

Nutanix NCP-CI-AWS PDF Format which has 100% correct answers

How to Get Ready for the Nutanix NCP-CI-AWS Exam Quickly?

In today's challenging IT sector, earning the Nutanix NCP-CI-AWS certification helps you accelerate your career. The Nutanix Certified Professional NCP-CI-AWS certification proves your technical expertise and also bolsters your credibility in the industry. Furthermore, success in the NCP-CI-AWS certification exam differentiates you from a pool of thousands of job seekers and enhances your chances of landing well-paid jobs and promotions. However, many applicants encounter problems such as a short time and a lack of self-assessment while preparing for the Nutanix Certified Professional - Cloud Integration - AWS v6.7 NCP-CI-AWS exam. If you are also facing these challenges, don't worry and choose JustCerts, which is dedicated to providing actual and the latest NCP-CI-AWS exam questions in three formats. With the help of these real [Nutanix Dumps](#), you can get ready for the exam in a short time.

Authentic (Valid) Details Regarding The Nutanix NCP-CI-AWS Exam Questions

- VENDOR: (Nutanix)
- EXAM CODE: (NCP-CI-AWS)

If you purchase our NCP-CI-AWS preparation questions, it will be very easy for you to easily and efficiently find the exam focus. More importantly, if you take our products into consideration, our NCP-CI-AWS study materials will bring a good academic outcome for you. At the same time, we believe that our NCP-CI-AWS training quiz will be very useful for you to have high quality learning time during your learning process.

Now passing NCP-CI-AWS exam is not easy, so choosing a good training tool is a guarantee of success to get the NCP-CI-AWS certificate. If you choose our NCP-CI-AWS exam materials, we will free update within one year after you purchase. That is to say we can ensure that we will provide you with exam information and exam practice questions and answers immediately. It can let you be fully prepared for exam, and almost have 100% pass rate of NCP-CI-AWS Exam. We can not only allow you for the first time to participate in NCP-CI-AWS exam to pass it successfully, but also help you save a lot of valuable. Don't miss such a good opportunity because of your hesitation.

Top Nutanix NCP-CI-AWS Latest Mock Test & Authoritative PrepAwayPDF - Leader in Certification Exam Materials

Learning at electronic devices does go against touching the actual study. Although our NCP-CI-AWS exam dumps have been known as one of the world's leading providers of exam materials, you may be still suspicious of the content. Therefore, we especially

provide several demos for future reference and we promise not to charge you of any fee for those downloading. Then you will know whether it is suitable for you to use our NCP-CI-AWS Test Questions. There are answers and questions provided to give an explicit explanation. We are sure to be at your service if you have any downloading problems'

Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.
Topic 2	<ul style="list-style-type: none">Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.
Topic 3	<ul style="list-style-type: none">Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.
Topic 4	<ul style="list-style-type: none">Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.

Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q86-Q91):

NEW QUESTION # 86

What role is needed to create a cluster?

- A. Cluster Super Admin
- B. Cluster Administrator
- C. Customer Security Administrator
- D. Customer Administrator

Answer: A

Explanation:

* To create a cluster in Nutanix Cloud Integration with AWS, the role needed is Cluster Super Admin.

* The Cluster Super Admin role provides the highest level of privileges required to perform critical operations such as creating, managing, and deleting clusters.

* This role is essential for overseeing the cluster setup and configuration processes, ensuring the user has full control over the cluster lifecycle.

Refer to the Nutanix documentation on roles and permissions for NC2 on AWS for further details on the capabilities and required permissions for cluster creation.

NEW QUESTION # 87

An administrator has been managing an NC2 cluster that was created in February 2024 and is now deploying another NC2 cluster to use EC2 dedicated hosts. The cluster deployment failed. Which two actions should the administrator take before deploying the cluster? (Choose two.)

- A. Check if sufficient vCPU limit set for the AWS account.
- B. Check if the NC2 subscription is active.
- C. Check if the My Nutanix account is active.
- D. Update the CloudFormation stack to make sure you have the necessary permissions for the IAM roles.

