## Microsoft AI Business Professional Sample Questions (Q33-Q38):

### NEW QUESTION # 33

You are a business user who uses Microsoft 365 apps and services, including Microsoft Teams. You have a work account. You want to use Microsoft 365 Copilot to help with meetings.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

### NEW QUESTION # 34

You are creating a prompt in Microsoft 365 Copilot to get information about a proposal. You need to ensure that the response is grounded in the proposal's information.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Add a specific goal that you want Copilot to accomplish.
- **B. Reference the proposal content in the prompt.**
- C. Add context about the intended audience.

- D. Instruct Copilot to rely on its training data to infer proposal details.

**Answer: B**

Explanation:

According to Microsoft AI Business Professional guidance for Microsoft 365 Copilot, grounding a response means ensuring the AI generates output based on specific, authoritative content rather than relying on generalized training data. When working with enterprise documents such as proposals, grounding is achieved by explicitly referencing the source material within the prompt.

Option C is correct because referencing the proposal content directs Copilot to use that specific document as the primary context for generating the response. Microsoft documentation emphasizes that effective prompts should include clear context and explicit references to relevant files, meetings, emails, or documents stored in Microsoft 365. This reduces hallucinations and ensures factual alignment with organizational data.

Option A is incorrect because relying on training data increases the risk of inaccurate or fabricated information. Options B and D improve prompt clarity but do not guarantee grounding in the proposal itself.

Therefore, explicitly referencing the proposal content is the most reliable and best practice method for ensuring grounded, accurate responses in Microsoft 365 Copilot.

### NEW QUESTION # 35

You are using Microsoft 365 Copilot to enhance your productivity in Microsoft Word.

Which two tasks can you achieve by using Copilot in Word?

- A. Generate a summary of the key points in your document.
- B. Insert a custom watermark that has specific text and formatting.
- C. Customize the page margins to match your company's document standards.
- D. Insert a table of contents based on the headings in your document.

**Answer: A,D**

Explanation:

Copilot in Word assists with content generation, summarization, rewriting, and structural organization. It can analyze document headings and insert a table of contents based on structured heading styles, supporting document navigation. It can also generate summaries of key points, which aligns directly with generative AI text analysis capabilities.

Custom watermark formatting and precise page margin configuration are traditional Word formatting functions and are not core generative AI capabilities of Copilot.

Therefore, the correct answers are A and C.

### NEW QUESTION # 36

Select the answer that correctly completes the sentence.

☐

**Answer:**

Explanation:

☐

### NEW QUESTION # 37

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.
