CIS-SPM Probesfragen & CIS-SPM Praxisprüfung

Mit ServiceNow CIS-SPM Zertifikat können Sie Ihre Berufsaussichten verbessern und viele neuen Chancen erschließen. PrüfungFrage ist eine geeignete Website für die Kandidaten, die an der ServiceNow CIS-SPM Zertifizierungsprüfung teilnehmen. Es wird nicht nur alle Informationen zur ServiceNow CIS-SPM Zertifizierungsprüfung, sondern Ihnen auch eine gute Lernchance bieten. PrüfungFrage wird Ihnen helfen, die ServiceNow CIS-SPM Zertifizierungsprüfung ganz einfach zu bestehen.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management CIS-SPM Prüfungsfragen mit Lösungen (Q109-Q114):

109. Frage

Which role can configure the parameters of the demand workbench that is provided with the base system?

- A. All roles.
- B. it_project_manager.
- C. it_pps_admin.
- D. business_stakeholder.

Antwort: C

Begründung:

Explanation

According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is it_pps_admin. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The business_stakeholder role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The it_project_manager role grants access to the Project Portfolio Management application and allows the user to create and update projects.

110. Frage

Which options are available in the 'Effort type' field on the Resource Assignments form, when requesting resources?
Choose 3 answers

- A. Weekly on weekdays
- B. Person days
- C. FTE (Full Time Equivalent)
- D. Hours
- E. Group

Antwort: A,B,C

111. Frage

Is resource capacity derived from FTE or schedules?

- A. Only Schedules.
- B. Neither.
- C. Only FTE.
- D. Both.

Antwort: A

Begründung:

Resource capacity is the total number of hours that a resource or a group of resources is available for work in a given time period. According to the Product Documentation for ServiceNow, resource capacity is derived from the user or group schedule, which defines the working hours and days for each resource. The group capacity is rolled up from the schedules of all the members. Note: Capacity is not derived from FTE, but from schedules. Both FTE and schedules must be in synchronization with each other. FTE is a measure of how much work a resource can perform in a standard work week, and it is used to calculate the resource demand and allocation.

112. Frage

What plugin must be installed to use Capacity Planning in a portfolio?

- A. Time Card Management
- B. Portfolio Planning
- C. Skills Management
- D. Collaborative Work Management

Antwort: B

113. Frage

To set up a group for selection in a resource plan, the group record needs to include which role?

- A. pps_resource
- B. resource_manager
- C. itil
- D. it_project_user

Antwort: A

Begründung:

Explanation

According to the Assigning Resource Roles document, to set up a group for selection in a resource plan, the group record needs to include the pps_resource role. This role grants access to the Resource Management application and allows the group members to view and update their resource allocations. The other options are not correct, as they are not required for a group to be selected in a resource plan. The it_project_user role grants access to the Project Portfolio Management application and allows the user to create
