Fantastic CertNexus AIP-210 Reliable Exam Papers Are Leading Materials & Authorized AIP-210: CertNexus Certified Artificial Intelligence Practitioner (CAIP)

Did you often feel helpless and confused during the preparation of the AIP-210 exam? Do you want to find an expert to help but feel bad about the expensive tutoring costs? Don't worry. Our AIP-210 exam questions can help you to solve all the problems. Our AIP-210 Study Material always regards helping students to pass the exam as its own mission. And we have successfully helped numerous of the candidates pass their exams.

CertNexus Certified Artificial Intelligence Practitioner (CAIP) Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which of the following tools would you use to create a natural language processing application?

- A. NLTK
- B. Azure Search
- C. DeepDream
- D. AWS DeepRacer

Answer: A

Explanation:

Explanation

NLTK (Natural Language Toolkit) is a Python library that provides a set of tools and resources for natural language processing (NLP). NLP is a branch of AI that deals with analyzing, understanding, and generating natural language texts or speech. NLTK offers modules for various NLP tasks, such as tokenization, stemming, lemmatization, parsing, tagging, chunking, sentiment analysis, named entity recognition, machine translation, text summarization, and more .

NEW QUESTION # 45

Which of the following occurs when a data segment is collected in such a way that some members of the intended statistical population are less likely to be included than others?

- A. Stereotype bias
- B. Algorithmic bias
- C. Systematic value distortion
- D. **Sampling bias**

Answer: D

Explanation:

Explanation

Sampling bias occurs when a data segment is collected in such a way that some members of the intended statistical population are less likely to be included than others. This can result in a sample that is not representative of the population and may lead to inaccurate or misleading conclusions. Sampling bias can be caused by various factors, such as non-random sampling methods, non-response, self-selection, or convenience sampling. References: [Sampling bias - Wikipedia], [What is Sampling Bias? Definition, Types and Examples]

NEW QUESTION # 46

A company is developing a merchandise sales application. The product team uses training data to teach the AI model predicting sales, and discovers emergent bias. What caused the biased results?

- A. **The AI model was trained in winter and applied in summer.**
- B. The team set flawed expectations when training the model.
- C. The training data used was inaccurate.
- D. The application was migrated from on-premise to a public cloud.

Answer: A

Explanation:

Emergent bias is a type of bias that arises when an AI model encounters new or different data or scenarios that were not present or accounted for during its training or development. Emergent bias can cause the model to make inaccurate or unfair predictions or decisions, as it may not be able to generalize well to new situations or adapt to changing conditions. One possible cause of emergent bias is seasonality, which means that some variables or patterns in the data may vary depending on the time of year. For example, if an AI model for merchandise sales prediction was trained in winter and applied in summer, it may produce biased results due to differences in customer behavior, demand, or preferences.

NEW QUESTION # 47

Which two encoders can be used to transform categorical data into numerical features? (Select two.)

- A. Log Encoder
- B. Mean Encoder
- C. Median Encoder

- D. Count Encoder
- E. One-Hot Encoder

Answer: D,E

NEW QUESTION # 48

When should the model be retrained in the ML pipeline?

- A. A new monitoring component is added.
- B. Concept drift is detected in the pipeline.
- C. Some outliers are detected in live data.
- D. More data become available for the training phase.

Answer: B

Explanation:

When concept drift is detected in the pipeline, it means that the model performance has degraded over time due to changes in the underlying data generating process. This requires retraining the model with new data that reflects the current situation and updating the model parameters accordingly. References: Use pipeline parameters to retrain models in the designer - Azure Machine Learning | Microsoft Learn, Retraining Model During Deployment: Continuous Training and Continuous Testing

NEW QUESTION # 49

.....

You must believe that you have extraordinary ability to work and have an international certificate to prove your inner strength. You will definitely be the best one among your colleagues. The help you provide with our AIP-210 Learning Materials is definitely what you really need. And if you study with our AIP-210 exam braindumps, you will know your dream clearly. Join AIP-210 study guide and you will be the best person!

AIP-210 Exam Sims: <https://www.validdumps.top/AIP-210-exam-torrent.html>

Take your AIP-210 valid training questions with ease, Our company has been engaged in compiling electronic AIP-210 study guide questions in this field for nearly ten years, now, we are glad to share our fruits with all of the workers in this field, On the other hand, AIP-210 exam braindumps are aimed to help users make best use of their sporadic time by adopting flexible and safe study access, Finally, if you major in this filed, maybe you should get the AIP-210.

Generally, a proxy server has more than one network adapter AIP-210 Reliable Exam Papers so that it can connect to the various networks it is acting as a mediator for, Creating and Editing Watchers.

Take your AIP-210 valid training questions with ease, Our company has been engaged in compiling electronic AIP-210 study guide questions in this field for nearly ten Dumps AIP-210 Vce years, now, we are glad to share our fruits with all of the workers in this field.