Answer: A,B

Explanation:

When deploying a new NC2 cluster on AWS, especially when moving to specialized hardware like EC2 dedicated hosts, two

critical external factors must be verified: subscription status and AWS resource limits.

First, the administrator must ensure that the NC2 subscription is active and has sufficient credits or a valid payment method to support the new deployment. Second, AWS imposes default limits on the number of vCPUs and specific instance types that can be provisioned in a region. Since dedicated hosts consume a large number of vCPUs, the deployment will fail if the AWS account quota is exceeded. Verifying and, if necessary, requesting a quota increase from AWS is a mandatory step to ensure the underlying infrastructure is available for the Nutanix software.

NEW QUESTION # 88

When configuring an alert email in Prism Central deployed within an NC2 environment, what is required in order for the emails to be sent properly?

- A. SMTP server configured in Prism Central settings
- B. A whitelisted public cloud console endpoint
- C. Cluster Super Admin permissions
- D. Name servers configured in Prism Central

Answer: A

Explanation:

To ensure that alert emails are sent properly from Prism Central within an NC2 environment, configuring an SMTP server in the Prism Central settings is required. The SMTP server facilitates the sending of email notifications for alerts and other communications.

SMTP Configuration:

Prism Central requires an SMTP server to send email alerts. This involves specifying the SMTP server address, port, and authentication details if needed.

The configuration must include the email address from which the alerts will be sent and the recipient addresses.

Steps to Configure SMTP Server in Prism Central:

Log in to Prism Central.

Navigate to the "Settings" menu.

Select "Email Server" under the "Alerts" section.

Enter the SMTP server details, including the server address, port, and authentication credentials.

Test the configuration to ensure emails are sent correctly.

NEW QUESTION # 89

What should be checked within Flow Virtual Networking to ensure on-premises traffic will be routed correctly?

- A. Next Hop is the ERP of the Transit Gateway
- B. Next Hop is the overlay-external-subnet-nat
- C. Next Hop is the overlay-external-subnet-nonat
- D. Next Hop is the Transit Gateway P2P link

Answer: C

Explanation:

In an NC2 environment using Flow Virtual Networking (FVN), routing traffic between the AWS cloud and on-premises environments requires specific configuration of the Transit VPC and User VPCs.

To ensure that traffic reaching the on-premises environment is not subjected to Network Address Translation (NAT)-which would obscure the original IP addresses and potentially break connectivity for certain applications-the routing tables must point to the correct internal gateway interface. The overlay-external-subnet-nonat acts as the designated gateway for traffic that should be routed without address translation.

Verifying that the "Next Hop" for on-premises prefixes is set to this specific subnet ensures that internal communication remains transparent and complies with standard corporate networking and security policies.

NEW QUESTION # 90

An administrator needs to recover a cluster protected using the Cluster Protect feature. The Prism Central instance was not on the failed cluster.

