CDT Exam Prep Questions With 100% Correct Answers 2024

the tissue stop of a custom tray should? - answer✓✓support the tray but not displace the tissue.
after trimming an orthodontic solder joint with stone or bur the next step is to use the -
answer✓✓rubber wheel or point
which type of jaw relationship is used to set a semi-adjustable articulator? - answer✓✓lateral
and protrusive records
pure silver melts at - answer✓✓1761°F
if a gold is 750 fine, what is the percentage of gold it contains? - answer✓✓75%
the depth of a keyway of a stress breaker attachment should be at least.... - answer✓✓twice as
deep as it is wide
triangular ridge runs from _____ to _____ - answer✓✓buccal cusp to central sulcus
the primary purpose of a protrusive check-bite is to... - answer✓✓set the horizontal condylar
path
according to the universal classification, the patients upper right second bicuspid is numbered -
answer✓✓4
the lateral component of the compensating curve is called the - answer✓✓curve of wilson
spot welding depends on - answer✓✓pressure, current and time
what impression material must be poured immediately? - answer✓✓hydrocolloid
porcelain and the alloy used for the framework must have similar coefficients of thermal
expansion to - answer✓✓increase the strength of porcelain to metal bond during firing
which articulator gives a fair simulation of a patients actual mandibular movements because of
its adjustable features? - answer✓✓semi adjustable
an alloy with which specific gravity would be expected to produce the most cast units? a. 18 b.
16 c. 10 d. 8 - answer✓✓s. 8
If a technician mixing an acid solution pours water into acid, what would most likely occur? -
answer✓✓splashing and risk of severe burns

Free PDF Quiz Construction Specifications Institute CDT Construction Documents Technologist First-grade New Exam Questions

Briefly speaking, our CDT training guide gives priority to the quality and service and will bring the clients the brand new experiences and comfortable feelings. For we have engaged in this career for years and we are always trying our best to develop every detail of our CDT study quiz. With our CDT exam questions, you will find the exam is just a piece of cake. What are you still hesitating for?

Hurry to buy our CDT learning engine now!

Construction Specifications Institute Construction Documents Technologist Sample Questions (Q10-Q15):

NEW QUESTION # 10

The dual nature of design includes what two elements?

- **A. Aesthetic and technical**
- B. Site and building
- C. Programming and planning
- D. Innovation and authenticity

Answer: A

Explanation:

CSI's project delivery and CDT materials describe design as having a dual nature:

* An aesthetic (or qualitative/artistic) side - concerned with form, appearance, spatial experience, and how the built environment is perceived and used.

* A technical side - concerned with structural integrity, building systems, code compliance, constructability, performance, and cost.

In the broader project-management literature you've uploaded, the design and construction process is described as blending technical requirements with broader qualitative and organizational goals. For example, the project life cycle discussion notes that each stage involves both technical and managerial activities, reflecting the need to satisfy functional, performance, and experiential objectives simultaneously.

CSI's CDT framework builds on this by emphasizing that:

* The architect/engineer must respond to owner values (aesthetics, image, function) and

* Technical constraints and criteria (codes, standards, performance, budget, schedule).

This is what is commonly summarized in CDT study materials as the "dual nature of design" - aesthetic and technical.

Why the other options do not match CSI's phrasing:

* A. Site and building - Both are important aspects of design, but CSI's dual-nature concept is not expressed as site vs. building.

* C. Programming and planning - These are phases or processes that precede or support design, not the two "natures" of design itself.

* D. Innovation and authenticity - Desirable qualities, but not the canonical CSI pair.

Thus, the correct pair that matches CSI's description of the dual nature of design is Option B - Aesthetic and technical.

CSI-aligned references (no URLs):

* CSI Project Delivery Practice Guide - "The Design Stage" (discussion of design as both artistic /aesthetic and technical/problem-solving).

CSI CDT body of knowledge - conceptual overview of the designer's responsibilities and

NEW QUESTION # 11

How do private bidding practices compare or contrast with public bidding practices?

- **A. The private owner may award a contract to a responsive and responsible bidder other than the lowest.**
- B. The laws and regulations for private bidding are the same as for public bidding.
- C. Private bids may be opened in private, but the results must be published in a reasonable time.
- D. A private owner may waive any informality in the bidding, except for the performance bond.

