

Reliable 2V0-11.25 Exam Materials | Cogent for VMware Cloud Foundation 5.2 Administrator

The VMware 2V0-11.25 exam questions are being offered in three different formats. These formats are VMware Cloud Foundation 5.2 Administrator (2V0-11.25) PDF dumps files, desktop practice test software, and web-based practice test software. All these three VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam dumps formats contain the real VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam questions that assist you in your VMware Cloud Foundation 5.2 Administrator (2V0-11.25) practice exam preparation and finally, you will be confident to pass the final 2V0-11.25 exam easily.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.
Topic 2	<ul style="list-style-type: none">VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.
Topic 3	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.

Topic 4	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network • storage design.
Topic 5	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.

New 2V0-11.25 Study Guide, Valid 2V0-11.25 Test Topics

We take the rights of the consumer into consideration. So as a company that aimed at the exam candidates of 2V0-11.25 study guide, we offer not only free demos, Give three versions of our 2V0-11.25 exam questions for your option, but offer customer services 24/7. Even if you fail the 2V0-11.25 Exams, the customer will be reimbursed for any loss or damage after buying our 2V0-11.25 training materials. Besides, you can enjoy free updates for one year as long as you buy our exam dumps.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q159-Q164):

NEW QUESTION # 159

During a routine check, an administrator observes that several VMs are reporting high memory usage in VMware Aria Operations. They need to verify if the high memory usage is due to memory contention. What actions should be taken in VMware Aria Operations to verify this?

- A. Review the CPU ready time.
- B. Look at the network throughput
- B. Check the memory usage and ballooning metrics.
- C. Analyze the storage I/O performance.

Answer: C

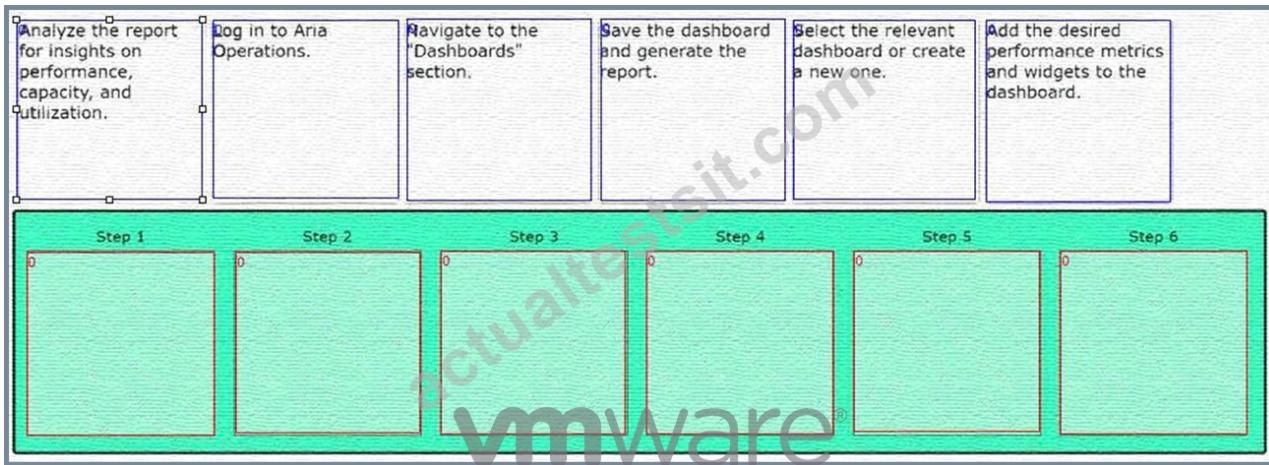

Explanation:

To verify if high memory usage is due to memory contention, the administrator should check the memory usage and ballooning metrics in VMware Aria Operations. Ballooning occurs when the hypervisor reclaims memory from a virtual machine due to memory contention, and monitoring these metrics can help identify whether the VMs are experiencing memory pressure or being forced to swap memory.

