

# PSE-Strata-Pro-24 Latest Practice Questions | Latest PSE-Strata-Pro-24 Mock Test

What's more, part of that ActualtestPDF PSE-Strata-Pro-24 dumps now are free: [https://drive.google.com/open?id=1viCeOQAO7ItsjubECZpaGIm8VtZA\\_FP-](https://drive.google.com/open?id=1viCeOQAO7ItsjubECZpaGIm8VtZA_FP-)

Before the clients purchase our PSE-Strata-Pro-24 study materials, they can have a free trial freely. The clients can log in our company's website and visit the pages of our products. The pages of our products lists many important information about our PSE-Strata-Pro-24 study materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our PSE-Strata-Pro-24 Study Materials and the discounts. You can have a comprehensive understanding of our PSE-Strata-Pro-24 study materials after you see this information. Then you can look at the free demos and try to answer them to see the value of our PSE-Strata-Pro-24 study materials and finally decide to buy them or not.

As what have been demonstrated in the records concerning the pass rate of our PSE-Strata-Pro-24 free demo, our pass rate has kept the historical record of 98% to 99% from the very beginning of their foundation. During these years, our PDF version of our PSE-Strata-Pro-24 study engine stays true to its original purpose to pursue a higher pass rate that has never been attained in the past. And you will be content about our considerate service on our PSE-Strata-Pro-24 training guide. If you have any question, you can just contact us!

**New PSE-Strata-Pro-24 Latest Practice Questions | Pass-Sure Latest PSE-**

## Strata-Pro-24 Mock Test: Palo Alto Networks Systems Engineer Professional - Hardware Firewall

Our PSE-Strata-Pro-24 study materials will be very useful for all people to improve their learning efficiency. If you do all things with efficient, you will have a promotion easily. If you want to spend less time on preparing for your PSE-Strata-Pro-24 exam, if you want to pass your exam and get the certification in a short time, our PSE-Strata-Pro-24 learning braindumps will be your best choice to help you achieve your dream. Don't hesitate, you will be satisfied with our PSE-Strata-Pro-24 exam questions!

### Palo Alto Networks PSE-Strata-Pro-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Network Security Strategy and Best Practices: This section of the exam measures the skills of Security Strategy Specialists and highlights the importance of the Palo Alto Networks five-step Zero Trust methodology. Candidates must understand how to approach and apply the Zero Trust model effectively while emphasizing best practices to ensure robust network security.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Deployment and Evaluation: This section of the exam measures the skills of Deployment Engineers and focuses on identifying the capabilities of Palo Alto Networks NGFWs. Candidates will evaluate features that protect against both known and unknown threats. They will also explain identity management from a deployment perspective and describe the proof of value (PoV) process, which includes assessing the effectiveness of NGFW solutions.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Business Value and Competitive Differentiators: This section of the exam measures the skills of Technical Business Value Analysts and focuses on identifying the value proposition of Palo Alto Networks Next-Generation Firewalls (NGFWs). Candidates will assess the technical business benefits of tools like Panorama and SCM. They will also recognize customer-relevant topics and align them with Palo Alto Networks' best solutions. Additionally, understanding Strata's unique differentiators is a key component of this domain.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Architecture and Planning: This section of the exam measures the skills of Network Architects and emphasizes understanding customer requirements and designing suitable deployment architectures. Candidates must explain Palo Alto Networks' platform networking capabilities in detail and evaluate their suitability for various environments. Handling aspects like system sizing and fine-tuning is also a critical skill assessed in this domain.</li></ul>

### Palo Alto Networks Systems Engineer Professional - Hardware Firewall Sample Questions (Q19-Q24):

#### NEW QUESTION # 19

What is used to stop a DNS-based threat?

- A. Buffer overflow protection
- **B. DNS sinkholing**
- C. DNS proxy
- D. DNS tunneling

**Answer: B**

Explanation:

DNS-based threats, such as DNS tunneling, phishing, or malware command-and-control (C2) activities, are commonly used by attackers to exfiltrate data or establish malicious communications. Palo Alto Networks firewalls provide several mechanisms to address these threats, and the correct method is DNS sinkholing.

\* Why "DNS sinkholing" (Correct Answer D)? DNS sinkholing redirects DNS queries for malicious domains to an internal or non-routable IP address, effectively preventing communication with malicious domains. When a user or endpoint tries to connect to a malicious domain, the sinkhole DNS entry ensures the traffic is blocked or routed to a controlled destination.

\* DNS sinkholing is especially effective for blocking malware trying to contact its C2 server or preventing data exfiltration.

