

JN0-253 Test Dumps.zip - JN0-253 Reliable Test Blueprint

P.S. Free & New JN0-253 dumps are available on Google Drive shared by DumpsKing: <https://drive.google.com/open?id=1nICDrNBu9uiAs5AfeTV8iLldZGNckLRT>

With the JN0-253 exam, you will harvest many points of theories that others ignore and can offer strong prove for managers. So the JN0-253 exam is a great beginning. However, since there was lots of competition in this industry, the smartest way to win the battle is improving the quality of our JN0-253 Learning Materials, which we did a great job. With passing rate up to 98 to 100 percent, you will get through the JN0-253 exam with ease.

Juniper JN0-253 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
Topic 2	<ul style="list-style-type: none">Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
Topic 3	<ul style="list-style-type: none">Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
Topic 4	<ul style="list-style-type: none">Marvis Virtual Network Assistant AI: This domain introduces Marvis, an AI-powered assistant providing automated troubleshooting through intelligent actions, natural language queries, and specialized analytical tools for proactive issue resolution.

- Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.

Free PDF Quiz Juniper - JN0-253 Updated Test Dumps.zip

The DumpsKing is committed to providing the best possible study material to succeed in the Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam. With actual PDF questions, customizable practice exams, and 24/7 support, customers can be confident that they are getting the best possible prep material. The DumpsKing JN0-253 is an excellent choice for anyone looking to advance their career with the certification. Buy Now.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q74-Q79):

NEW QUESTION # 74

You want to determine where you have coverage issues in your network using Marvis Actions. Which Marvis Action category should you use in this situation?

- A. Application
- **B. AP**
- C. Connectivity
- D. Clients

Answer: B

NEW QUESTION # 75

Which data format is transmitted during a Juniper Mist API request?

- A. XML
- **B. JSON**
- C. CSV
- D. YAML

Answer: B

Explanation:

The Juniper Mist Cloud API follows RESTful API design principles, enabling programmatic access to all Mist Cloud functions such as device management, configuration, analytics, and monitoring. REST APIs in Mist use a lightweight and standardized data exchange format to facilitate seamless integration with third-party applications and automation frameworks.

According to the Juniper Mist API Developer Guide:

"All Juniper Mist Cloud API requests and responses are transmitted in JavaScript Object Notation (JSON) format. JSON is used because it is lightweight, easy to parse, and compatible with all modern programming environments." JSON is the preferred format because it is both human-readable and machine-efficient, allowing for fast serialization and deserialization of data structures.

Other formats such as CSV, XML, and YAML are not used for API communication within the Mist Cloud architecture.

Therefore, the correct answer is D. JSON.

NEW QUESTION # 76

How does Mist determine the location of clients in an indoor setting?

- A. trilateration
- **B. probability surface**
- C. GPS
- D. triangulation

Answer: B

Explanation:

Mist builds location from "Probability Surfaces" not triangulation. The more directional RSSI beam information your client hears, the more data for the location engine to work with creating the probability surfaces, which provides the best possible location accuracy with sub second latency.

NEW QUESTION # 77

Which operation does an HTTP POST perform?

- A. write
- **B. create**
- C. read
- D. delete

Answer: B

Explanation:

An HTTP POST operation performs the "create" function in web communications. This method sends data to a server to create a new resource. For example, when you submit a form on a website, the data is sent to the server using a POST request, which then creates a new entry in the database.

NEW QUESTION # 78

Which two Wi-Fi related SLEs are visible in the Mist UI? (Choose two.)

- **A. Throughput**
- B. Switch Health
- C. Application Health
- **D. Capacity**

Answer: A,D

Explanation:

Wi-Fi Related SLEs in Mist UI:

SLEs (Service Level Expectations) help monitor and ensure Wi-Fi network performance.

Visible SLEs:

Capacity:

Capacity SLE monitors the network's ability to handle the number of connected clients and their bandwidth requirements.

Throughput:

Throughput SLE measures the data transfer rates, ensuring that the network meets the expected performance levels.

NEW QUESTION # 79

.....

Our JN0-253 guide torrent provides 3 versions and they include PDF, PC, APP online versions. Each version boosts their strength and using method. For example, the PC version of JN0-253 test torrent is suitable for the computers with the Window system. It can stimulate the real exam operation environment. The PDF version of JN0-253 study torrent is convenient to download and print our JN0-253 guide torrent and is suitable for browsing learning. And APP version of our JN0-253 exam questions can be used on all electronic devices, such as iPad, laptop, MAC and so on.
