We understand your itching desire of the exam. Do not be bemused about the exam. We will satisfy your aspiring goals. Our FCSS\_SDW\_AR-7.4 real questions are high efficient which can help you pass the exam during a week. We just contain all-important points of knowledge into our FCSS\_SDW\_AR-7.4 latest material. And we keep ameliorate our FCSS\_SDW\_AR-7.4 latest material according to requirements of FCSS\_SDW\_AR-7.4 Exam. It is our obligation to offer help for your trust and preference. Besides, you can have an experimental look of demos and get more information of FCSS\_SDW\_AR-7.4 real questions. The customer-service staff will be with you all the time to smooth your acquaintance of our FCSS\_SDW\_AR-7.4 latest material.

## Fortinet FCSS\_SDW\_AR-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Configure Performances SLAs: Designed for network administrators, this part focuses on setting up performance Service Level Agreements (SLAs) within SD-WAN environments. Candidates must show proficiency in defining criteria to monitor and maintain network performance and reliability.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Centralized Management: This domain evaluates network administrators' competence in deploying and managing SD-WAN configurations centrally using FortiManager. It includes tasks such as implementing branch configurations and utilizing overlay templates to streamline network management.</li></ul>

Topic 3	<ul style="list-style-type: none"><li>• Rules and Routing: Targeted at network engineers, this section assesses the ability to configure SD-WAN rules and routing policies. Candidates will be tested on managing traffic flow and prioritization across the SD-WAN infrastructure.</li></ul>

## **Fantastic FCSS\_SDW\_AR-7.4 Valid Test Preparation to Obtain Fortinet Certification**

Revised and updated according to the syllabus changes and all the latest developments in theory and practice, our FCSS\_SDW\_AR-7.4 dumps are highly relevant to what you actually need to get through the certifications tests. Moreover they impart you information in the format of FCSS\_SDW\_AR-7.4 questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge but also find the opportunity to practice real exam scenario. For consolidation of your learning, our FCSS\_SDW\_AR-7.4 Dumps PDF file also provide you sets of practice questions and answers. Doing them again and again, you enrich your knowledge and maximize chances of an outstanding exam success.

### **Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q68-Q73):**

#### **NEW QUESTION # 68**

Refer to the exhibits.

### IPsec template for Branch\_IPsec\_1

<input type="checkbox"/>	Name ⇅	Type ⇅	Outgoing Interface ⇅
<input type="checkbox"/>	HUB1-VPN1	Static	\$(ISP1)

### IPsec template for Branch\_IPsec\_2

<input type="checkbox"/>	Name ⇅	Type ⇅	Outgoing Interface ⇅
<input type="checkbox"/>	HUB1-VPN2	Static	\$(ISP2)

### Error message in FortiManager

The exhibits show two IPsec templates to define Branch IPsec 1 and Branch\_IPsec\_2. Each template defines a VPN tunnel. The error message that FortiManager displayed when the administrator tried to assign the second template to the FortiGate device is also shown.

Which statement best describes the cause of the issue?

- A. You can assign only one template with a tunnel type of static to each FortiGate device.
- B. You should use the same outgoing interface of both templates.
- C. You should review the branch1\_fgt configuration for configured tunnels in the rootVDM.
- **D. You can assign only one IPsec template to each FortiGate device.**

**Answer: D**

### NEW QUESTION # 69

When you use the command `diagnose sys session list`, how do you identify the sessions that correspond to traffic steered according to SD-WAN rules?

- **A. You identify sessions steered according to SD-WAN rules with the data `3dwan_service_id`.**
- B. You identify sessions steered according to SD-WAN rules with the flag `vw1`.
- C. You cannot identify SD-WAN sessions. You must use the `sdwan.session filter`.
- D. You identify sessions steered according to SD-WAN rules with the data `vw1_mbr_seq`.

Answer: A

NEW QUESTION # 70

Refer to the exhibits.

The screenshot shows a Fortinet CLI interface with the following sections:

- Ping result:** A successful ping to facebook.com from 10.0.1.101. The output shows four ICMP echo requests, each receiving 64 bytes of data from the edge-star-mini-shv-01-dfw5.facebook.com server. Response times range from 32.5 ms to 33.4 ms.
- Diagnose output:** The command 'branch1\_fgt # diagnose firewall proute list' displays several firewall rules. Rule id=2130903041 (vwl\_service=1) has path(2) with oif=3(port1) and oif=4(port2). Rule id=2130903043 (vwl\_service=3) has path(6) with oif=20(HUB1-VPN1), oif=21(HUB1-VPN2), oif=22(HUB1-VPN3), oif=23(HUB2-VPN1), oif=24(HUB2-VPN2), and oif=25(HUB2-VPN3). Rule id=2130903045 (vwl\_service=5) has path(3) with oif=6(port4), oif=4(port2), and oif=3(port1).
- Diagnose output:** The command 'branch1\_fgt # diagnose sys sdwan internet-service-app-ctrl-list' shows a list of application control entries for IPv4 in the kernel. The entries include: Facebook(15832 23) IP=157.240.19.35; Addicting.Games(30156 8) IP=172.64.80.1; Microsoft.Portals(41469 28) IP=184.27.181.201; LinkedIn(16331 23) IP=13.107.42.14; MSN.Game(16135 8) IP=13.107.246.35; Salesforce(16920 29) IP=23.222.17.73; Salesforce(16920 29) IP=23.222.17.76; and Facebook(15832 23) IP=31.13.80.36.

You connect to a device behind a branch FortiGate device and initiate a ping test. The device is part of the LAN subnet and its IP address is 10.0.1.101.

Based on the exhibits, which interface uses branch1\_fgt to steer the test traffic?

- A. HUB1-VPN1
- B. port4
- C. port2
- D. port1

Answer: C

NEW QUESTION # 71

Which three characteristics apply to provisioning templates available on FortiManager? (Choose three.)

- A. A template group can include a system template and an SD-WAN template.
- B. CLI templates are applied in order, from top to bottom
- C. A CLI template group can contain CLI templates of both types.
- D. A CLI template can be of type CLI script or Perl script.

- E. Each template group can contain up to three IPsec tunnel templates.

**Answer: A,B,C**

Explanation:

The provisioning templates in FortiManager are designed for flexible, scalable configuration of large SD-WAN deployments. The official documentation explains:

"Template groups can consist of both system and SD-WAN templates, providing a way to apply consistent settings across multiple devices. CLI templates are evaluated and executed in order from top to bottom within the template group, which is crucial for managing dependencies. Furthermore, CLI template groups can contain both regular CLI templates and advanced (Perl-script-based) templates, allowing complex or conditional configuration logic." This modular design streamlines large deployments by separating system, SD-WAN, and CLI logic into reusable building blocks.

### NEW QUESTION # 72

When a customer delegate the installation and management of its SD-WAN infrastructure to an MSSP, the MSSP usually keeps the hub within its infrastructure for ease of management and to share costly resources.

In which two situations will the MSSP install the hub in customer premises? (Choose two.)

- A. The customer requires SIA with centralized breakout.
- **B. The majority of the branch traffic is directed to a corporate data center.**
- **C. The administrator expects a large volume of traffic between the branches.**
- D. The customer expects a large amount of VoIP traffic.

**Answer: B,C**