Answer: A

Explanation:

CSI's project delivery and CDT materials distinguish clearly between public and private procurement:

* Public work (funded and contracted by government entities) is typically governed by statutes and regulations that require:

* Formal advertisement,

* Clearly defined bidding procedures,

* Sealed bids opened publicly at a specified time and place, and

* Award to the lowest responsive and responsible bidder, except where law allows other defined selection methods.

* Private work, by contrast, is not generally bound by these public procurement statutes. CSI explains that private owners have significantly more flexibility, including:

* Not being required to publicly open bids,

* Being able to negotiate with one or more bidders,

* Rejecting any or all bids, and

* Awarding the contract to any responsive and responsible bidder they choose, based on value, qualifications, schedule, or other criteria-not solely lowest price.

Because of this flexibility, CSI emphasizes that a private owner may select a bidder other than the lowest as long as the bidder is responsive (submits a bid per the requirements) and responsible (qualified, capable, and reliable). This matches Option D exactly.

Why the other options are incorrect or misleading:

* A. A private owner may waive any informality in the bidding, except for the performance bond.

While private owners often can waive bid informalities, CSI does not state any universal rule that the performance bond is a special exception in private bidding. Performance bonds are typically part of the contract requirements after award, not a fixed "unwaivable informality" in bid receipt; treatment of bonding is governed by the owner's requirements and any applicable law, not a CSI rule unique to private work.

* B. Private bids may be opened in private, but the results must be published in a reasonable time.

Publication of bid results is a hallmark of public work (transparency and accountability). CSI does not require private owners to publish bid results; private owners may keep them confidential if they wish, unless other obligations apply (e.g., corporate policies).

* C. The laws and regulations for private bidding are the same as for public bidding. CSI specifically distinguishes between public and private owners: public owners are constrained by statutes and regulations, whereas private owners have much more discretion. The laws governing public bidding and private bidding are not the same, and this is a key CDT concept.

Thus, the CSI-consistent distinction is that private owners are free to award the contract to a responsive and responsible bidder who is not the lowest, making Option D the correct choice.

* CSI CDT Body of Knowledge - sections on bidding requirements, "responsive and responsible bidder," and differences between public and private construction procurement.

NEW QUESTION # 12

Which of the following is a scaled view?

- A. Foundation plan
- B. Riser diagram
- C. Isometric
- D. Perspective

Answer: A

NEW QUESTION # 13

Which entity maintains project record documents?

- A. Architect/engineer (A/E)
- B. Contractor
- C. Owner or A/E
- D. Owner

Answer: D

NEW QUESTION # 14

Which construction agreement provision establishes the duration of the work or a specific date when the owner can occupy the project completely or partially for its intended use?

- A. Cutoff date
- B. Scope of work
- C. Date of commencement of the work
- D. Date of substantial completion

Answer: D

NEW QUESTION # 15

PDFVCE offers actual and updated CDT Dumps after seeing the students struggling to prepare quickly for the test. We have made this product after consulting with a lot of professionals so the students can be successful. PDFVCE has hired a team of professionals who work on a daily basis without caring about themselves to update the Construction Specifications Institute CDT practice material.

In recent years, that more and more candidates give their priority to our CDT test cram as the first hand learning tools to preparing the CDT test to a great extent is the highest passing rate of our CDT pass-sure torrent, which almost reaches 98% to 100%, Hereby I promise you that please rest assured to purchase, we will send you the latest and valid CDT actual test dumps files in a minute since we receive your order, It's an unmistakable decision to choose our Construction Specifications Institute CDT exam practice vce as your learning partner during your reviewing process.

New New CDT Exam Questions | Reliable CDT Exam Topics Pdf: Construction Documents Technologist

It's an unmistakable decision to choose our Construction Specifications Institute CDT exam practice vce as your learning partner during your reviewing process, There is no denying that preparing for the exam is a time-consuming as well as energy-consuming process without valid CDT study guide materials, while the paradox is that a majority of the candidates for the exam are workers who don't have enough time to spend on preparing, and the good news for you is that our company is aimed at solving this problem by releasing high passing-rate CDT training materials for all of the workers in this field.
