They are relevant to the C_ACDET_2506 Exam standards and are made on the format of the actual C_ACDET_2506 exam.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q10-Q15):

NEW QUESTION # 10

If you add a custom field to the ContractWorkspace class, which other class(es) will that field be added to?

- A. ContractRequest
- B. SalesContractRequest and InternalContractRequest
- **C. InternalContractWorkspace and SalesContractWorkspace**
- D. AbstractContractWorkspace

Answer: C

NEW QUESTION # 11

Which of the following classes are NOT frequently customized in SAP Ariba Strategic Sourcing solutions?

- **A. AbstractDocument**
- B. SourcingProject
- C. ContractWorkspace
- D. ExtendedAddressRep

Answer: A

Explanation:

Among the provided options, AbstractDocument is not frequently customized in SAP Ariba Strategic Sourcing projects. Commonly customized classes include ContractWorkspace, ExtendedAddressRep, and SourcingProject, as they relate directly to contracts, addresses, and sourcing projects—key business objects in the suite. AbstractDocument serves as a more generic superclass and typically does not require direct customization.

NEW QUESTION # 12

During which SAP Activate Methodology phase do you define the customer requirements?

- A. Design

- B. Discover
- **C. Explore**
- D. Define

Answer: C

NEW QUESTION # 13

Which read-only files show the key and English translations for custom field labels and help tips?

- A. The JSON files that can be exported through AML & Translations Upload
- B. The customerResource files that can be exported through ICM
- **C. The customer Resource files that can be exported through AML & Translations Upload**
- D. The JSON files that can be exported through ICM

Answer: C

NEW QUESTION # 14

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- A. The system makes all fields reportable after a system refresh.
- B. All standard fields are reportable by default.
- **C. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting**
- D. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.

Answer: C

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. The recommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 15

.....

We take the leader position in the career of assisting the candidates in passing their C_ACDET_2506 exams and gaining their dreaming certifications. On the way to be successful, a large number of the candidates feel upset or disturbed when they study with the books or other C_ACDET_2506 Exam Materials.
