ASIS Physical Security Professional Exam 認定 ASIS-PSP 試験問題 (Q122-Q127):

質問 # 122

When developing a request for proposal (RFP), a specification that requires bidders to satisfy overall system effectiveness measure is referred to as:

- A. Results-based
- B. Cost-based
- C. Feature-based
- **D. Performance-based**

正解: D

解説:

A performance-based specification defines what the system must achieve (e.g., detection rate, response time), without specifying how to achieve it. This allows vendors flexibility in choosing technologies that meet required outcomes.

* B (Feature-based) and C (Results-based) are loosely defined or incorrect terms in procurement standards.

* D (Cost-based) focuses on budget, not system performance.

質問 # 123

What are used only for handling and storing high-value cargo?

- **A. Exclusion areas**
- B. Limited areas
- C. None of the above
- D. Multiple areas

正解: A

質問 # 124

What is the result of a jurisdiction either using common law, which was adopted from English traditions, or passing specific legislation called statutory law?

- **A. Case law**
- B. Offended suit

- C. Criminal law
- D. Constitution law

正解: A

解説:

Case law is the result of judicial decisions and precedents established through court interpretations of existing laws, whether based on common law (historical precedents from English law) or statutory law (laws passed by legislatures). It forms part of the legal framework in many jurisdictions and evolves through court rulings.

Criminal law (A) defines offenses and penalties.

Constitution law (D) governs foundational legal principles.

Offended suit (B) is not a recognized legal term.

質問 # 125

The classic triangle frequently referred to in describing the nature of fire consists of:

- A. heat, smoke, oxygen
- B. heat, light, oxygen
- C. heat, fuel, oxygen
- D. heat, carbon dioxide, oxygen

正解: C

解説:

The classic "fire triangle" describes the three elements necessary for fire to occur:

Heat - to raise material to ignition temperature

Fuel - combustible material

Oxygen - typically from the air, to sustain combustion

Removing any one of these three elements will prevent or extinguish a fire.

質問 # 126

Premeditated, politically motivated violence perpetrated against noncombatant targets by sub-national groups or clandestine agents, usually intended to influence an audience is called:

- A. Theft
- B. Terrorism
- C. Violence
- D. Criminal approach

正解: B

解説:

This definition matches the U.S. Department of State and ASIS definitions of terrorism. It highlights the political and psychological components of terrorism, including the targeting of civilians and the intent to instill fear or send a political message.
