## CompTIA 220-1102 Pdf Free, 220-1102 Brain Exam

The client only needs 20-30 hours to learn our 220-1102 learning questions and then they can attend the exam. Most people may devote their main energy and time to their jobs, learning or other important things and can't spare much time to prepare for the 220-1102 Exam. But if clients buy our 220-1102 training materials they can not only do their jobs or learning well but also pass the 220-1102 exam smoothly and easily because they only need to spare little time to learn and prepare for the exam.

CompTIA A+ certification is one of the most sought-after certifications in the IT industry. It validates the candidate's knowledge and skills, making them more valuable to potential employers. CompTIA A+ Certification Exam: Core 2 certification helps IT

professionals to enhance their career prospects and enables them to pursue job opportunities in various IT fields such as networking, cybersecurity, and cloud computing.

## CompTIA A+ Certification Exam: Core 2 Sample Questions (Q122-Q127):

### NEW QUESTION # 122

A technician is setting up a newly built computer. Which of the following is the fastest way for the technician to install Windows 10?

- A. System Restore
- **B. Unattended installation**
- C. In-place upgrade
- D. Factory reset

**Answer: B**

Explanation:

□ Windows 10

The correct answer is D. Unattended installation. An unattended installation is a way of installing Windows 10 without requiring any user input or interaction. It uses a configuration file called answer file that contains the settings and preferences for the installation, such as the product key, language, partition, and network settings.

An unattended installation can be performed by using a bootable USB flash drive or DVD that contains the Windows 10 installation files and the answer file<sup>1</sup>. This is the fastest way for the technician to install Windows 10 on a newly built computer, as it automates the whole process and saves time.

A factory reset is a way of restoring a computer to its original state by deleting all the data and applications and reinstalling the operating system. A factory reset can be performed by using the recovery partition or media that came with the computer, or by using the Reset this PC option in Windows 10 settings<sup>2</sup>. A factory reset is not a way of installing Windows 10 on a newly built computer, as it requires an existing operating system to be present.

A system restore is a way of undoing changes to a computer's system files and settings by using a restore point that was created earlier. A system restore can be performed by using the System Restore option in Windows

10 settings or by using the Advanced Startup Options menu<sup>3</sup>. A system restore is not a way of installing Windows 10 on a newly built computer, as it requires an existing operating system and restore points to be present.

An in-place upgrade is a way of upgrading an existing operating system to a newer version without losing any data or applications.

An in-place upgrade can be performed by using the Windows 10 Media Creation Tool or by running the Setup.exe file from the Windows 10 installation media. An in-place upgrade is not a way of installing Windows 10 on a newly built computer, as it requires an existing operating system to be present.

### NEW QUESTION # 123

A user is unable to log in to the network. The network uses 802.1X with EAP-TLS to authenticate on the wired network. The user has been on an extended leave and has not logged in to the computer in several months. Which of the following is causing the login issue?

- A. Service not started
- B. OS update failure
- C. Profile rebuild needed
- **D. Expired certificate**
- E. Application crash

**Answer: D**

Explanation:

Explanation

EAP-TLS is a method of authentication that uses certificates to establish a secure tunnel between the client and the server<sup>3</sup>. The certificates have a validity period and must be renewed before they expire<sup>1</sup>. If the user has been on an extended leave and has not logged in to the computer in several months, it is possible that the certificate on the client or the server has expired and needs to be renewed<sup>2</sup>. The other options are not directly related to EAP-TLS authentication or 802.1X network access.

### NEW QUESTION # 124

A change advisory board authorized a setting change so a technician is permitted to Implement the change.

The technician successfully implemented the change. Which of the following should be done next?

- A. Document the findings of the sandbox test,
- B. Document the risk level.
- **C. Document the date and time of change**
- D. Document the purpose of the change.

**Answer: C**

Explanation:

The correct answer is A. Document the date and time of change. After implementing a change, the technician should document the date and time of change in the change log or record. This helps to track the change history, monitor the change performance, and identify any issues or incidents related to the change.

Documenting the date and time of change is also a good practice for auditing and compliance purposes.

Documenting the purpose of the change (B) and the risk level © are steps that should be done before implementing the change, not after. These are important information that help to justify, prioritize, and plan the change. The purpose of the change should explain why the change is needed and what benefits it will bring to the organization. The risk level should assess the potential impact and probability of the change causing any problems or disruptions to the business.

Documenting the findings of the sandbox test (D) is also a step that should be done before implementing the change, not after. A sandbox test is a way of testing the change in an isolated environment that mimics the production environment. This helps to verify that the change works as expected and does not cause any errors or conflicts with other systems or processes. The findings of the sandbox test should be documented and reviewed by the change advisory board (CAB) before approving the change for implementation.

#### **NEW QUESTION # 125**

A user in a corporate office reports the inability to connect to any network drives. No other users have reported this issue. Which of the following is the MOST likely reason the user is having this issue?

- A. The file server is offline.
- B. The log-in script failed.
- **C. The user is not connected to the VPN.**
- D. A low battery is preventing the connection.

**Answer: C**

#### **NEW QUESTION # 126**

A user is trying to limit the amount of time their children spend on the internet. Which of the following Windows 10 settings should be enabled to accomplish this objective?

- **A. Family Options**
- B. Network & Internet
- C. Update & Security
- D. Ease of Access
- E. Privacy

**Answer: A**

Explanation:

Windows 10 includes a set of parental controls within the "Family Options" section of the Windows settings. This feature allows parents to manage their children's computing activities, including setting time limits on device use, filtering web content, managing privacy and online safety settings, and viewing activity reports.

Family Options: By enabling and configuring Family Options, the user can set specific times when their children can use the device and access the internet, effectively limiting their overall screen time and internet usage.

Update & Security (B) mainly deals with Windows updates and security features but does not directly provide settings for time management. Ease of Access (C) is focused on accessibility settings and does not include time management options. Network & Internet (D) settings control network connectivity and do not offer parental controls or time limits. Privacy (E) settings manage which

applications can access device features and user data but do not include time management options.

## NEW QUESTION # 127

.....

The top of the lists CompTIA A+ Certification Exam: Core 2 (220-1102) exam practice questions features are free demo download facility, 1 year free updated CompTIA exam questions download facility, availability of CompTIA A+ Certification Exam: Core 2 (220-1102) exam questions in three different formats, affordable price, discounted prices and CompTIA 220-1102 exam passing money back guarantee.
