

CCSFP合格記 & CCSFP基礎訓練

ちなみに、JPNTest CCSFPの一部をクラウドストレージからダウンロードできます：<https://drive.google.com/open?id=1gQNLFm53TBMOTW05dK8arMqZH5zl-bhr>

JPNTestテストトレントを学習し、試験の準備をするのに20～30時間しかかかりません。CCSFP試験問題を購入した後、CCSFP試験トレントを学習し、主に仕事、家庭生活、学習に専念するために数時間を費やすだけです。CCSFP試験問題の回答と質問は入念に選択され、試験の焦点をつかむため、試験の学習と準備に多くの時間を節約できます。合格率は98%以上と高いため、CCSFPガイドトレントを購入することで安心できます。

HITRUST CCSFP 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">HITRUST quality assurance expectations: This section of the exam measures skills of Compliance Analysts and covers the quality standards required by HITRUST. It highlights expectations for accuracy, consistency, and documentation to ensure assessments meet HITRUST's assurance and reliability standards.
トピック 2	<ul style="list-style-type: none">Methodology updates and enhancements: This section of the exam measures skills of Information Security Managers and explains the importance of staying current with updates to the HITRUST methodology. It ensures that candidates are prepared to apply new enhancements and align their assessment practices with evolving standards.
トピック 3	<ul style="list-style-type: none">Introduction to the HITRUST Framework (HITRUST CSF) and assessment types: This section of the exam measures skills of Compliance Analysts and covers the fundamentals of the HITRUST CSF, its role as a certifiable framework, and the different assessment types that organizations may use. It ensures that candidates understand how the framework standardizes compliance and risk management processes.
トピック 4	<ul style="list-style-type: none">Applying the HITRUST scoring approach to assess framework compliance: This section of the exam measures skills of Compliance Analysts and focuses on applying the HITRUST scoring methodology. It demonstrates how scoring is used to evaluate compliance maturity levels and helps professionals interpret results consistently across assessments.

最近では、コンピューター支援ソフトウェアを使用してCCSFP試験に合格することが新しいトレンドになって

います。新しい技術には明確な利点があるため、便利で包括的です。この傾向を追うために、当社の製品は CCSFP試験問題を提供しており、従来の方法と斬新な方法を組み合わせて学習することができます。教材の合格率は最大99%です。一度にCCSFP認定資格を取得できない場合は、目標に到達して夢が実現するまで、さまざまな割引でCCSFP製品を無制限に使用できます。

HITRUST Certified CSF Practitioner 2025 Exam 認定 CCSFP 試験問題 (Q51-Q56):

質問 # 51

What sample size should be pulled for a manual control that operates at a defined frequency of weekly?

- A. 2 items
- B. 1 item
- C. 25 items
- **D. 5 items**

正解: D

解説:

HITRUST defines sample sizes for manual controls based on the frequency of operation. For controls that operate weekly, the required sample size is 5 items. This ensures that the assessor can evaluate consistency over multiple weeks without excessive burden. For example, if access logs are reviewed weekly, five weeks of logs must be tested. A higher frequency (e.g., daily controls) requires larger samples, such as 25.

Conversely, less frequent controls (e.g., monthly or quarterly) may only require 2 or 1 sample. The structured sampling methodology provides consistency across assessments, ensures sufficient evidence for scoring, and prevents under-testing of critical controls. References: HITRUST Scoring Rubric - "Sampling Requirements by Control Frequency"; CCSFP Study Guide - "Sample Sizes for Manual Controls."

質問 # 52

When partially inheriting a requirement statement score from an external cloud service provider, the weighting applied to the score is determined primarily by the assessed entity and the service provider. [0190]

- A. True
- **B. False**

正解: B

解説:

The weighting of partially inherited scores in HITRUST is determined by HITRUST's methodology, not by mutual agreement between the assessed entity and service provider.

Organizations may identify which portions of a requirement are inherited vs. managed internally, but the actual scoring mechanics are controlled by the HITRUST CSF Assurance methodology to ensure consistency.

Extract Reference (HITRUST CSF Inheritance Guidance [0190]):

Weighting for partial inheritance is calculated using HITRUST's scoring methodology, not negotiated between entities.

質問 # 53

Halfway through an r2 assessment, management asks to add six implemented systems to the scope of primary components. What would the assessor need to do within MyCSF?

- **A. Revert all Requirement Statements completed by the assessor so the client can consider control impact**
- **B. Update the "Scope of the Assessment" tab in the assessment object**
- C. Remove all authoritative sources added to the assessment object
- D. Request a Bridge Certificate

正解: A、B

解説:

If management decides to add new systems mid-assessment, the assessor must ensure the assessment scope and related requirement statements reflect the change. In MyCSF, this means two actions: first, reverting all completed Requirement Statements so that the

client can review and adjust responses for any new control impacts. Second, the assessor must update the "Scope of the Assessment" tab to include the new systems.

This ensures that MyCSF recalculates applicable requirements based on the expanded scope. Removing authoritative sources or requesting a Bridge Certificate would not address this situation, as authoritative sources are regulatory mappings and bridge certificates are only used to extend certifications temporarily.

References: HITRUST CSF Assurance Methodology - "Adjusting Scope During Assessments"; CCSFP Practitioner Guide - "Scope Changes in MyCSF."

質問 #54

HITRUST offers certifications for the following: (Select all that apply) [0017]

- A. PCI-DSS
- B. NIST Cybersecurity Framework
- **C. HITRUST CSF**
- D. ISO 27001
- E. NIST 800-53

正解: C

解説:

HITRUST issues certifications only for the HITRUST CSF (e.g., e1, i1, r2 certifications and designated privacy/AI certifications as defined by the program). While the CSF maps to and harmonizes with other frameworks and regulations (e.g., NIST SP 800-53, ISO/IEC 27001/27002, PCI-DSS), HITRUST does not issue certifications for those external standards.

"HITRUST provides certification against the HITRUST CSF. External standards and regulations are integrated as authoritative sources and mappings but are not certified by HITRUST." [CCSFP Program Overview - Certifications & Mappings, 0017]

質問 #55

Which version of the CSF supports a traversable requirement statement portfolio?

- A. v9.6.1
- B. v9.4
- C. v9.2
- **D. 0**

正解: D

質問 #56
