach will have bit more response times compared to coarse-grained.
5. Not only added latencies and connections, there will be more resources used up in fine-grained approach due to more number of APIs.

That's why, fine-grained APIs are good in a way to expose more number of reusable assets in your network and make them discoverable. However, needs more maintenance, taking care of integration points, connections, resources with a little compromise w.r.t network hops and response times.

NEW QUESTION # 144

True or False. We should always make sure that the APIs being designed and developed are self-servable even if it needs more man-day effort and resources.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

Correct Answer: TRUE

>> As per MuleSoft proposed IT Operating Model, designing APIs and making sure that they are discoverable and self-servable is VERY VERY IMPORTANT and decides the success of an API and its application network.

NEW QUESTION # 145

What is a key performance indicator (KPI) that measures the success of a typical C4E that is immediately apparent in responses from the Anypoint Platform APIs?

- A. The number of API implementations that have a publicly accessible HTTP endpoint and are being managed by Anypoint Platform

- B. The number of API specifications in RAML or OAS format published to Anypoint Exchange
- C. The number of production outage incidents reported in the last 24 hours
- D. The fraction of API implementations deployed manually relative to those deployed using a CI/CD tool

Answer: B

Explanation:

Correct Answer: The number of API specifications in RAML or OAS format published to Anypoint Exchange

>> The success of C4E always depends on their contribution to the number of reusable assets that they have helped to build and publish to Anypoint Exchange.

>> It is NOT due to any factors w.r.t # of outages, Manual vs CI/CD deployments or Publicly accessible HTTP endpoints

>> Anypoint Platform APIs helps us to quickly run and get the number of published RAML/OAS assets to Anypoint Exchange. This clearly depicts how successful a C4E team is based on number of returned assets in the response.

NEW QUESTION # 146

.....

Different with other similar education platforms on the internet, the Salesforce Certified MuleSoft Platform Architect guide torrent has a high hit rate, in the past, according to data from the students' learning to use the Mule-Arch-201 test torrent, 99% of these students can pass the qualification test and acquire the qualification of their yearning, this powerfully shows that the information provided by the Mule-Arch-201 study tool suit every key points perfectly, targeted training students a series of patterns and problem solving related routines, and let students answer up to similar topic. It may say, the Mule-Arch-201 Test Torrent can let users in a short time, accurately grasp the proposition trend of each year, doing all effects in the process of the difficulties in the hot, user's weak link and targeted training, and exercise the user's solving problem ability, eventually achieve the objectives of the pass Salesforce Certified MuleSoft Platform Architect qualification test.

Reliable Mule-Arch-201 Test Answers: <https://www.validbraindumps.com/Mule-Arch-201-exam-prep.html>

Salesforce New Mule-Arch-201 Test Notes Nowadays in this talented society IT professionals are very popular, but the IT area are also very competitive, As you have experienced various kinds of exams, you must have realized that renewal is invaluable to study materials, especially to such important Salesforce Certified MuleSoft Platform Architect Mule-Arch-201 exams, Salesforce Reliable Mule-Arch-201 Test Answers Certified Technician for Data Center (Security and Privacy is Ensured).

And I repeat, your goals, Certified to use AirMagnet Reliable Mule-Arch-201 Test Answers Survey or the Professional version) to survey wireless network devices, security, and configurations, Nowadays in this talented Mule-Arch-201 society IT professionals are very popular, but the IT area are also very competitive.

Trusting Authorized New Mule-Arch-201 Test Notes in ValidBraindumps Is The Valid Way to Pass Salesforce Certified MuleSoft Platform Architect

As you have experienced various kinds of exams, you must have realized that renewal is invaluable to study materials, especially to such important Salesforce Certified MuleSoft Platform Architect Mule-Arch-201 Exams.

Salesforce Certified Technician for Data Center (Security and Privacy is Ensured), There is no doubt that our Mule-Arch-201 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.

We offer regular updates in PDF format to improve Salesforce Certified MuleSoft Platform Architect (Mule-Arch-201) questions according to changes in the exam.

- 2026 Useful Mule-Arch-201: New Salesforce Certified MuleSoft Platform Architect Test Notes Search for Mule-Arch-201 on www.troytecdumps.com immediately to obtain a free download Exam Mule-Arch-201 Details
