2024 CompTIA A+ Certification Exam Core 2 (220-1102) REAL EXAM

CompTIA A+ Certification Exam Core 2 (220-1102) LATEST 2024 GRADED A+ Multiple-choice and performance-based Exam (Complete 90 Questions)

1. A help desk team lead contacts a systems administrator because the technicians are unable to log in to a Linux server that is used to access tools. When the administrator tries to use remote desktop to log in to the server, the administrator sees the GUI is crashing. Which of the following methods can the administrator use to troubleshoot the server effectively?

   A. SFTP
   B. SSH
   C. VNC
   D. MSRA

Correct Answer: B

2. A company wants to remove information from past users' hard drives in order to reuse the hard drives. Which of the following is the MOST secure method?

   A. Reinstalling Windows
   B. Performing a quick format
   C. Using disk-wiping software
   D. Deleting all files from command-line interface:

Correct Answer: C

3. A user is having phone issues after installing a new application that claims to optimize performance. The user downloaded the application directly from the vendor's website and is now experiencing high network utilization and is receiving repeated security warnings. Which of the following should the technician perform FIRST to mitigate the issue?

   A. Reset the phone to factory settings.
   B. Uninstall the fraudulent application.
   C. Increase the data plan limits.
   D. Disable the mobile hotspot.

Correct Answer: B

Performance reports of CompTIA 220-1202 Practice Test will be useful for tracking your progress and identifying areas for further study.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q268-Q273):

NEW QUESTION # 268
A technician needs to download and install a new web browser on a desktop computer. Which of the following should the technician use to verify the installer is an authentic version?

- A. Size
- B. Name
- C. Hash
- D. Date

Answer: C

Explanation:
Verifying the hash of the installer ensures that the downloaded file is authentic and has not been tampered with.

NEW QUESTION # 269
A government organization forbids a systems administrator from configuring any servers without the presence of another employee. Which of the following threats is the company trying to mitigate?

- A. Evil twin
- B. Zero-day
- C. Insider
- D. On-path

Answer: C

Explanation:
Requiring another employee to be present during server configuration is a control designed to prevent or detect malicious actions from an internal employee, mitigating insider threats.

NEW QUESTION # 270
You have been contacted through the help desk chat application. A user is setting up a replacement SOHO router. Assist the user with setting up the router.
INSTRUCTIONS
Select the most appropriate statement for each response. Click the send button after each response to continue the chat.
If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Answer:

Explanation:
See explanation below.
Explanation:
First Chat Response:When the user mentions setting up a new router, the best initial response to maintain a helpful and professional tone is:
>Select reply:"I am happy to assist you today."
Second Chat Response:When the user states that they need to set up basic security settings:
>Select reply:"Is this the first router in your office?"
Third Chat Response:After learning it's a replacement router and the user is logged into the router's web page:
>Select reply:"The first thing you need to do is change the default password." Fourth Chat Response:For the response about password settings:
>Select reply:"Create a new password with an uppercase, a lowercase, and a special character." Fifth Chat Response:When the router prompts to reboot:
>Select reply:"Yes, reboot please."
Study Guide Reference: The CompTIA A+ Core 2 guide highlights the importance of changing default credentials and using strong password policies, particularly in SOHO environments where routers are often targeted.

NEW QUESTION # 271

A company computer is being repurposed within an organization. The existing configuration has a static IP address, but it is no longer required. Which of the following should a technician do to satisfy the network requirements?

- **A. Switch the NIC settings from manual to automatic**
- B. Make a DHCP reservation for the computer
- C. Change the currently assigned static IP
- D. Create an exclusion in the existing IP scheme

Answer: A

Explanation:
Switching the NIC settings from manual to automatic allows the computer to obtain its IP configuration dynamically from DHCP, which is appropriate when a static IP address is no longer required.

NEW QUESTION # 272

A technician is using a credential manager to safeguard a large number of credentials. Which of the following is important for using this application?

- **A. Secure master password**
- B. Windows lock screen
- C. Restricted log-in times
- D. TPM module

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Credential managers or password vaults (e.g., Windows Credential Manager, KeePass, or LastPass) store passwords securely. The integrity of such tools heavily depends on the strength of the master password protecting the vault. If compromised, all saved credentials could be exposed. Therefore, setting a secure master password is crucial.
A: Login time restrictions are general user account settings, not specific to credential managers.
C: TPM is used more commonly for full disk encryption, not specifically required for password managers.
D: The lock screen protects general access but does not protect stored credentials alone.
Reference:
CompTIA A+ 220-1102 Objective 2.2: Compare and contrast authentication technologies and secure credential storage.
Study Guide Section: Password management and protection best practices

NEW QUESTION # 273

......
