Pass FCP_GCS_AD-7.6 Test - Valuable FCP_GCS_AD-7.6 Feedback

If you are already determined to obtain an international certificate, you must immediately purchase our FCP_GCS_AD-7.6 exam practice. Our products have been certified as the highest quality products in the industry. If you know FCP_GCS_AD-7.6 Training Materials through acquaintance introduction, then you must also know the advantages of FCP_GCS_AD-7.6. We are both perfect on the quality and the price of the FCP_GCS_AD-7.6 study braindumps.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q23-Q28):

NEW QUESTION # 23

Google Cloud network services offer vast functionality and inter-connectivity between the cloud and on- premises networks. Which three additional functions does FortiGate offer when deployed in Google Cloud to complement the native services offered by Google Cloud? (Choose three.)

- A. OSPF over IPSec
- B. Secure SD-WAN with application visibility
- C. Web filtering
- D. SSL VPN
- E. SSL inspection

Answer: B,D,E

Explanation:

FortiGate provides SSL VPN capabilities for secure remote access.

It offers SSL inspection to decrypt and inspect encrypted traffic for threats.

FortiGate supports Secure SD-WAN with deep application visibility and control, enhancing network performance and security beyond native Google Cloud services.

NEW QUESTION # 24

You have been tasked with destroying all resources relating to a recent active-active high-availability (HA) FGSP Terraform deployment in Google Cloud.

What steps do you have to take to ensure a successful deletion? (Choose two.)

- A. Delete all dependencies to resources relating to the Terraform template.
- B. Delete all resources manually because active-active HA clusters cannot be destroyed using Terraform.
- C. Use the command `terraform destroy` to delete all resources deployed by the Terraform template.
- D. Use the command `terraform plan` before destroying the Terraform template.

Answer: A,C

Explanation:

Removing dependencies prevents resource conflicts during deletion.

`terraform destroy` is the correct command to cleanly and completely remove all resources created by the Terraform deployment.

NEW QUESTION # 25

A cloud administrator is tasked with protecting web applications hosted in Google Cloud.

Which three cloud offerings can the administrator use to accomplish the task? (Choose three.)

- A. Google Cloud IAM
- B. Google Cloud Armor
- C. FortiWeb Cloud
- D. Google Cloud Run
- E. FortiWeb VM

Answer: B,C,E

Explanation:

FortiWeb VM is a web application firewall (WAF) deployed on Google Cloud to protect web apps.

Google Cloud Armor provides DDoS and application-level protection.

FortiWeb Cloud offers cloud-native WAF services to protect applications hosted in Google Cloud.

NEW QUESTION # 26

An administrator is tasked to deploy two FortiGate devices in two different zones to achieve geographical redundancy.

Which two architectural considerations must the administrator address? (Choose two.)

- A. The FortiGate devices can be deployed in the same subnet.
- B. The FortiGate devices must be deployed in two different regions.
- C. The FortiGate devices cannot be assigned the second IP address in the subnets that they are deployed in.

- D. The FortiGate devices must not be deployed in the same VPC.

Answer: B,C

Explanation:

Deploying FortiGate devices in different regions ensures geographic redundancy.

The second IP address in a subnet is reserved for the default gateway in Google Cloud, so FortiGate devices cannot use that IP.

NEW QUESTION # 27

Your organization is running an application in their shared services virtual public cloud (VPC) and must control network access natively in the cloud.

How can your organization meet this requirement?

- A. Create IAM access to allow access from specified resources only.
- B. Create another VPC in front of the shared services VPC and deploy FortiGate.
- C. Create a firewall policy for the entire VPC that allows access from all networks.
- **D. Create a firewall rule that allows access to the application instance only.**

Answer: D

Explanation:

Creating specific firewall rules that restrict access directly to the application instance allows precise native network access control within the shared services VPC.

NEW QUESTION # 28

.....

The advent of our Fortinet FCP_GCS_AD-7.6 study guide with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Rather than insulating from the requirements of the Fortinet FCP_GCS_AD-7.6 Real Exam, our Fortinet FCP_GCS_AD-7.6 practice materials closely co-related with it. And their degree of customer's satisfaction is escalating.
