## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q115-Q120):

### NEW QUESTION # 115

Which of the following SAFe Lean-Agile principles involves delivering a continuous flow of value to customers in the shortest sustainable lead time?

- A. Apply systems thinking
- B. Decentralized decision-making
- **C. Make value flow without interruptions**
- D. Take an economic view

### Answer: C

Explanation:

= The SAFe Lean-Agile principle that involves delivering a continuous flow of value to customers in the shortest sustainable lead time is "Make value flow without interruptions". This principle is based on the Lean concept of optimizing the whole value stream, from concept to cash, by eliminating delays, queues, handoffs, and rework. By applying practices such as limiting work in progress (WIP), reducing batch sizes, managing queue lengths, and implementing continuous integration and continuous delivery (CI/CD), SAFe teams and trains can accelerate the flow of value and feedback, improve quality and reliability, and reduce waste and overhead. ### NEW QUESTION # 116

What are three practices of Extreme Programming (XP)? (Choose three.) You have reached the max number of allowed answers

- A. Pair programming
- B. Deployment automation
- C. Continuous Integration
- D. Behavior-driven development
- E. Test-driven development
- F. Intentional architecture

### Answer: A,C,E

Explanation:

Test-driven development (TDD) is a practice of writing automated tests before writing the production code, and then refactoring the code to make it pass the tests. TDD helps ensure that the code is correct, maintainable, and meets the requirements. Pair programming is a practice of having two programmers work together on the same code, one as the driver who writes the code, and the other as the navigator who reviews the code and provides feedback. Pair programming helps improve the quality of the code, share knowledge, and reduce defects. Continuous Integration (CI) is a practice of integrating and testing the code frequently, usually several times a day, using automated tools. CI helps detect and fix errors early, improve collaboration, and deliver faster. ### NEW QUESTION # 117

Which one of the below is not one of the Core Competencies for Business Agility?

- A. Lean Portfolio Management
- B. Continuous Learning Culture
- C. Continuous Integration
- D. Agile Product Delivery

### Answer: C

### NEW QUESTION # 118

Team A is writing a Story enabling book shoppers to access their shopping cart from any page on the website.

Which of the following examples represents the recommended user voice format for the Story?

- A. As a book shopper, I want access to my shopping cart from any page, so that I can review what I am purchasing
- B. As a book shopper, I want to access my shopping cart from any page
- C. I want to view my shopping cart so I can review what I am purchasing
- D. I am a book shopper that wants to access my shopping cart anywhere on the website

### Answer: A

Explanation:

The recommended user voice format for writing a Story is to use the following template: As a <user role>, I want <goal or desire>, so that <benefit or value>. This format helps to capture the user's perspective, the user's need, and the user's outcome in a clear and

concise way. The user voice format also helps to create a testable and valuable Story that can be prioritized and estimated by the Agile team. Therefore, the best example of the user voice format for the Story enabling book shoppers to access their shopping cart from any page on the website is: As a book shopper, I want access to my shopping cart from any page, so that I can review what I am purchasing. This example specifies the user role (book shopper), the goal or desire (access to shopping cart from any page), and the benefit or value (review what I am purchasing).
