ECCouncil Certified Ethical Hacker Exam (CEHv13) Sample Questions (Q405-Q410):

NEW QUESTION # 405

You have the SOA presented below in your Zone.

Your secondary servers have not been able to contact your primary server to synchronize information.

How long will the secondary servers attempt to contact the primary server before it considers that zone is dead and stops responding to queries?

collegae.edu. SOA, cikkye.edu ipad.college.edu. (200302028 3600 3600 604800 3600)

- A. One month
- B. One day
- C. One hour
- **D. One week**

Answer: D

Explanation:

In an SOA (Start of Authority) record, the fifth value represents the "Expire" interval - the time a secondary DNS server will keep trying to contact the primary server before considering the zone data stale or invalid.

SOA Format:

SOA Primary-NS Hostmaster (Serial Refresh Retry Expire Minimum-TTL)

Given SOA:

(200302028 3600 3600 604800 3600)

* Serial: 200302028

* Refresh: 3600 seconds

* Retry: 3600 seconds

* Expire: 604800 seconds = 7 days = 1 week

* Minimum TTL: 3600

So, if the secondary DNS cannot contact the primary for 604800 seconds (1 week), it will stop serving that zone's data.