NEW QUESTION # 160

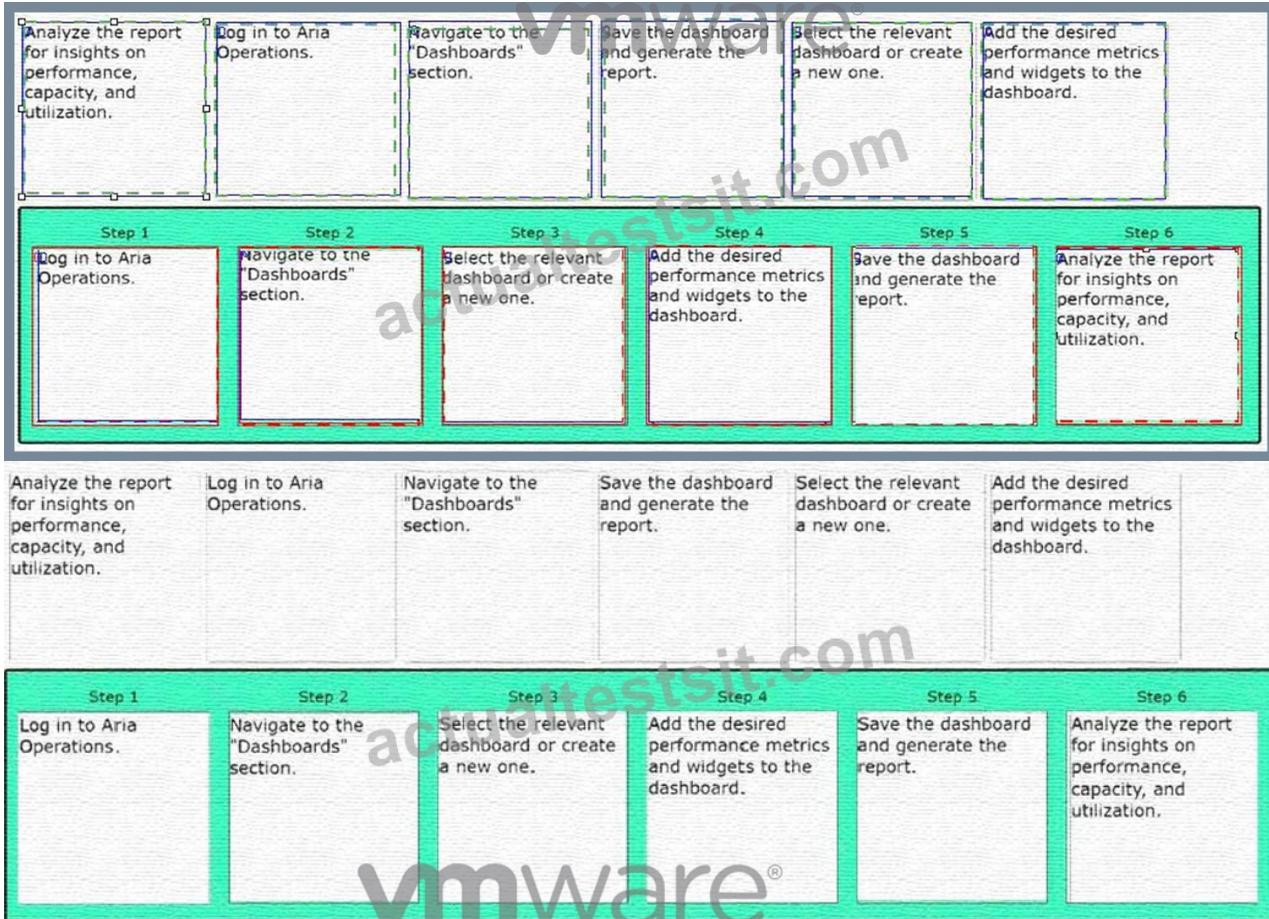

DRAG DROP

Arrange the steps in the correct order to generate a performance report in Aria Operations.

Answer:

Explanation:

NEW QUESTION # 161

An Administrator is tasked with setting up a new workload domain with VMware Cloud Foundation. The workload domain will have the following configuration:

vSphere with Tanzu to support Kubernetes workloads

NSX for container and virtual machine networking

Aria Operations will be configured for monitoring of the infrastructure. Which three steps should be taken to complete the installation and configuration of this workload domain?

(Choose three.)

- A. Configure NSX segments for Kubernetes namespaces.
- B. Deploy the Supervisor Cluster for IaaS Control Plane.

- C. Integrate IaaS Control Plane with the existing vCenter Server.
- D. Install Aria Operations agents on all ESXi hosts.
- E. **Enable workload management in vCenter Server.**

Answer: A,B,E

Explanation:

NSX segments need to be configured for Kubernetes namespaces to provide network connectivity and isolation for the Kubernetes workloads that will be deployed.

The Supervisor Cluster must be deployed as part of the IaaS Control Plane to manage the Kubernetes workloads and enable vSphere with Tanzu.

Enabling workload management in vCenter Server allows the deployment and management of Kubernetes workloads alongside virtual machines, utilizing vSphere with Tanzu.

NEW QUESTION # 162

An administrator needs to configure and manage storage resources and policies to optimize performance of a VCF environment configured with vSAN.

What two steps should the administrator take? (Choose two.)

- A. **Analyze the current vSAN storage policies and adjust them as needed.**
- B. Disable vSAN health alerts to reduce administrative overhead.
- C. Enable vSphere HA to ensure high availability and resource distribution.
- D. Decrease the number of disk groups per host to improve performance.
- E. **Monitor the vSAN performance service for insights into the performance issues.**

Answer: A,E

Explanation:

The vSAN performance service provides valuable insights into the storage performance, helping identify potential bottlenecks or areas for improvement.

Analyzing and adjusting vSAN storage policies is crucial for ensuring optimal performance. Policies such as RAID levels, storage encryption, and other settings can be tweaked to better match the environment's performance requirements.

NEW QUESTION # 163

An administrator is tasked with ensuring the security of network traffic during the migration of virtual machines (VMs) to prevent any potential interception or tampering of data.

What specific feature or configuration should the administrator enable to safeguard the integrity and confidentiality of the network traffic involved in VM migration?

- A. vSphere High Availability (HA)
- B. Virtual Machine Encryption
- C. vSphere Distributed Resource Scheduler
- D. **Encrypted vSphere vMotion**

Answer: D

Explanation:

Enabling Encrypted vSphere vMotion encrypts the vMotion network traffic, ensuring the confidentiality and integrity of data as it travels between hosts.

NEW QUESTION # 164

.....

We have confidence and ability to make you get large returns but just need input small investment. our 2V0-11.25 study materials provide a platform which help you gain knowledge in order to let you outstanding in the labor market and get satisfying job that you like. The content of our 2V0-11.25 question torrent is easy to master and simplify the important information. It conveys more important information with less answers and questions, thus the learning is easy and efficient.
