

# 100% Success Guarantee by Using CrowdStrike IDP Exam Questions and Answers

P.S. Free 2026 CrowdStrike IDP dumps are available on Google Drive shared by BraindumpStudy: <https://drive.google.com/open?id=1D0z8saba65sDViytGjXEQ3Qw4cRZNcDr>

CrowdStrike IDP certifications are thought to be the best way to get good jobs in the high-demanding market. There is a large range of IDP certifications that can help you improve your professional worth and make your dreams come true. Our CrowdStrike Certified Identity Specialist(CCIS) Exam IDP Certification Practice materials provide you with a wonderful opportunity to get your dream certification with confidence and ensure your success by your first attempt.

The CrowdStrike IDP certification differentiates you from other professionals in the market. Success in the CrowdStrike IDP exam shows that you have demonstrated dedication to understanding and advancing in your profession. Cracking the CrowdStrike IDP test gives you an edge which is particularly essential in today's challenging market of information technology. If you are planning to get through the test, you must study from reliable sources for CrowdStrike Certified Identity Specialist(CCIS) Exam IDP Exam Preparation. BraindumpStudy real CrowdStrike IDP exam dumps are enough to clear the IDP certification test easily on the first attempt. This is because BraindumpStudy CrowdStrike IDP PDF Questions and practice test is designed after a lot of research and hard work carried out by experts.

## Practice IDP Mock, Pass4sure IDP Pass Guide

Now the CrowdStrike Certified Identity Specialist(CCIS) Exam IDP exam dumps have become the first choice of IDP exam candidates. With the top-notch and updated CrowdStrike IDP test questions you can ace your CrowdStrike Certified Identity Specialist(CCIS) Exam IDP exam success journey. The thousands of CrowdStrike IDP Certification Exam candidates have passed their dream CrowdStrike IDP certification and they all used the valid and real CrowdStrike Certified Identity Specialist(CCIS) Exam IDP exam questions. You can also trust CrowdStrike IDP pdf questions and practice tests.

## CrowdStrike IDP Exam Syllabus Topics:

| Topic | Details |
|-------|---------|
|-------|---------|

|          |   |
|----------|---|
| Topic 1  | <ul style="list-style-type: none"> <li>• Identity Protection Tenets: Examines Falcon Identity Protection's architecture, domain traffic inspection, EDR complementation, human vulnerability protection, log-free detections, and identity-based attack mitigation.</li> </ul>      |
| Topic 2  | <ul style="list-style-type: none"> <li>• User Assessment: Examines user attributes, differences between users</li> <li>• endpoints</li> <li>• entities, risk baselining, risky account types, elevated privileges, watchlists, and honeypot accounts.</li> </ul>                    |
| Topic 3  | <ul style="list-style-type: none"> <li>• Configuration and Connectors: Addresses domain controller monitoring, subnet management, risk settings, MFA and IDaaS connectors, authentication traffic inspection, and country-based lists.</li> </ul>                                   |
| Topic 4  | <ul style="list-style-type: none"> <li>• Falcon Identity Protection Fundamentals: Introduces the four menu categories (monitor, enforce, explore, configure), subscription differences between ITD and ITP, user roles, permissions, and threat mitigation capabilities.</li> </ul> |
| Topic 5  | <ul style="list-style-type: none"> <li>• Multifactor Authentication (MFA) and Identity-as-a-service (IDaaS) Configuration Basics: Focuses on accessing and configuring MFA and IDaaS connectors, configuration fields, and enabling third-party MFA integration.</li> </ul>         |
| Topic 6  | <ul style="list-style-type: none"> <li>• Risk Assessment: Covers entity risk categorization, risk and event analysis dashboards, filtering, user risk reduction, custom insights versus reports, and export scheduling.</li> </ul>  |
| Topic 7  | <ul style="list-style-type: none"> <li>• Zero Trust Architecture: Covers NIST SP 800-207 framework, Zero Trust principles, Falcon's implementation, differences from traditional security models, use cases, and Zero Trust Assessment score calculation.</li> </ul>                |
| Topic 8  | <ul style="list-style-type: none"> <li>• Falcon Fusion SOAR for Identity Protection: Explores SOAR workflow automation including triggers, conditions, actions, creating custom</li> <li>• templated</li> <li>• scheduled workflows, branching logic, and loops.</li> </ul>         |
| Topic 9  | <ul style="list-style-type: none"> <li>• Threat Hunting and Investigation: Focuses on identity-based detections and incidents, investigation pivots, incident trees, detection evolution, filtering, managing exclusions and exceptions, and risk types.</li> </ul>                 |
| Topic 10 | <ul style="list-style-type: none"> <li>• GraphQL API: Covers Identity API documentation, creating API keys, permission levels, pivoting from Threat Hunter to GraphQL, and building queries.</li> </ul>   |

## CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Falcon Identity Protection can continuously assess identity events and associate them with potential threats WITHOUT which of the following?

- A. Machine-learning-powered detection rules
- B. API-based connectors
- C. The need for string-based queries
- D. Ingesting logs

**Answer: C**

Explanation:

Falcon Identity Protection is architected as a log-free identity security platform, a core tenet emphasized throughout the CCIS curriculum. Unlike traditional SIEM- or log-based solutions, Falcon Identity Protection does not require string-based queries to continuously assess identity events or associate them with threats.

Instead, the platform relies on machine-learning-powered detection rules, real-time authentication traffic inspection, and API-based connectors to collect and analyze identity telemetry directly from domain controllers and identity providers. This approach eliminates the operational complexity of building, tuning, and maintaining query logic.

String-based queries are commonly associated with legacy log aggregation tools and SIEM platforms, where analysts must manually search logs to identify suspicious behavior. Falcon Identity Protection replaces this model with behavioral baselining and automated correlation, enabling continuous identity risk assessment without human-driven query execution. Because Falcon does not require string-based queries to operate, Option D is the correct and verified answer.

#### NEW QUESTION # 15

Which entity tab will show an administrator how to lower the account's risk score?

- A. Risk
- B. Timeline
- C. Asset
- D. Activity

**Answer: A**

Explanation:

In CrowdStrike Falcon Identity Protection, the Risk tab within a user or account entity provides administrators with direct visibility into why an account has a specific risk score and what actions can be taken to reduce that score. This functionality is a core component of the User Assessment and Risk Assessment sections of the CCIS (CrowdStrike Identity Specialist) curriculum. The Risk tab aggregates both analysis-based risks and detection-based risks, clearly identifying contributing factors such as compromised passwords, excessive privileges, risky authentication behavior, stale or never-used accounts, and policy violations. It also highlights the severity, likelihood, and consequence of each risk factor, allowing administrators to prioritize remediation efforts effectively. Most importantly, this tab provides actionable guidance, enabling teams to understand which specific remediation steps—such as enforcing MFA, resetting credentials, reducing privileges, or disabling unused accounts—will directly lower the account's overall risk score.

Other entity tabs do not provide this capability. The Timeline tab focuses on chronological events and detections, the Activity tab displays authentication and behavioral activity, and the Asset tab shows associated endpoints and resources. Only the Risk tab is designed to explain risk drivers and guide remediation, making Option D the correct and verified answer.

#### NEW QUESTION # 16

Which section of the Falcon menu is used to investigate the Event Analysis dashboard?

- A. Enforce
- B. Threat Hunter
- C. Configure
- D. Explore

**Answer: D**

Explanation:

In Falcon Identity Protection, the Explore section of the Falcon menu is used to investigate analytical views such as the Event Analysis dashboard. This aligns with the CCIS framework, which defines Explore as the primary area for interactive investigation, analytics, and risk exploration across identity data.

The Event Analysis dashboard is designed to help administrators analyze identity-related authentication events, behavioral patterns, and anomalous activity derived from domain traffic inspection and domain controller telemetry. These analytical capabilities are intentionally placed under Explore because this menu category supports hypothesis-driven investigation rather than enforcement or configuration actions.

By contrast:

- \* Enforce is used to apply policy rules and automated controls.
- \* Threat Hunter is focused on proactive hunting using queries and detection pivots.
- \* Configure is used to manage settings, connectors, policies, and integrations.

The CCIS documentation explicitly associates dashboards such as Risk Analysis and Event Analysis with the Explore menu, emphasizing its role in understanding why risk exists before taking action. Therefore, Option C (Explore) is the correct and verified answer.

#### NEW QUESTION # 17

Which of the following are minimum requirements for showing the Falcon Identity Verification Dialog on the end user's machine?

- A. Windows Server 2008 and PowerShell 5.1
- **B. Internet Explorer 9 and Windows Server 2008**
- C. .NET 3.5 and PowerShell 5.1
- D. Windows Vista and .NET 3.5

**Answer: B**

Explanation:

The Falcon Identity Verification Dialog is used to prompt users for identity verification during conditional access enforcement. According to the CCIS curriculum, Internet Explorer 9 and Windows Server 2008 represent the minimum supported requirements for rendering the Identity Verification Dialog on an end user's system.

This requirement exists because the dialog relies on supported browser and OS components to present authentication challenges reliably during enforcement workflows. Systems that do not meet these minimum requirements may fail to display the dialog correctly, impacting the enforcement of MFA or identity verification actions.

The other options reference runtime frameworks or PowerShell versions that are not directly responsible for rendering the verification dialog. Therefore, Option A is the correct and verified answer.

### NEW QUESTION # 18

In the Predefined Reports Subject dropdown, which category is associated with endpoints?

- **A. Events**
- B. Incidents
- C. Accounts
- D. Insights

**Answer: A**

Explanation:

Within Falcon Identity Protection, Predefined Reports allow administrators to generate standardized reports based on specific data subjects. The Subject dropdown determines the type of data the report will be built from, such as identity risks, authentication activity, or endpoint-related telemetry.

The category associated with endpoints in the Subject dropdown is Events. Endpoint-related data—such as authentication attempts, logons, protocol usage, and domain controller-observed activity—is captured and represented as events within Falcon. These events form the foundational telemetry used for identity detections, investigations, and reporting.

By contrast:

- \* Insights represent aggregated analytical findings derived from events.
- \* Incidents group multiple detections into a single investigative narrative.
- \* Accounts focus on identity entities such as users and service accounts.

Endpoint visibility in reporting is therefore tied directly to Events, as events reflect the raw and enriched activity observed on endpoints and domain controllers. This structure aligns with Falcon's identity-first security model, where endpoint-observed authentication behavior feeds identity risk scoring and Zero Trust decisions.

The CCIS curriculum explicitly associates endpoint-related reporting with the Events subject, making Option B the correct and verified answer.

### NEW QUESTION # 19

.....

BraindumpStudy CrowdStrike IDP exam study material has three formats: IDP PDF Questions, desktop CrowdStrike IDP practice test software, and a IDP web-based practice exam. You can easily download these formats of CrowdStrike Certified Identity Specialist (CCIS) Exam (IDP) actual dumps and use them to prepare for the CrowdStrike IDP Certification test. You don't need to enroll yourself in expensive IDP exam training classes. With the CrowdStrike IDP valid dumps, you can easily prepare well for the actual CrowdStrike IDP exam at home.
