## Reliable F5CAB4 Test Voucher - F5CAB4 Test Papers

Questions in desktop-based mock exams are identical to the real ones. Our practice exams give you options to change their durations and questions' numbers to polish your skills. You can easily assess your readiness with the assistance of results produced by the practice exam. This BIG-IP Administration Control Plane Administration software records all your previous takes so you can identify your mistakes and overcome them before the final attempt. The BIG-IP Administration Control Plane Administration (F5CAB4) desktop practice exam software works only on Windows operating system.

## F5 BIG-IP Administration Control Plane Administration Sample Questions (Q64-Q69):

### NEW QUESTION # 64

A BIG-IP Administrator needs to update the list of configured NTP servers. In which area of the Configuration Utility should the

BIG-IP Administrator perform this update?

- A. System > Preferences
- B. System > Platform
- C. System > Services
- **D. System > Configuration**

**Answer: D**

Explanation:

NTP (Network Time Protocol) is vital for management connectivity and HA state synchronization. Correct time is required for log timestamping and device trust group communication<sup>46</sup>. To manage these settings, the administrator navigates to System > Configuration, where general system-level services like NTP and DNS are defined to ensure the Control Plane remains synchronized with the network environment.

#### NEW QUESTION # 65

Which log file should the BIG-IP Administrator check to determine if a specific user tried to log in to the BIG-IP Configuration Utility? (Choose one answer)

- **A. /var/log/secure**
- B. /var/log/httpd
- C. /var/log/ltn
- D. /var/log/pam/tallylog

**Answer: A**

Explanation:

On BIG-IP systems, all authentication attempts for administrative access—including logins to the Configuration Utility (GUI)—are logged in /var/log/secure. This log file records:

- \* Successful and failed login attempts
- \* The username used
- \* The authentication method (local, LDAP, RADIUS, etc.)
- \* Access denials and PAM authentication errors

Why the other options are incorrect:

- \* /var/log/pam/tallylog tracks account lockouts and failed attempt counters, not detailed login attempts.
  - \* /var/log/ltn logs traffic management events, not administrative authentication.
  - \* /var/log/httpd logs web server activity but does not record authentication success or failure for BIG-IP administrative users.
- Therefore, the correct log file to verify whether a user attempted to log in to the BIG-IP Configuration Utility is /var/log/secure.

#### NEW QUESTION # 66

What is the tmsh command to list the IP ranges that can access the management interface via SSH? (Choose one answer)

- A. tmsh list /sys sshd /etc/hosts.allow
- B. tmsh show /sys sshd /etc/hosts.allow
- **C. tmsh list /sys sshd allow**
- D. tmsh show /sys sshd allow

**Answer: C**

Explanation:

On BIG-IP systems, SSH access restrictions are configured under the /sys sshd object. The allow property defines the IP addresses or networks permitted to connect to the management interface using SSH.

- \* The list command is used to display the current configuration settings.
- \* Therefore, tmsh list /sys sshd allow correctly displays the configured allowed IP ranges.

Why the other options are incorrect:

- \* A (show) displays runtime or statistical information, not configuration values.
- \* C and D incorrectly reference /etc/hosts.allow; BIG-IP manages SSH access through TMSH objects, not by directly listing host files in this context.

### NEW QUESTION # 67

The BIG-IP appliance fails to boot. The BIG-IP Administrator needs to run the End User Diagnostics (EUD) utility to collect data to send to F5 Support. Where can the BIG-IP Administrator access this utility?

- A. Management Port
- **B. Console Port**
- C. Internal VLAN interface
- D. External VLAN interface

**Answer: B**

Explanation:

The EUD is a 33 hardware-level diagnostic tool that runs outside of the TMOS operating system. Because it is used when the system cannot boot or is in a pre-boot state, it cannot be accessed via the GUI or management network. The administrator must connect physically via the serial Console Port to interact with the boot menu and initiate the hardware tests.

### NEW QUESTION # 68

Administrative user accounts have been defined on the remote LDAP server and are unable to log in to the BIG-IP device. Which log file should the BIG-IP Administrator check to find the related messages? (Choose one answer)

- A. /var/log/messages
- **B. /var/log/secure**
- C. /var/log/user.log
- D. /var/log/ltn

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

When BIG-IP is configured to use remote authentication (such as LDAP), all authentication and authorization attempts—including successes and failures—are logged to /var/log/secure.

For LDAP-based administrative login issues, /var/log/secure contains:

LDAP authentication failures

PAM authentication errors

Authorization and access-denied messages

Details explaining why a remote user could not log in

Why the other options are incorrect:

/var/log/user.log is not a standard BIG-IP log file for authentication.

/var/log/ltn logs traffic management events, not user authentication.

/var/log/messages contains general system messages but not detailed authentication failure information.

Therefore, the correct log file to troubleshoot LDAP administrative login failures is /var/log/secure.

### NEW QUESTION # 69

.....

Many people often feel that their memory is poor, and what they have learned will soon be forgotten. In fact, this is because they did not find the right way to learn. BIG-IP Administration Control Plane Administration exam tests allow you to get rid of the troubles of reading textbooks in a rigid way, and help you to memorize important knowledge points as you practice. Industry experts hired by F5CAB4 Exam Question explain the hard-to-understand terms through examples, forms, etc. Even if you just entered the industry, you can easily understand their meaning. With F5CAB4 test guide, you will be as relaxed as you do normally exercise during the exam.

**Reliable F5CAB4 Test Voucher:** <https://www.lead2passexam.com/F5/valid-F5CAB4-exam-dumps.html>

Thousands of people will compete with you to get the F5CAB4 certificate, By practicing again and again you will become an expert to solve all the F5CAB4 exam questions completely and before the exam time, Our F5CAB4 exam guide have also set a series of explanation about the complicated parts certificated by the syllabus and are based on the actual situation to stimulate exam circumstance in order to provide you a high-quality and high-efficiency user experience, They maintain and ensure the top standard

of Lead2PassExam BIG-IP Administration Control Plane Administration (F5CAB4) exam questions all the time.

The network layer, which is actually IP Internet Protocol) layer, Dynamically Allocated Arrays, Thousands of people will compete with you to get the F5CAB4 certificate.

By practicing again and again you will become an expert to solve all the F5CAB4 exam questions completely and before the exam time, Our F5CAB4 exam guide have also set a series of explanation about the complicated parts certificated by the syllabus and are based F5CAB4 on the actual situation to stimulate exam circumstance in order to provide you a high-quality and high-efficiency user experience.
