

NETA_2 High Passing Score & Pdf NETA_2 Files

P.S. Free 2026 NETA NETA_2 dumps are available on Google Drive shared by TestPDF: https://drive.google.com/open?id=14BIOg9cwWa_C4uTZhNCxmGecpaeDLHIn

According to the survey, the average pass rate of our candidates has reached 99%. High passing rate must be the key factor for choosing, which is also one of the advantages of our NETA_2 real study dumps. In order to get more chances, more and more people tend to add shining points, for example a certification to their resumes. What you need to do first is to choose a right NETA_2 Exam Material, which will save your time and money in the preparation of the NETA_2 exam. Our NETA_2 latest questions is one of the most wonderful reviewing NETA Level 2 Certified Assistant Electrical Testing Specialist study training dumps in our industry, so choose us, and together we will make a brighter future.

If you want to find the best NETA_2 study materials, the first thing you need to do is to find a bank of questions that suits you. Our NETA_2 learning material is prepared by experts in strict accordance with the exam outline of the NETA_2 certification exam, whose main purpose is to help students to pass the exam with the least amount of time and effort. We can claim that if you study with our NETA_2 Practice Engine for 20 to 30 hours, then you will be sure to pass the exam.

Pdf NETA_2 Files & New Soft NETA_2 Simulations

High quality practice materials like our NETA_2 learning dumps exert influential effects which are obvious and everlasting during your preparation. The high quality product like our NETA_2 real exam has no need to advertise everywhere, the exam candidates are the best living and breathing ads. Our NETA_2 Exam Questions will help you you redress the wrongs you may have and will have in the NETA_2 study guide before heads. Just come and try!

NETA Level 2 Certified Assistant Electrical Testing Specialist Sample Questions (Q78-Q83):

NEW QUESTION # 78

Identify the substation bus arrangement that usestwo circuit breakers per circuit, allowing either breaker to be removed from service without interrupting load.

- A. Double breaker bus
- B. Double bus, single breaker
- C. Ring bus
- D. Main and transfer bus

Answer: A

Explanation:

A double breaker bus scheme assigns two breakers to each circuit, providing the highest level of reliability and operational flexibility. Either breaker can be removed for maintenance without interrupting service.

NETA Level 2 technicians must recognize bus schemes when performing commissioning tests, protection verification, and functional checks, as the scheme directly affects relay logic, interlocking, and testing sequences.

NEW QUESTION # 79

ASTM D 924 is a required acceptance test for liquid-filled transformers containing natural ester insulating fluid according to NETA standards.

- A. False
- B. Only above 69 kV
- C. Only for maintenance testing
- D. True

Answer: D

Explanation:

ASTM D 924 defines test methods for power factor and dielectric loss of insulating liquids. NETA standards require this test for acceptance testing of liquid-filled transformers, including those using natural ester insulating fluids.

Power factor testing evaluates the condition of the insulating liquid by identifying contamination, moisture, and deterioration. Natural ester fluids, while environmentally advantageous, still require dielectric evaluation to ensure reliability and safety.

NETA Level 2 technicians must be familiar with required acceptance tests and understand why dielectric properties are critical indicators of insulation health.

NEW QUESTION # 80

On an electrical schematic, a dot on a current transformer symbol indicates:

- A. Burden rating
- B. Polarity
- C. Metering accuracy class
- D. Grounded side

Answer: B

Explanation:

The dot convention indicates polarity, showing the instantaneous current direction relationship between primary and secondary windings. Correct polarity is critical for protection schemes, differential relays, and metering accuracy. NETA Level 2 technicians must verify CT polarity during installation and commissioning to ensure correct relay operation.

NEW QUESTION # 81

Which procedure ensures electrical equipment is completely isolated from all available energy sources prior to testing?

- A. Grounding
- B. Lockout / Tagout
- C. Voltage verification
- D. Barricading

Answer: B

Explanation:

Lockout/Tagout (LOTO) is the formal procedure used to ensure equipment is isolated from all sources of hazardous energy, including electrical, mechanical, hydraulic, pneumatic, and stored energy. Voltage verification alone confirms absence of electrical energy but does not prevent re-energization. NETA Level 2 technicians must apply LOTO before performing acceptance, maintenance, or commissioning testing to ensure an electrically safe work condition and compliance with OSHA and NETA safety practices.

NEW QUESTION # 82

When personnel are working in a permitted confined space, how many attendants must remain outside the space and for how long?

- A. One attendant, during entry only
- B. Two attendants, during energized work
- C. Two attendants, until entry permit expires
- **D. One attendant, for the duration of the operation**

Answer: D

Explanation:

Confined space safety requirements mandate that at least one trained attendant remain outside the space for the entire duration of the entry operation. The attendant monitors conditions, maintains communication, and initiates rescue procedures if needed. NETA Level 2 technicians must comply with confined space protocols when testing transformers, vaults, or enclosed switchgear compartments.

NEW QUESTION # 83

.....

These formats are made for customers by TestPDF so that they can prepare easily and can crack the NETA Level 2 Certified Assistant Electrical Testing Specialist (NETA_2) certification exam on the very first try. If the customers can't pass the NETA Level 2 Certified Assistant Electrical Testing Specialist (NETA_2) exam on the first try despite all their efforts they can claim a full refund from TestPDF (terms and conditions apply).