\* Why not "DNS proxy" (Option A)? A DNS proxy is used to forward DNS queries from endpoints to an upstream DNS server.

While it can be part of a network's DNS setup, it does not actively stop DNS- based threats.

\* Why not "Buffer overflow protection" (Option B)? Buffer overflow protection is a method used to prevent memory-related attacks, such as exploiting software vulnerabilities. It is unrelated to DNS- based threat prevention.

\* Why not "DNS tunneling" (Option C)? DNS tunneling is itself a type of DNS-based threat where attackers encode malicious traffic within DNS queries and responses. This option refers to the threat itself, not the method to stop it.

Reference: Palo Alto Networks DNS Security documentation confirms that DNS sinkholing is a key mechanism for stopping DNS-based threats.

### NEW QUESTION # 20

As a team plans for a meeting with a new customer in one week, the account manager prepares to pitch Zero Trust. The notes provided to the systems engineer (SE) in preparation for the meeting read:

"Customer is struggling with security as they move to cloud apps and remote users." What should the SE recommend to the team in preparation for the meeting?

- A. Lead with the account manager pitching Zero Trust with the aim of convincing the customer that the team's approach meets their needs.
- B. Guide the account manager into recommending Prisma SASE at the customer meeting to solve the issues raised.
- C. Lead with a product demonstration of GlobalProtect connecting to an NGFW and Prisma Access, and have SaaS security enabled.
- D. Design discovery questions to validate customer challenges with identity, devices, data, and access for applications and remote users.

**Answer: D**

Explanation:

When preparing for a customer meeting, it's important to understand their specific challenges and align solutions accordingly. The notes suggest that the customer is facing difficulties securing their cloud apps and remote users, which are core areas addressed by Palo Alto Networks' Zero Trust and SASE solutions.

However, jumping directly into a pitch or product demonstration without validating the customer's specific challenges may fail to build trust or fully address their needs.

\* Option A: Leading with a pre-structured pitch about Zero Trust principles may not resonate with the customer if their challenges are not fully understood first. The team needs to gather insights into the customer's security pain points before presenting a solution.

\* Option B (Correct): Discovery questions are a critical step in the sales process, especially when addressing complex topics like Zero Trust. By designing targeted questions about the customer's challenges with identity, devices, data, and access, the SE can identify specific pain points. These insights can then be used to tailor a Zero Trust strategy that directly addresses the customer's concerns.

This approach ensures the meeting is customer-focused and demonstrates that the SE understands their unique needs.

\* Option C: While a product demonstration of GlobalProtect, Prisma Access, and SaaS security is valuable, it should come after discovery. Presenting products prematurely may seem like a generic sales pitch and could fail to address the customer's actual challenges.

\* Option D: Prisma SASE is an excellent solution for addressing cloud security and remote user challenges, but recommending it without first understanding the customer's specific needs may undermine trust. This step should follow after discovery and validation of the customer's pain points.

Examples of Discovery Questions:

- \* What are your primary security challenges with remote users and cloud applications?
- \* Are you currently able to enforce consistent security policies across your hybrid environment?
- \* How do you handle identity verification and access control for remote users?
- \* What level of visibility do you have into traffic to and from your cloud applications?

### NEW QUESTION # 21

A customer asks a systems engineer (SE) how Palo Alto Networks can claim it does not lose throughput performance as more Cloud-Delivered Security Services (CDSS) subscriptions are enabled on the firewall.

Which two concepts should the SE explain to address the customer's concern? (Choose two.)

- A. Advanced Routing Engine

- B. Parallel Processing
- C. Management Data Plane Separation
- D. Single Pass Architecture

**Answer: C,D**

Explanation:

- \* Single Pass Architecture (Answer C):
  - \* Palo Alto Networks firewalls use Single Pass Architecture, meaning the firewall processes traffic once for all enabled security services.
  - \* This avoids duplicating inspection processes for multiple services like Threat Prevention, URL Filtering, and WildFire.
  - \* With a single traffic inspection pass, the firewall applies all security policies without degrading performance, even as additional CDSS subscriptions are enabled.
  - \* Management Data Plane Separation (Answer D):
  - \* The Management Plane and Data Plane are separated on Palo Alto Networks firewalls.
  - \* The Management Plane handles configuration, logging, and other administrative tasks, while the Data Plane focuses solely on processing and forwarding traffic.
  - \* This architectural design ensures that enabling additional Cloud-Delivered Security Services does not impact throughput or compromise traffic handling efficiency.
  - \* Why Not Parallel Processing (Answer A):
  - \* While Parallel Processing is beneficial, it is not the main factor in maintaining consistent throughput as more services are enabled. The Single Pass Architecture is the key innovation here.
  - \* Why Not Advanced Routing Engine (Answer B):
  - \* The Advanced Routing Engine is not directly related to maintaining throughput when enabling CDSS subscriptions. It is more applicable to routing protocols and traffic engineering.

