SAP C-
SICPS-2302 Certified Application Associate - SAP S/4HANA Cloud public edition - Professional Services 2
S/4HANA Cloud public edition - Professional Services certification is highly valued by employers and can help professionals advance their careers in the field of professional services.

SAP Certified Application Associate - SAP S/4HANA Cloud public edition - Professional Services Sample Questions (Q54-Q59):

NEW QUESTION # 54

How can business users create new analytics content? Note: There are 3 correct answers to this question.

- A. Change underlying database tables of standard data sources
- B. Create new data sources via joins of standard data sources
- C. Combine current and historical data
- D. Create additional key figures in existing data sources
- E. Change existing data sources by adding filters

Answer: B,C,D

NEW QUESTION # 55

Which of the following tasks can be performed through the Billing Request Editor? Note: There are 2 correct answers to this question.

- A. Remove billing block
- B. Release billing proposal
- C. Change debit memo request
- D. Change billing document request

Answer: C,D

NEW QUESTION # 56

Which technology is used to integrate SAP S/4HANA Cloud with other SAP and non-SAP applications?

- A. Direct connectivity
- B. SAP Change and Transport System
- C. SQLConnect function
- D. SAP Landscape Transformation Replication Server

Answer: A

NEW QUESTION # 57

Which of the following are benefits of the SAP Best Practices Event-Based Revenue Recognition - Project-Based Services (11L) scenario? Note: There are 3 correct answers to this question.

- A. Full transparency

100% Pass Quiz SAP - Unparalleled C-SICPS-2302 - Certification Certified Application Associate - SAP S/4HANA Cloud public edition - Professional Services Sample Questions

DOWNLOAD the newest Exam4PDF C-BCBTP-2502 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1HYOm2hdnWg1vm6xAfSGhrHQdDIqr6aCa>

During nearly ten years, our company has kept on improving ourselves on the C-BCBTP-2502 study questions, and now we have become the leader in this field. And now our C-BCBTP-2502 training materials have become the most popular C-BCBTP-2502 Practice Engine in the international market. There are so many advantages of our C-BCBTP-2502 guide quiz, and as long as you have a try on them, you will definitely love our exam dumps.

This pdf covers all of the C-BCBTP-2502 Exam Questions from the previous exams as well as those that will appear in the upcoming SAP C-BCBTP-2502 exam. The C-BCBTP-2502 PDF exam questions are compiled according to the latest exam syllabus to ensure your success. The SAP C-BCBTP-2502 PDF exam questions are also printable to make handy notes.

>>> C-BCBTP-2502 Exam Guide Materials <<<

C-BCBTP-2502 Exam Guide Materials - Pass Guaranteed Quiz SAP First-

grade Guaranteed C-BCBTP-2502 Questions Answers

The PDF version of C-BCBTP-2502 training materials supports download and printing, so its trial version also supports. You can learn about the usage and characteristics of our C-BCBTP-2502 learning guide in various trial versions, so as to choose one of your favorite in formal purchase. In fact, all three versions contain the same questions and answers. You can either choose one or all three after payment. I believe you can feel the power of our C-BCBTP-2502 Preparation prep in these trial versions.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which SAP BTP solution can be used to streamline handling of blocked sales orders?

- A. SAP Integration Suite
- B. SAP Datasphere
- C. SAP Analytics Cloud
- **D. SAP Build Process Automation**

Answer: D

Explanation:

Blocked sales orders often represent a significant bottleneck in the "Order-to-Cash" process, usually requiring manual intervention from credit managers or sales administrators. SAP Build Process Automation is the ideal BTP solution to streamline this task. It combines the capabilities of workflow management and Robotic Process Automation (RPA) to automate the evaluation and release (or escalation) of these orders based on predefined business rules and real-time data from SAP S/4HANA.

By positioning SAP Build Process Automation as the solution, businesses can implement "exception-based" management. Instead of a human reviewing every blocked order, the BTP service can automatically release orders that meet certain low-risk criteria or route high-value/high-risk blocks to the appropriate manager's mobile device for instant approval. This significantly reduces the "Day Sales Outstanding" (DSO) and improves customer satisfaction by accelerating fulfillment. This approach highlights the value of SAP BTP as an extension layer for the SAP Business Suite; it allows for the optimization of core ERP processes without the need for complex, custom ABAP development, maintaining a "clean core" while achieving high levels of operational efficiency.

NEW QUESTION # 14

How does SAP BTP support hybrid cloud strategies?

- A. By enforcing cloud-only solutions without on-premise support.
- B. By restricting enterprises to a single cloud vendor.
- C. By eliminating the need for cloud-based analytics.
- **D. By allowing seamless integration between on-premise and cloud systems.**

Answer: D

Explanation:

Most large enterprises do not operate solely in the cloud; they maintain a "hybrid" environment consisting of legacy on-premise systems (like SAP ERP 6.0) and modern cloud applications (like SAP S/4HANA Cloud).

SAP BTP supports hybrid cloud strategies by acting as the bridge between these two worlds. Through the SAP Connectivity Service and the Cloud Connector, BTP establishes a secure, encrypted tunnel that allows cloud-based services to access on-premise data and processes without requiring complex VPN setups or opening vulnerable firewall ports.