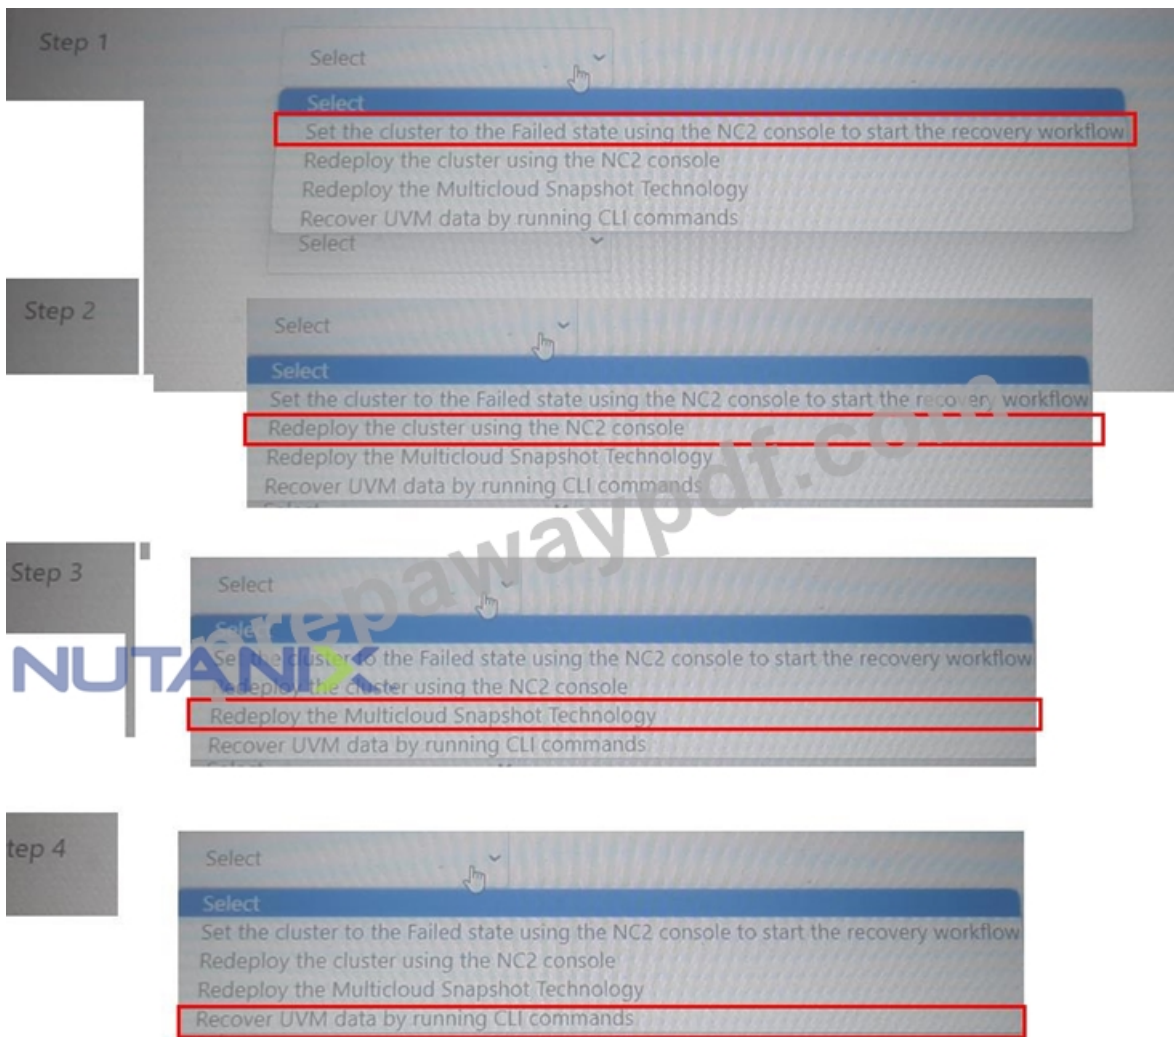

Which steps, in order, should the administrator perform to recover the cluster?

The image shows a diagram of a recovery workflow with four steps. Each step is represented by a grey box on the left and a corresponding dropdown menu on the right. The dropdown menus contain the following options:

- Step 1: Select (highlighted), Set the cluster to the Failed state using the NC2 console to start the recovery workflow, Redeploy the cluster using the NC2 console, Redeploy the Multicloud Snapshot Technology, Recover UVM data by running CLI commands, Select
- Step 2: Select (highlighted), Set the cluster to the Failed state using the NC2 console to start the recovery workflow, Redeploy the cluster using the NC2 console, Redeploy the Multicloud Snapshot Technology, Recover UVM data by running CLI commands, Select
- Step 3: Select (highlighted), Set the cluster to the Failed state using the NC2 console to start the recovery workflow, Redeploy the cluster using the NC2 console, Redeploy the Multicloud Snapshot Technology, Recover UVM data by running CLI commands, Select
- Step 4: Select (highlighted), Set the cluster to the Failed state using the NC2 console to start the recovery workflow, Redeploy the cluster using the NC2 console, Redeploy the Multicloud Snapshot Technology, Recover UVM data by running CLI commands, Select
