- B. The system circuit disconnect shall be permanently identified as "Fire Alarm."
- C. Where a circuit breaker is the disconnecting means, a breaker locking device shall be labeled.
- D. The system circuit disconnect shall be permanently identified at the control unit.

正解: A、B、D

- A. Facility evacuation
- **B. Unnecessary response**
- C. Elevator usage
- D. Critical system shutdown

正解: B

解説:

Before performing any inspection or testing activities, it's critical to notify all affected parties, including occupants, central stations, and local authorities (as applicable), to prevent accidental dispatch of emergency services. The reason for this is clearly stated in NFPA 72 (2022 Edition), Section 14.2.3.1, which requires notification of all stakeholders before any test.

NFPA 72:2022 - 14.2.3.1

"Prior to any testing, all persons and facilities receiving alarm, supervisory, or trouble signals, and all building occupants shall be notified to prevent unnecessary response."
