

# Senior Data Scientist test for engine, SDS VCE test engine

P.S. Free 2026 DASCASDS dumps are available on Google Drive shared by LatestCram: <https://drive.google.com/open?id=16OUkDTDiaS0YSVkrVbkrvmxmRaPYrvAR>

We provide the latest DASCASDS exam dumps to help you update your knowledge and offer the SDS sample questions to test your level in efficient way. If you are preparing SDS practice tests now, our valid dumps torrent will be your best choice because you can find everything you want in our learning materials. Please contact us if you have any questions in purchasing SDS Exam Prep.

As a result, it gives you a feeling of taking the actual test. The DASCASDS desktop practice exam software runs on computers and laptops with a Windows operating system and it requires no internet. Since LatestCram always assists its customers, you can contact our team 24/7 to address your issues.

## Hot SDS Exam Quizzes | Easy To Study and Pass Exam at first attempt & Free Download SDS: Senior Data Scientist

Comparing to the training institution, our website can ensure you pass the DASCASDS actual test with less time and money. You just need to use spare time to practice the SDS exam questions and remember key points of test answers. If you get a bad result in the SDS Practice Test, we will full refund you to reduce the loss of your money.

### DASCASDS Senior Data Scientist Sample Questions (Q65-Q70):

#### NEW QUESTION # 65

Which of the following is a trend analysis component of time series decomposition?

- A. Irregular
- B. Cyclical

- C. All of the above
- D. Seasonal
- E. Both A and B

**Answer: C**

Explanation:

Time series decomposition breaks down data into components to better understand underlying patterns and support forecasting. The main components are:

Trend: Long-term progression (upward or downward).

Seasonal: Repeating short-term patterns (e.g., monthly or quarterly).

Cyclical (Option A): Medium- to long-term cycles (e.g., business cycles).

Irregular/Residual (Option C): Random, unpredictable variations.

Since trend analysis involves examining cyclical, seasonal, and irregular components, the correct answer is Option E (All of the above).

DASCA Data Scientist Knowledge Framework (DSKF) - Analytics: Time Series Decomposition and Trend Analysis.

### NEW QUESTION # 66

What is the agenda of discussion at a "stand up" meeting of an Agile team?

- A. What they are planning to do today
- B. All of the above
- C. Both A and B
- D. Any roadblocks they are running into
- E. What they accomplished the previous day

**Answer: B**

Explanation:

A daily stand-up meeting (also called a daily Scrum) is a short meeting (usually 15 minutes) that Agile teams hold to synchronize progress. Its agenda is structured around three key questions:

What was accomplished yesterday? (Progress review).

What is planned for today? (Work alignment).

What impediments or roadblocks exist? (Barriers identification).

This process enhances transparency, communication, and accountability, ensuring the team can quickly address obstacles and stay aligned with sprint goals.

Option A: Correct - yesterday's work is discussed.

Option B: Correct - today's planned tasks are outlined.

Option C: Correct - roadblocks are highlighted.

Option D: Incomplete since it misses C.

Option E: Correct - covers all agenda items.

Thus, the correct answer is Option E (All of the above).

### NEW QUESTION # 67

ElementTree sub-library gives us direct access to:

- A. Parse tree of the XML
- B. Copy tree of the XML
- C. Delete tree of the XML
- D. Insert tree of the XML
- E. None of the above

**Answer: A**

Explanation:

In Python, the ElementTree module (part of the standard library xml.etree.ElementTree) provides a simple and efficient API for

parsing and creating XML data.

The main feature of ElementTree is its ability to provide direct access to the parse tree of an XML document.

This allows developers to:

Parse XML into an in-memory tree structure.

Traverse, search, modify, and extract information from XML elements.

Write back changes into XML files.

Options B, C, and D (Delete, Copy, Insert tree) are not standard terminology in XML handling with ElementTree. While you can delete, insert, or copy elements, the module itself primarily gives parse tree access.

Thus, the correct answer is Option A (Parse tree of the XML).

### NEW QUESTION # 68

Machine learning can be used in:

- A. Web search results
- **B. All of the above**
- C. Pattern and image recognition
- D. Fraud detection
- E. Real-time ads on web pages and mobile devices

**Answer: B**

Explanation:

Machine Learning has broad applications across industries and technologies:

Fraud Detection (Option A): Detecting anomalies in financial transactions, credit card usage, and cybersecurity threats.

Web Search Results (Option B): Ranking algorithms (e.g., Google's PageRank enhanced by ML techniques) improve relevance of search queries.

Real-time Ads (Option C): Online ad systems use reinforcement learning and recommendation models to target ads dynamically.

Pattern & Image Recognition (Option D): ML (especially deep learning) powers facial recognition, handwriting recognition, medical imaging, etc.

Since ML is used in all these applications, the correct answer is Option E (All of the above).

### NEW QUESTION # 69

Which of the following is correct?

i. LaTeX is used to publish work in a scientific journal

ii. LaTeX is a markup language that can be compiled into formatted documents iii. LaTeX is for publishing scientific papers

- **A. i, ii, iii**
- B. i, ii
- C. i, iii
- D. ii, iii

**Answer: A**

Explanation:

LaTeX is a high-quality typesetting system widely used in academia, particularly in scientific publishing.

Statement i: Correct. LaTeX is widely used to prepare manuscripts for scientific journals, theses, and technical reports.

Statement ii: Correct. LaTeX is a markup language (similar to HTML in concept) that compiles into formatted PDFs/documents.

Statement iii: Correct. LaTeX is a standard for publishing scientific papers due to its ability to handle complex mathematical equations, references, and formatting.

Thus, all three statements are true # Option B (i, ii, iii).
