

# Quiz 2026 H12-821\_V1.0: HCIP-Datacom-Core Technology V1.0–Efficient Online Training

H12-821\_V1.0 HCIP-Datacom-

Core Technology V1.0 Exam

10 Free Questions with Explanations

What's more, part of that PassCollection H12-821\_V1.0 dumps now are free: <https://drive.google.com/open?id=1T3qHi5XbZvewmHKJDPP4sxEIbrj2u41>

H12-821\_V1.0 study dumps always managed to build an excellent relationship with our users through the mutual respect and attention we provide to everyone. We sincerely hope our H12-821\_V1.0 study dumps will help you to pass the H12-821\_V1.0 Exam in a shortest time, we aimed to help you save more time. Once you purchase our H12-821\_V1.0 study dumps, we will send to your mailbox within 5-10 minutes, if there are some problem, please contact with us.

The HCIP-Datacom-Core Technology V1.0 exam is intended for those who are seeking to enhance their career in the field of data communication. It is an intermediate-level certification exam, meaning that candidates should have a good understanding of the fundamentals of data communication before taking H12-821\_V1.0 exam. H12-821\_V1.0 exam is also suitable for those who are interested in pursuing a career in network engineering or network administration. Passing the exam demonstrates a candidate's commitment to professional development and their ability to work with complex data communication systems.

Huawei H12-821\_V1.0 (HCIP-Datacom-Core Technology V1.0) exam is a certification exam offered by Huawei to test the knowledge and skills of IT professionals in the field of data communication core technology. H12-821\_V1.0 exam is designed for individuals who have experience in the planning, design, implementation, and maintenance of data communication networks.

## H12-821\_V1.0 Testking Exam Questions | H12-821\_V1.0 Latest Test Fee

Our company has worked on the H12-821\_V1.0 study material for more than 10 years, and we are also in the leading position in the industry, we are famous for the quality and honesty. The pass rate of our company is also highly known in the field. If you fail to pass it after buying the H12-821\_V1.0 Exam Dumps, money back will be guaranteed for your lost or you will get another free H12-821\_V1.0 exam dumps. Our company will ensure the fundamental interests of our customers.

To prepare for the Huawei H12-821\_V1.0 Exam, candidates are recommended to have a deep understanding of data communication technologies, as well as experience in designing and deploying data communication networks. They should also have a strong knowledge of Huawei's products and solutions, along with the ability to troubleshoot and resolve network issues.

## Huawei HCIP-Datacom-Core Technology V1.0 Sample Questions (Q276-Q281):

### NEW QUESTION # 276

See the command output of a router below. Which of the following statements is true?

```
<R2>display ospf interface GigabitEthernet 0/0/0 verbose
```

```
OSPF Process 1 with Router ID 10.0.2.2
```

```
Interface: 10.0.12.2 (GigabitEthernet 0/0/0)
```

```
Cost: 1 State: BDR Type: Broadcast MTU: 1500
```

Priority: 1

Designated Router: 10.0.12.1

Backup Designated Router: 10.0.12.2

Timers: Hello 10 , Dead 40 , Poll 120 , Retransmit 5 , Transmit Delay 1

- A. The router ID is 10.0.12.2.
- B. The interface IP address is 10.1.12.1.
- C. The interface cost is 1500.
- **D. This router is a BDR.**

**Answer: D**

Explanation:

The output shows that the router with the IP 10.0.12.2 is the Backup Designated Router (BDR), as indicated in the State: BDR field. The router ID is 10.0.2.2, the interface cost is 1, and the IP address of the interface is 10.0.12.2. Hence, C is the correct answer .

### NEW QUESTION # 277

On an OSPF network, the I bit, M bit, and MS bit in the first DD packet sent by a router are all set to 1.

- A. FALSE
- **B. TRUE**

**Answer: B**

Explanation:

In OSPF, Database Description (DD) packets are used during the database synchronization process. In the first DD packet a router sends during neighbor establishment, three control bits are set:

I bit (Initial)= 1 # This indicates that the DD packet is the first in the sequence.

M bit (More)= 1 # This means more DD packets will follow.

MS bit (Master/Slave)= 1 # Set by the router assuming the master role in the exchange process.

Setting all three bits to 1 is a standard part of the DD exchange initiation.

Reference from Huawei HCIP-Datacom-Core Technology Study Guide:

"In the initial DD packet, the I, M, and MS bits are set to 1 by the master router initiating database exchange." (Chapter: OSPF Operation Mechanism - Section: Neighbor State Machine)

### NEW QUESTION # 278

During daily troubleshooting, engineers may need to check some alarm information of the equipment. Run the terminal command to open the terminal display debugging/log/alarm information function sent by the information center.

**Answer:**

Explanation:

monitor

### NEW QUESTION # 279

Which of the following statements regarding the BGP error display of a router false?

```
<HUAWEI>display bgp error
Error Type      : Peer Error
Date/Time       : 2010-03-22 12:40:39
Peer Address    : 10.1.1.5
Error Info      : Incorrect remote AS
```

- A. The neighbor address of this router is 10.1.1.5.

- B. Error Type indicates that the BGP error is caused by the neighbor relationship error.
- **C. The error may be caused by the incorrect neighbor address.**
- D. The error occurred at 12:40:39 on March 22, 2010.

**Answer: C**

Explanation:

The error indicates "Incorrect remote AS," which refers to a mismatch in the autonomous system (AS) numbers during BGP peer configuration. This issue is unrelated to the neighbor address. The neighbor address (10.1.1.5) and timestamp (2010-03-22 12:40:39) provided in the output are correct, and the error type confirms a neighbor relationship issue .

### NEW QUESTION # 280

Which of the following descriptions about LSA and LSDB are wrong? (Multiple choice)

- **A. The combination of LS type and Link StateID jointly identifies an LSA**
- B. The LS sequence number field is used to detect old and duplicate LSAs
- C. LSA is the smallest unit of LSDB
- **D. The LSage field in the LSA header indicates the remaining lifetime of the LSA**

**Answer: A,D**
