A network operator is configuring BGP PIC on CE1 on already established neighborships with PE1 and PE2 inside the fully converged MPLS network. Which element needs to be implemented to make this feature function effectively?

- A. The operator must ensure that all prefixes have the same next-hop from PE1 and PE2 for BGP PIC reserved BGP
- B. community of 1:0 must be used to denote the PIC feature set to the routing protocol
- C. Bidirectional Forwarding Detection must be applied to the upstream facing BGP interfaces.
- D. BGP import/export policies must be applied on all devices for the routes needing BGP for PIC

Answer: C

NEW QUESTION 53

Refer to the exhibit.

Router 1:

```
interface tunnel-te12
  ipv4 unnumbered loopback0
  autoroute announce
  destination 192.168.1.2
  path-option 12 dynamic segment-routing
  path-protection
```

Router 1 has established an SR-TE tunnel with Router 2. Which statement describes this configuration?

New Cisco 300-510 Practice Materials & Practice 300-510 Test Online

The 300-510 PDF works on smart phones, tablets, and laptops. Windows computers support the 300-510 desktop practice test software. No software installation is necessary for the web-based Cisco Exam practice exam. All operating systems (Mac, Linus, Android, iOS, Windows) and major browsers support the 300-510 web-based practice exam.

Cisco Implementing Cisco Service Provider Advanced Routing Solutions Sample Questions (Q20-Q25):

NEW QUESTION # 20

Refer to the exhibit. OSPF is running in the core of a company. Router RA is running EIGRP.

After the company acquired an additional office, an engineering team connected the two networks from router RA to router R1. OSPF and EIGRP have been mutually redistributed on R1, but the team cannot view the routes on R3. Which action must the team take to resolve the issue?

- A. Create a virtual link between R1 and R2.
- **B. Disable stub routing in Area 1.**
- C. Redistribute connected routes on R3.
- D. Configure the routers in Area 2 to be in Area 0.

Answer: B

NEW QUESTION # 21

Refer to the exhibit.

Which statement about this configuration is true?

- A. Router 1 receives up to two paths from neighbor 192.168.1.1 for all routes in the same AS
- B. Router 1 sends up to two paths to neighbor 192.168.1.1 for all routes
- **C. Router 1 sends and receives multiple best paths from neighbor 192.168.1.1**
- D. Router 1 receives only the best path from neighbor 192.168.1.1

Answer: C

NEW QUESTION # 22

Refer to the exhibit.

Customer traffic from the branch site to the hub is experiencing packet drops. The engineer verified that:

Customer traffic from the hub is able to reach the branch site.

The connection between PE1 and PE2 is working normally.

Routers P1 and P2 are able to ping devices on the hub site.

Which action resolves the issue?

- **A. Redistribute the CE1 OSPF routes in the PE1 VRF.**
- B. Redistribute the CE2 OSPF routes in the PE2 VRF.
- C. Advertise the VPNv4 routes of the hub in CE1.
- D. Advertise the VPNv4 routes of the branch site in CE2.

Answer: A

NEW QUESTION # 23

Refer to the exhibit. Router R1 is expected to receive routes that originate from AS 65547 only.

However, R1 is receiving routes from AS 65547 and several other ASs that are directly attached to it. Which change to the AS path permit filter corrects the problem?

- A. Change the regular expression to
