All experts and professors of our company have been trying their best to persist in innovate and developing the PK0-005 test training materials all the time in order to provide the best products for all people and keep competitive in the global market. We believe that the study materials will keep the top selling products. We sincerely hope that you can pay more attention to our PK0-005 study questions.

CompTIA Project+ Certification Exam Sample Questions (Q182-Q187):

NEW QUESTION # 182

A project team evaluated the performance of a new reporting system and the quantity of queries to be processed during predetermined time stamps.

Which of the following is the current status of the process?

- A. The goal should be adjusted since most of the data points are close to the lower limit.
- B. The amount of data is insufficient to determine if quality is low.
- C. The process is out of control and should be revised.
- D. Based on the rule of seven, the process is under control

Answer: C

Explanation:

The process is out of control and should be revised. The project manager can use the rule of seven to determine the status of the process based on the control chart. The rule of seven states that if seven or more consecutive measurements fall on one side of the mean that there's an assignable cause that needs investigation. In this case, the last seven data points are all below the mean, which indicates that the process is out of control and in need of adjustment¹²

NEW QUESTION # 183

A project manager is beginning a new project that will include a high number of complex deliverables. Which of the following is the best to use to track deliverables that are yet to be completed?

- A. Resource management system
- B. Issue log
- C. Ticketing system
- D. Backlog

Answer: D

Explanation:

A backlog is commonly used in agile project management to list deliverables and tasks that have not yet been completed. It allows the project manager to prioritize and organize the workload, especially for complex projects. This aligns with agile principles as outlined in CompTIA Project+.

NEW QUESTION # 184

A project team participates in a brainstorming session to define the guidance, direction, and approach for monitoring established procedures for developed products. Which of the following plans is the team creating?

- A. Project quality assurance
- B. Project management
- C. Project transition
- D. Project communications

Answer: A

Explanation:

Project quality assurance is the process of ensuring that the project meets the quality standards and requirements defined by the stakeholders and the organization. It involves planning, implementing, and monitoring quality activities throughout the project life cycle. Project quality assurance is different from project quality control, which is the process of inspecting and testing the project deliverables and outputs to identify and correct defects. Project quality assurance is also different from project transition, which is the process of transferring the project deliverables and outputs to the end users or customers. Project management is the application of knowledge, skills, tools, and techniques to project activities to meet the project objectives. Project communications is the process of planning, creating, distributing, and managing information among the project stakeholders. NEW QUESTION # 185

For an upcoming project kickoff, a PM is looking for a way to illustrate roles for major project activities. Which of the following would be the MOST useful option?

- A. Organizational chart
- B. Resource plan
- C. Project charter
- **D. RACI chart**

Answer: D

Explanation:

Explanation

A RACI chart would be the most useful option for the project manager to illustrate roles for major project activities for an upcoming project kickoff. A RACI chart is a visual representation of a RACI matrix that shows who is responsible, accountable, consulted, and informed for each task or activity in a project using a table format. A RACI chart can help to communicate and document the roles and expectations of each team member and stakeholder for the project and ensure alignment and agreement.

NEW QUESTION # 186

A project team member wrote a user guide over the past ten days. Given the following scatter diagram, Which of the following can be formally conducted?

- A. The team member had performance issues over time.
- **B. There is a negative correlation with time and output**
- C. The team member prioritized other tasks over the completion of this task
- D. This is a display of units of outstanding work to predict completion

Answer: B

Explanation:

The scatter diagram shows a clear negative correlation between time (days) and output (pages), meaning as time progresses, the number of pages completed decreases. This is evident from the downward trend of the plotted points on the graph. References = CompTIA Project+ Certification Study Guide, Chapter 3: Project Execution, page 130; CompTIA Project+ Certification Exam Objectives, Domain 3.0: Project Execution, Objective 3.3: Analyze project performance by using appropriate tools and techniques, Sub-objective 3.3.2:

Given a scenario, interpret the results of data analysis using appropriate tools and techniques, Knowledge of: Scatter diagrams.
