Examcollection VMCE_v12 Dumps Torrent, Valid VMCE_v12 Test Dumps

If you still worry too much about purchasing professional VMCE_v12 test guide on the internet, I can tell that it is quite normal. Useful certification VMCE_v12 guide materials will help your preparing half work with double results. If you consider about our VMCE_v12 exam questions quality, you can free download the demo of our VMCE_v12 Exam Questions. We have thought of your needs and doubts considerably on the VMCE_v12 study guide. Our certification VMCE_v12 guide materials are collected and compiled by experience experts who have worked in this line more than 10 years.

Veeam Certified Engineer v12 Sample Questions (Q113-Q118):

NEW QUESTION # 113

When a replication job is configured to use the replica mapping feature (no seeding), what will happen during the first run of the job?

- A. The replication job will first restore the VM from the most recent restore point and then start to synchronize the incremental changes from the source infrastructure
- B. The replication job creates a clone of the mapped replica to preserve the original state before synchronizing the changes from the source infrastructure
- C. If a VM within the replication job is not mapped, the job will fail
- D. The replication job calculates the differences between the original and mapped VM; only the incremental changes will be synchronized

Answer: D

Explanation:

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/replica_seeding_hv.html?ver=100

NEW QUESTION # 114

Executive management would like a list of all virtual machines that are not protected by Veeam Backup & Replication. Which

component can provide this information?

- A. Veeam Backup Enterprise Manager
- B. Veeam Backup & Replication Console
- **C. Veeam ONE**
- D. Veeam Service Provider Console

Answer: C

Explanation:

Veeam ONE provides advanced monitoring and reporting features, including reports that identify unprotected virtual machines. It can generate a list of VMs that are not covered by any backup or replication jobs, helping organizations ensure comprehensive data protection.

NEW QUESTION # 115

An administrator needs to back up virtual machines located in Data Center B. The Veeam server is located in Data Center A. Each data center has three proxy servers available to use for the backups. The data centers are connected by limited bandwidth. The repository that will be used for the job is in Data Center B.

Which proxy configuration option will maximize job performance and success?

- A. Select multiple proxies from Data Center A.
- **B. Select multiple proxies from Data Center B.**
- C. Select multiple proxies, at least one from each data center.
- D. Leave the option set to automatic selection.

Answer: B

Explanation:

Selecting multiple proxies located in Data Center B ensures that backup traffic stays local to the source VMs, minimizing bandwidth usage across the limited connection between data centers and maximizing performance and job reliability.

NEW QUESTION # 116

Veeam Agent for Microsoft Windows is installed on a server. A backup job is created on the server. The backup data will be sent to a Veeam Backup & Replication repository. A Veeam administrator wants to add the server to a different backup job. Which protection group would they find the server in?

- A. Unattended
- B. Offline
- C. Untrusted
- **D. Unmanaged**

Answer: D

NEW QUESTION # 117

What can Veeam service providers deploy in Service Provider Console 7.0?

- A. Veeam One
- B. Enterprise plugins
- **C. Veeam Backup for Microsoft 365**
- D. Veeam Backup & Replication

Answer: C

Explanation:

In the Service Provider Console 7.0, Veeam service providers can deploy Veeam Backup for Microsoft 365.

This allows them to offer Microsoft 365 backup and recovery services to their customers, managing the protection of Microsoft 365 data including Exchange Online, SharePoint Online, OneDrive for Business, and Microsoft Teams data.
