- A. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification with a proficiency that is lower or higher than specified.
- B. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource does not have the qualification.

- D. An individual's score is 100% if the resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency.

Answer: C,D

Explanation:
The Resource Qualification Score is a percentage that indicates how well an individual matches the qualifications required for a resource request. An individual's score is 100% if either of the following conditions are met:
* The resource request has a qualification, but no proficiency is specified, and the resource has the qualification. This means that any level of proficiency is acceptable for the qualification.
* The resource request has a qualification with a specified proficiency and the resource has the qualification that meets the specified proficiency. This means that the resource has the exact level of proficiency required for the qualification. An individual's score is not 100% if the resource request has a qualification with a specified proficiency and the resource does not have the qualification or has a different level of proficiency than required. In this case, the score is calculated based on how close the resource's proficiency is to the required proficiency. Reference: https://docs.oracle.com/en/cloud/saas