## NEW QUESTION # 22

Which two statements clarify the functionality and purchase options for Palo Alto Networks AI Ops for NGFW? (Choose two.)

- A. It is offered in two license tiers: a free version and a premium version.
- B. It forwards log data to Advanced WildFire to anticipate, prevent, or identify issues, and it uses machine learning (ML) to refine and adapt to the process.
- C. It is offered in two license tiers: a commercial edition and an enterprise edition.
- D. It uses telemetry data to forecast, preempt, or identify issues, and it uses machine learning (ML) to adjust and enhance the process.

**Answer: A,D**

Explanation:

Palo Alto Networks AI Ops for NGFW is a cloud-delivered service that leverages telemetry data and machine learning (ML) to provide proactive operational insights, best practice recommendations, and issue prevention.

- \* Why "It is offered in two license tiers: a free version and a premium version" (Correct Answer B)? AI Ops for NGFW is available in two tiers:
- \* Free Tier: Provides basic operational insights and best practices at no additional cost.
- \* Premium Tier: Offers advanced capabilities, such as AI-driven forecasts, proactive issue prevention, and enhanced ML-based recommendations.
- \* Why "It uses telemetry data to forecast, preempt, or identify issues, and it uses machine learning (ML) to adjust and enhance the process" (Correct Answer C)? AI Ops uses telemetry data from NGFWs to analyze operational trends, forecast potential problems, and recommend solutions before issues arise. ML continuously refines these insights by learning from real-world data, enhancing accuracy and effectiveness over time.
- \* Why not "It is offered in two license tiers: a commercial edition and an enterprise edition" (Option A)? This is incorrect because the licensing model for AI Ops is based on "free" and "premium" tiers, not "commercial" and "enterprise" editions.
- \* Why not "It forwards log data to Advanced WildFire to anticipate, prevent, or identify issues, and it uses machine learning (ML) to refine and adapt to the process" (Option D)? AI Ops does not rely on Advanced WildFire for its operation. Instead, it uses telemetry data directly from the NGFWs to perform operational and security analysis.

### NEW QUESTION # 23

The PAN-OS User-ID integrated agent is included with PAN-OS software and comes in which two forms?  
(Choose two.)

- A. Integrated agent
- B. Cloud Identity Engine (CIE)
- C. Windows-based agent
- D. GlobalProtect agent

**Answer: A,C**

Explanation:

User-ID is a feature in PAN-OS that maps IP addresses to usernames by integrating with various directory services (e.g., Active Directory). User-ID can be implemented through agents provided by Palo Alto Networks. Here's how each option applies:

\* Option A: Integrated agent

\* The integrated User-ID agent is built into PAN-OS and does not require an external agent installation. It is configured directly on the firewall and integrates with directory services to retrieve user information.

\* This is correct.

\* Option B: GlobalProtect agent

\* GlobalProtect is Palo Alto Networks' VPN solution and does not function as a User-ID agent.

While it can be used to authenticate users and provide visibility, it is not categorized as a User-ID agent.

\* This is incorrect.

\* Option C: Windows-based agent

\* The Windows-based User-ID agent is a standalone agent installed on a Windows server. It collects user mapping information from directory services and sends it to the firewall.

\* This is correct.

\* Option D: Cloud Identity Engine (CIE)

\* The Cloud Identity Engine provides identity services in a cloud-native manner but is not a User-ID agent. It synchronizes with identity providers like Azure AD and Okta.

\* This is incorrect.

References:

\* Palo Alto Networks documentation on User-ID

\* Knowledge Base article on User-ID Agent Options

### NEW QUESTION # 24

.....

To help candidates study and practice the PSE-Strata-Pro-24 exam questions more interesting and enjoyable, we have designed three different versions of the PSE-Strata-Pro-24 test engine that provides you a number of practice ways on the exam questions and answers: the PDF, Software and APP online. The PDF version can be printable. And the Software version can simulate the exam and apply in Windows system. The APP online version of the PSE-Strata-Pro-24 training guide can apply to all kinds of the electronic devices, such as IPAD, phone, laptop and so on.
