What could be the cause of this? choose 2

- A. The Deliverability Access Level setting is incorrect.
- **B. Workflow emails only work in full sandboxes.**
- C. The email addresses for the users are incorrect
- **D. HTML templates are not available in sandboxes.**

Answer: B,D

NEW QUESTION # 161

A user changes roles from an EMEA sales representative to a US sales representative. How will this impact the ownership-based sharing rules for the user's records?

- A. None of the ownership-based sharing rules are recalculated.
- B. This will affect the ownership of records for standard objects but not custom objects.
- C. This will only affect ownership-based sharing rules if the user moves up in the role hierarchy.
- **D. All of the ownership-based sharing rules are recalculated.**

Answer: D

NEW QUESTION # 162

An administrator at Clod Kicks has build a flow that delivers status update email to customers. Recently, there's been an increase in support cases from customers reporting they had not received the email.

Where should the administrator look to investigate the issue?

- A. Setup Audit Trail
- B. Paused Flow Interviews
- C. Process Automation Setting
- **D. Email Logs**

Answer: D

Explanation:

Email logs are files that provide information about email delivery and activity in your Salesforce org. Email logs contain details such as sender, recipient, subject, date, status, error code, and more for each email sent or received within a specified time range. You can use email logs to investigate issues with email delivery or performance in your org. In this case, you can use email logs to check if the status update emails were sent successfully or if there were any errors or failures. References:
