## NCLEX-RN資格模擬、NCLEX-RN試験資料

貴重な時間を無駄にすることを心配する必要はありませんが、NCLEX-RN認定を取得することに失敗します。多くの人が教材を使用しており、試験の合格率は99%です。これは、教材で学習している限り、間違いなくNCLEX-RN試験に合格することを意味します。何らかの問題が発生し、NCLEX-RN試験にNational Council Licensure Examination(NCLEX-RN)合格しなかった場合、全額返金されます。当社NCLEXの誠実さは、製品の品質に起因しています。試験の学習資料の1年間の無料アップデートを提供します。さあ、決心してNCLEX-RN試験の急流を手に入れましょう！

NCLEX-RN試験は、安全で効果的なケア環境、健康促進と維持、心理社会的整合性、生理的整合性の4つの主要カテゴリに分かれています。それぞれのカテゴリは、感染対策、薬理学、患者教育などのトピックを含むサブカテゴリにさらに分かれています。この試験は、これらのトピックに関する個人の知識だけでなく、臨床設定でこの知識を適用する能力を評価するために設計されています。

NCLEX-RN（米国登録看護師試験）は、米国のすべての看護師が看護師免許を取得するために合格しなければならない標準化された試験です。この試験は、国家看護州監督委員会（NCSBN）によって開発・実施され、安全で効果的な看護実践に必要な知識とスキルをテストするように設計されています。

## NCLEX National Council Licensure Examination(NCLEX-RN)認定 NCLEX-RN 試験問題 (Q679-Q684):

質問 #679

A client is being discharged from the hospital tomorrow following a colon resection with a left colostomy. The nurse knows that the client understands the discharge teaching about care of her colostomy when she says:

- A. "My stool will be soft like paste."
- B. **"My stoma should be red and slightly raised."**
- C. "The skin around my stoma may become irritated from the enzymes in my stool."
- D. "I know that I am not supposed to irrigate my colostomy."

正解: B

解説:

(A) A left colostomy indicates an ascending colon resection. This type of colostomy can be irrigated. (B) The stool from an ascending colon resection should be formed. (C) The healthy stoma should be red and slightly raised. If it begins to turn dark or blue, the client should see the physician immediately. (D) The stool in the ascending colon does not usually have many enzymes in it. Stool from an ileostomy has more enzymes and is more irritating to the skin.

#### 質問 # 680

A 30-year-old client has just been treated in the ER for bruises and abrasions to her face and a broken arm from domestic violence, which has been increasing in frequency and intensity over the last few months. The nurse assesses her as being very anxious, fearful, bewildered, and feeling helpless as she states, "I don't know what to do, I'm afraid to go home." The best response by the nurse to the client would be:

- A. "I wouldn't want to go home either; call a friend who could help you."
- B. "Did you do something that could have made him so angry?"
- C. **"Let's talk about people and resources available to you so that you don't have to go home."**
- D. "I'll call the police and they will take care of him, and you can go home and get some rest."

正解: C

解説:

Explanation

(A) A person in crisis needs support, assistance, and direction from a caregiver rather than just an instruction. (B) A battered person may feel guilt and think that they cause the abuser's behavior; however, the abuser has the problem and goes through phases of violence. (C) The nurse should provide support and guidance to the client in crisis by offering alternatives and assist in referrals. (D) Focusing on help from law enforcement may be a very temporary solution, because the victim may be fearful of pressing charges. This answer does not address the crisis of going home.

#### 質問 # 681

A 6-month-old infant has developmental delays. His weight falls below the 5th percentile when plotted on a growth chart. A diagnosis of failure to thrive is made. What behaviors might indicate the possibility of maternal deprivation?

- A. Responsive to touch, wants to be held
- B. Maintains eye-to-eye contact
- C. Finicky eater, easily pacified, cuddly
- D. **Uncomforted by touch, refuses bottle**

正解: D

解説:

Section: Questions Set B

Explanation:

(A) Normal infant attachment behaviors include responding to touch and wanting to be held. (B) Maternal deprivation behaviors include poor feeding, stiffening and refusal to eat, and inconsistencies in responsiveness. (C) Attachment behavior includes maintaining eye contact. (D) Maternal deprivation behaviors include displeasure with touch and physical contact.

#### 質問 # 682

A 64-year-old client is admitted to the hospital with benign prostatic hypertrophy (BPH). He has a history of adult-onset diabetes and hypertension and is scheduled to undergo a resection of the prostate. When recording his health history, the nurse asks about his

chief complaint. The most serious symptom that may accompany BPH is:

- A. Acute urinary retention
- B. Hesitancy in starting urination
- C. Decreased force of the urinary stream
- D. Increased frequency of urination

正解: A

解説:

(A) Acute urinary retention requires urgent medical attention. If measures such as a warm tub bath or warm tea do not occur after 6 hours, the client should go to the ED for catheterization. (B, C, D) This choice is a symptom of BPH, but it is not serious or life threatening.

### 質問 # 683

As a nurse in the emergency room, you receive an outside call from an elderly woman who states she has just been raped. She states, "I know I must come to the hospital, but what do I do next?" You advise her to call the police, then come to the hospital emergency room. What action by the nurse would indicate an understanding of the examination process once the victim enters the emergency room?

- A. Inform the victim not to wash, change clothes, douche, brush teeth, or eat or drink anything.
- B. Do not leave the victim alone to collect her thoughts.
- C. Inform the victim to bring insurance information with her to the hospital so she can be properly cared for.
- D. Phone a rape counselor to begin working with the victim as soon as she enters the hospital.

正解: A

解説:

Explanation/Reference:

Explanation:

(A) Providing the victim with these instructions will aid in the determination of physical evidence of rape.

Victims frequently feel "dirty" after rape, and their first instinct is to take care of personal hygiene before facing anyone. (B) This action is of lesser importance at this time. (C) Although this is a nursing measure appropriate in this situation, contacting a counselor can be done once the victim enters the hospital.

Frequently victims call but do not follow up with the visit. (D) Once the victim enters the emergency room, it is important not to leave her alone.

### 質問 # 684
