Free PDF Quiz 2026 NICET ITFAS-Level-1: Inspection and Testing of Fire Alarm Systems Level I Exam – Valid Test Dumps Free

Dear,do you tired of the study and preparation for the ITFAS-Level-1 actual test? Here, we advise you to try the NICET ITFAS-Level-1 online test which can simulate the real test environment and give an excellent study experience. You see, you can set the test time and get the score immediately after each test by using ITFAS-Level-1 Online Test engine. With the interactive and intelligent functions of ITdumpsfree ITFAS-Level-1 online test, you will be interested in the study. Besides, the valid questions & verified

answers can also ensure the 100% pass rate.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67
When the main power is disconnected, how long should a power supply with emergency voice communication systems work in alarm mode?

- A. Minimum of 15 minutes
- B. Maximum of 5 minutes
- C. Maximum of 15 minutes
- D. Minimum of 5 minutes

Answer: A

Explanation:
Emergency voice/alarm communication systems must continue functioning after a loss of primary power for a minimum of 24 hours in standby, followed by 15 minutes of alarm operation.
NFPA 72 (2022), Section 10.6.7.2.1.1 (Exception):
"...followed by 15 minutes of alarm for emergency voice/alarm communication systems." This ensures that occupants can still hear evacuation messages even during a power outage.
Correct answer: D. Minimum of 15 minutes

NEW QUESTION # 68
Which two of the following activities are done while visually inspecting batteries? (Choose two.)

- A. Check for corrosion or leakage.
- B. Check tightness of connections.
- C. Check for proper battery voltage.
- D. Check for proper charge voltage.

Answer: A,B

Explanation:
During a visual battery inspection, the technician checks for corrosion, leakage, swelling, and loose or corroded terminals- not electrical readings (those are part of functional testing).
NFPA 72 (2022), Table 14.3.1 - Inspection Frequencies:
"Batteries (lead-acid and nickel-cadmium)" # Visual inspection items include:
* Cleanliness
* Terminal tightness
* Corrosion or leakage
* Physical damage
Voltage and charging checks are part of testing, not visual inspection.
Correct answers:
* Check for corrosion or leakage
* Check tightness of connections

NEW QUESTION # 69
Inspection records for all systems shall be kept for which length of time?

- A. 5 years
- B. Until AHJ reviews records and 1 year
- C. 6 months
- D. Until the next test and 1 year

Answer: D

Explanation:

NFPA 72 outlines the retention period for records of inspections and testing in Section 14.6.3.1. These records are important for verification during audits or when reviewing system maintenance history.
NFPA 72 (2022), Section 14.6.3.1:
"Records shall be retained for a period of one year after the next test and until the next test is performed." This means records must be kept until the next test happens and for 1 year after that, not just a fixed calendar period.
Correct answer: D. Until the next test and 1 year

NEW QUESTION # 70
In a Class B initiating circuit, wires should be monitored for integrity by having a supervisory device connected to which of the following?

- A. Anywhere on the loop
- B. Beginning of the loop
- C. The last detector
- D. The first detector

Answer: C

Explanation:
In a Class B circuit, supervision of wiring integrity is accomplished using an End-of-Line Resistor (EOLR) at the last device in the circuit. This allows the control unit to detect open faults.
NFPA 72 (2022), Section 12.3.4.1:
"Initiating device circuits shall be monitored for integrity by placing an end-of-line device at the last device on the circuit." If the wiring is cut or disconnected before the last device, the panel detects it as a trouble condition.
Correct answer: D. The last detector

NEW QUESTION # 71
Which three of the following parties gets notified that the system has been restored? (Choose three.)

- A. First responders
- B. Building occupants
- C. Authority Having Jurisdiction
- D. Monitoring organization

Answer: B,C,D

Explanation:
After impairment or testing, NFPA 72 requires that all previously notified parties be informed that the system has been returned to service. This includes those who could be affected by or responsible for system monitoring and emergency response.
NFPA 72 (2022), Section 10.21.3.8:
"When the system has been returned to normal, the persons and facilities previously notified (including the supervising station, building occupants, and AHJ, where required) shall be notified that testing is complete and the system is restored." Although "first responders" isn't explicitly listed, they're typically contacted through the AHJ or monitoring center, so they're not usually notified directly by technicians.
Correct answers:
* Authority Having Jurisdiction
* Building occupants
* Monitoring organization

NEW QUESTION # 72
......

Most candidates reflect our ITFAS-Level-1 test questions matches more than 90% with the real exam. We get information from special channel. If ITFAS-Level-1 exam change questions, we will get the first-hand real questions and our professional education experts will work out the right answers so that ITFAS-Level-1 Test Questions materials produce.
