ユニークなISO-IEC-27001-Foundationテスト参考書と便利なISO-IEC-27001-Foundation受験準備

当社の唯一の目的は、各顧客が試験に合格するのを支援するとともに、短時間で重要な認定を取得することで

す。試験に合格し、自分にとって非常に重要なISO-IEC-27001-Foundation認定を取得したい場合は、当社のISO-IEC-27001-Foundation認定準備資料を選択して、試験の理解を深めることを強くお勧めします。あなたが準備するつもりです。弊社からISO-IEC-27001-Foundation試験教材を購入することに決めた場合、試験に合格し、他の人よりもリラックスした方法で認定資格を取得できると考えています。

APMG-International ISO/IEC 27001 (2022) Foundation Exam 認定 ISO-IEC-27001-Foundation 試験問題 (Q40-Q45):

質問 # 40

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Competence
- B. Communication
- **C. Awareness**
- D. Nonconformity and corrective action

正解: C

解説:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

質問 # 41

Which factor is required to be determined when understanding the organization and its context?

- A. The processes that will be required to operate the ISMS
- B. The ISO/IEC 27001 clauses which apply to the management system
- C. The information security objectives relevant to the ISMS
- **D. Internal issues affecting the purpose of the ISMS**

正解: D

解説:

Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

質問 # 42

Which statement describes a requirement of an internal audit programme?

- A. The programme must use third party auditors to ensure impartiality
- **B. The programme must consider the importance of the target processes**
- C. All processes must be audited within a 3-year cycle
- D. Previous audit results are disregarded to ensure objectivity

正解: B

解説:

Clause 9.2.2 of ISO/IEC 27001:2022 specifies requirements for the internal audit programme. It requires organizations to: "Plan, establish, implement and maintain an audit programme(s) including the frequency, methods, responsibilities, planning requirements and reporting, which shall take into consideration the importance of the processes concerned, changes affecting the organization, and the results of previous audits." This makes option C correct, since importance of the processes is a required factor. Option A is incorrect because audits do not need third-party auditors; objectivity can be maintained internally if independence is respected. Option B is wrong because previous audit results must be considered, not disregarded. Option D is also incorrect - the standard does not specify a 3-year cycle; frequency depends on risks and needs. Thus, the correct verified answer is C.

質問 # 43

Identify the missing word(s) in the following sentence.

"Information security, cybersecurity and privacy protection - [?]" is the title of ISO/IEC 27005.

- A. Information security management systems - Requirements
- B. Information security controls
- C. Guidelines for information security management systems auditing
- **D. Guidance on managing information security risks**

正解: D

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27005 standards:

ISO/IEC 27005:2022 is titled:

"Information security, cybersecurity and privacy protection - Guidance on managing information security risks." This standard provides structured methodologies for identifying, analyzing, evaluating, and treating risks, in alignment with ISO/IEC 27001's risk management requirements (Clause 6.1.2 and 6.1.3). It supports organizations in implementing the risk management process that underpins an ISMS. Options A and B are titles of other ISO standards (ISO/IEC 27007 for auditing, ISO/IEC 27001 for requirements). Option D refers to ISO/IEC 27002 (controls).

Thus, the correct answer is C: Guidance on managing information security risks.

質問 # 44

Which item is required to be defined when planning the organization's risk assessment process?

- A. The parts of the ISMS scope which are excluded from the risk assessment
- **B. The criteria for acceptable levels of risk**
- C. There are NO specific information requirements
- D. How the effectiveness of the method will be measured

正解: B

解説:

Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.

Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.

Thus, the correct answer is C: The criteria for acceptable levels of risk.