This capability is essential for businesses that are mid-transition in their digital transformation journey. It allows them to keep their core "system of record" on-premise for compliance or technical reasons while still taking advantage of cloud-native innovations on BTP, such as advanced analytics, AI, and mobile extensions.

By positioning BTP as a hybrid-ready platform, SAP ensures that customers can modernize at their own pace.

This "side-by-side" extensibility model ensures that the on-premise core remains clean and stable, while the cloud layer provides the agility needed to respond to market changes. This flexibility is a cornerstone of the SAP Business Suite's value proposition, offering a path to the cloud that respects the existing investments of the enterprise.

NEW QUESTION # 15

Which SAP BTP service plays a key role in integrating finance-related processes across enterprise systems?

- A. SAP Business Network
- B. SAP Conversational AI
- **C. SAP Integration Suite**
- D. SAP Ariba

Answer: C

Explanation:

In the modern enterprise, financial processes rarely exist in a vacuum; they often require data from procurement, sales, payroll, and external banking institutions. SAP Integration Suite is the essential service on SAP BTP that facilitates this cross-system connectivity. It acts as an Integration Platform-as-a-Service (iPaaS) that enables the seamless flow of financial data between the SAP S/4HANA core and other third-party or legacy systems. By utilizing pre-built integration flows and specialized adapters, organizations can automate complex financial tasks such as bank statement processing, tax reporting across different jurisdictions, and real-time payment reconciliations.

The strategic positioning of the Integration Suite within the finance domain is to eliminate "data islands." When financial data is siloed, it leads to delays in closing the books and increases the risk of manual errors.

By using SAP Integration Suite, businesses can ensure that every financial transaction—regardless of where it originates—is reflected accurately in the central ledger. This real-time synchronization is critical for maintaining compliance and providing the CFO's office with an accurate, up-to-the-minute view of the company's financial health. While SAP Ariba and SAP Business Network handle specific transactional interactions, they rely on the underlying Integration Suite to pass that data back into the core financial systems.

NEW QUESTION # 16

What is the primary function of SAP Business Process Intelligence?

- A. To replace existing workflow automation tools.
- **B. To analyze and optimize business processes using AI-driven insights.**
- C. To manage API security and integrations.
- D. To store customer transactional data.

Answer: B

Explanation:

Before an organization can automate or improve its operations, it must first understand how its processes are actually running. The primary function of SAP Business Process Intelligence (largely centered around the SAP Signavio suite) is to analyze and optimize business processes using AI-driven insights. It provides

"Process Mining" capabilities that scan the data logs of the SAP Business Suite to reveal the "real" path a business process takes, often uncovering hidden bottlenecks, manual workarounds, and deviations from the standard procedure.

By positioning Business Process Intelligence as a starting point for digital transformation, SAP BTP allows organizations to make data-backed decisions about where to automate. For example, the tool might discover that a specific regional office takes twice as long to process purchase orders compared to the global average.

Using AI, it can identify the root cause—such as a lack of automation or incorrect master data—and recommend specific BTP services (like SAP Build) to fix the issue. This creates a cycle of continuous improvement, where processes are constantly monitored, analyzed, and optimized, ensuring that the SAP Business Suite operates at peak efficiency and remains aligned with the company's strategic goals.

NEW QUESTION # 17

Which SAP BTP capability is crucial for supply chain resilience in the logistics industry?

- A. Limiting automation in fleet management.
- **B. Real-time data exchange and tracking with SAP Integration Suite.**
- C. Manual coordination of supply chain operations.
- D. Restricting logistics data visibility to local servers.

Answer: B

Explanation:

Supply chain resilience depends on visibility and the ability to react to disruptions in real-time. The SAP Integration Suite on BTP is crucial here because it enables real-time data exchange and tracking across a global network of suppliers, carriers, and warehouses. In the logistics industry, delays at a single port or a shortage of specific raw materials can have a cascading effect. By integrating IoT

(Internet of Things) sensors, GPS tracking, and carrier management systems through the BTP Integration Suite, companies can gain a "control tower" view of their entire supply chain.

This connectivity allows for "event-driven" logistics. For example, if a shipment is delayed, the system can automatically trigger a notification in the SAP S/4HANA system, recalculate production schedules, and notify customers—all without manual intervention. This level of automation and visibility is what builds resilience; it allows businesses to pivot quickly when faced with unexpected challenges. Positioning SAP BTP as the integration hub for logistics ensures that data flows smoothly between the "digital core" and the physical world of shipping and receiving. This transforms the supply chain from a linear, often opaque process into a dynamic, responsive network that can withstand the pressures of modern global commerce.

NEW QUESTION # 18

.....

Appropriately, we can wrap up this post with the way that the test centers around the material that is essential to handily clear your SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite certification exam. You can trust the material and set aside an edge to zero in on those before you win eventually over the last SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite (C-BCBTP-2502) exam dates. To get it, find the source that assists you with getting the right test and spotlight on material agreeable for you for organizing the SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite exam.
