Our SAFe-Practitioner exam questions are of high quality which is carefully prepared by professionals based on the changes in the syllabus and the latest development in practice.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q224-Q229):

NEW QUESTION # 224

Which from the below are typical measures of a cumulative flow diagram?

- A. Throughput
- B. WIP limits
- C. Business value
- D. Lead time

Answer: A,B,D

NEW QUESTION # 225

Which of the following SAFe Core Values involves coaching aspiring developers to grow their skillsets and fill new roles throughout the organization?

- A. Respect for People
- B. Alignment
- C. Built-In Quality
- D. Transparency

Answer: A

Explanation:

Respect for People is one of the four SAFe Core Values that guide the behaviors and actions of everyone participating in a SAFe portfolio. Respect for People means that everyone is valued and deserves respect, regardless of their role, background, or experience. It also means that everyone is empowered to contribute, learn, and grow within the organization. Respect for People involves coaching aspiring developers to grow their skillsets and fill new roles throughout the organization, as well as providing them with opportunities for feedback, recognition, and career development. Respect for People also fosters a culture of trust, collaboration, and psychological safety, where people can express their ideas, opinions, and concerns without fear of judgment or retaliation. References: Core Values - Scaled Agile Framework, Respect for People - Scaled Agile Framework

NEW QUESTION # 226

Which of the following statements describes the balance between emergent design and intentional architecture when building in quality?

- A. It is required for speed of value delivery and Solution Intent
- B. It is required for implementation speed and maturity
- C. It is required for speed of development and maintainability
- D. It is required for backlog speed and designed refinement

Answer: A

Explanation:

The balance between emergent design and intentional architecture when building in quality is required for speed of development and maintainability. Emergent design is the practice of defining and evolving the architecture only as necessary to deliver the next increment of functionality, based on the feedback and learning from the previous increments. Intentional architecture is the practice of defining and implementing some upfront design guidelines and standards that enable the integration and evolution of the solution across multiple teams and domains. Both practices are implemented with enablers, which are technical items that support the development and delivery of features and capabilities. The balance between emergent design and intentional architecture allows the teams and the Agile Release Train (ART) to deliver value faster, with higher quality and lower risk, and to maintain and improve the solution over time¹². The other options are not accurate descriptions of the balance between emergent design and intentional architecture, as they either do not reflect the benefits of both practices, or use terms that are not relevant to the SAFe context. NEW QUESTION # 227

What does the business value assigned to PI objective communicate?

- A. the potential business impact of achieving the objective
- B. the monetary gain of achieving the objective
- C. the cost of achieving the objective
- D. the customer satisfaction of achieving the objective

Answer: A

NEW QUESTION # 228

What is one of the Agile Release Train events?

- A. Backlog refinement
- B. Product Owner sync
- C. Solution Demo
- D. Iteration Retrospective

Answer: C

Explanation:

A Solution Demo is one of the Agile Release Train events. A Solution Demo is a periodic event where the current state of the Solution is evaluated by the relevant stakeholders, including customers and users. The Solution Demo provides an opportunity to inspect and adapt the Solution, and to validate that it meets the Solution Intent and the customer needs. The Solution Demo is typically held at the end of each Program Increment (PI), and may also be held more frequently depending on the Solution context and feedback mechanisms.
