Answer: E

NEW QUESTION # 73

A user is evaluating the capabilities of both process mining and task mining. You need to determine when you should use process mining or task mining. Which Process advisor capability should you use? To answer, drag the appropriate capabilities to the correct requirements. Each capability may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Capabilities	Requirement	Capability
Process mining	See the actual steps used to perform a process.	<input type="text"/>
Task mining	Reduce process time by evaluating event data from a system of record.	<input type="text"/>
	Understand what employees do while performing each task.	<input type="text"/>
	Identify the most common actions based on user interactions.	<input type="text"/>

 Microsoft

Answer:

Explanation:

Capabilities	Answer Area	Capability
<input type="checkbox"/> Process mining <input type="checkbox"/> Task mining	Requirement See the actual steps used to perform a process. Reduce process time by evaluating event data from a system of record. Understand what employees do while performing each task. Identify the most common actions based on user interactions.	<input type="checkbox"/> Process mining <input type="checkbox"/> Process mining <input type="checkbox"/> Task mining <input type="checkbox"/> Task mining

NEW QUESTION # 74

You are designing automation solutions that interact with a desktop application.

You need to select the appropriate UI automation action for each business requirement.

Which automation action should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	UI automation action
Retrieve the state from a checkbox in the desktop application.	<input type="checkbox"/> Get selected checkboxes in window <input type="checkbox"/> Get details of a UI element in window <input type="checkbox"/> Get selected radio button in window <input type="checkbox"/> Extract data from window
Bring the desktop application to the foreground.	<input type="checkbox"/> Focus window <input type="checkbox"/> Get details of window <input type="checkbox"/> Get details of a UI element in window <input type="checkbox"/> Set window state
Suspend a process until a specific window opens.	<input type="checkbox"/> Wait for window <input type="checkbox"/> Wait for window content <input type="checkbox"/> Set window state <input type="checkbox"/> Terminate process

Answer:

Explanation:

Requirement	UI automation action
Retrieve the state from a checkbox in the desktop application.	<input checked="" type="checkbox"/> Get selected checkboxes in window <input type="checkbox"/> Get details of a UI element in window <input type="checkbox"/> Get selected radio button in window <input type="checkbox"/> Extract data from window
Bring the desktop application to the foreground.	<input checked="" type="checkbox"/> Focus window <input type="checkbox"/> Get details of window <input type="checkbox"/> Get details of a UI element in window <input type="checkbox"/> Set window state
Suspend a process until a specific window opens.	<input checked="" type="checkbox"/> Wait for window <input type="checkbox"/> Wait for window content <input type="checkbox"/> Set window state <input type="checkbox"/> Terminate process

Explanation

Answer Area

Requirement

Retrieve the state from a checkbox in the desktop application.

Bring the desktop application to the foreground.

Suspend a process until a specific window opens.

UI automation action

- Get selected checkboxes in window
- Get details of a UI element in window
- Get selected radio button in window
- Extract data from window

- Focus window
- Get details of window
- Get details of a UI element in window
- Set window state

- Wait for window
- Wait for window content
- Set window state
- Terminate process

NEW QUESTION # 75

You are developing a custom connector.

You need to create the definition for the connector.

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Scenario

Define operations that users can perform.

Feature

▼
Code
Action
Policy
Trigger

Define actions that will be invoked by events.

▼
Code
Action
Policy
Trigger

 Change the host URL for specific actions.

▼
Code
Action
Policy
Trigger

Extract data from responses by using regex expressions.

▼
Code
Action
Policy
Trigger

Answer:

Explanation:

Answer Area

Scenario

Define operations that users can perform.

Feature
