AD0-E725 Study Center & Exam Cram AD0-E725 Pdf

When candidates decide to pass the AD0-E725 exam, the first thing that comes to mind is to look for a study material to prepare for their exam. The most people will consider that choose AD0-E725 question torrent, because it has now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the AD0-E725 Exam, and got their own dream industry certificates. AD0-E725 exam prep has an extensive coverage of test subjects, a large volume of test questions, and an online update program.

Adobe Commerce Developer Expert Sample Questions (Q33-Q38):

NEW QUESTION # 33

A Developer is working on an Adobe Commerce Cloud project and needs to upgrade a Redis service on production to the latest version for improved performance and security.

Which step should the Developer follow to upgrade the installed service version in Adobe Commerce Cloud?

- A. Edit the `services.yaml` file to specify the new service version.
- B. Use the `magento-cloud service:update` command.
- C. Submit a ticket to Adobe support.

Answer: A

NEW QUESTION # 34

A Developer is working on a new controller in admin panel. Per requirements, it must be accessible only for specific admin users. According to best practices, how should the Developer secure access to the new controller?

- A. Implement `isAllowed` method from `AuthorizationInterface` and check the result for a custom access control list (ACL) resource.
- B. Override `_isAllowed` method and check the authorization result for a custom access control list (ACL) resource.
- C. Override `ADMIN_RESOURCE` constant with a value for a custom access control list (ACL) resource.

Answer: C

NEW QUESTION # 35

A Developer is tasked with extending the GraphQL capabilities of a client's Adobe Commerce project by adding custom attributes to the product query.

Which step should the Developer take to correctly implement this GraphQL customization?

- A. Add `aroundGetList` and `afterGetList` plugins to the `ProductRepositoryInterface` to reflect the new attributes.
- B. Add new attributes in the Adobe Commerce admin panel to reflect the additions.
- C. Extend the `ProductInterface` by creating a `schema.graphqls` file in the custom module's `etc` directory.

Answer: C

Explanation:

The correct way to extend GraphQL is to extend the schema via `schema.graphqls`.

Define new fields for `ProductInterface`.

Provide a resolver class to return the attribute values.

B is incorrect: adding attributes in admin does not automatically expose them in GraphQL.
C is incorrect: repository plugins affect service contracts, not GraphQL schema definitions.

Adobe Commerce DevDocs - Extend GraphQL schema

NEW QUESTION # 36

A third-party company wants to integrate into Adobe Commerce by using webhooks; they would like to emulate the webhook endpoint. As part of this process, they will send payload data to a Developer for testing. What format should the payload be as part of the webhook test command?

- A. Plain text
- **B. JSON**
- C. XML

Answer: B

NEW QUESTION # 37

A Developer is working on a new controller in the admin panel. Per requirements, it must be accessible only for specific admin users. According to best practices, how should the Developer secure access to the new controller?

- A. Override `_isAllowed` method and check the authorization result for a custom ACL resource.
- B. Implement `isAllowed` method from `AuthorizationInterface` and check the result for a custom ACL resource.
- **C. Override `ADMIN_RESOURCE` constant with a value for a custom ACL (Access Control List) resource.**

Answer: C

Explanation:

The best practice is to use the `ADMIN_RESOURCE` constant in the controller. This constant defines the ACL resource that controls access to the controller. Magento automatically checks the ACL resource against the current admin user's permissions. A is unnecessary because ACL checking is built-in and tied to `ADMIN_RESOURCE`. C is a legacy method (`_isAllowed`) used in Magento 1; in Magento 2, the constant override is the proper way.
