Trustable Google - Associate-Cloud-Engineer Actual Test Pdf

There are three versions of Google Associate Cloud Engineer Exam test torrent—PDF, software on pc, and app online，the most distinctive of which is that you can install Associate-Cloud-Engineer test answers on your computer to simulate the real exam environment, without limiting the number of computers installed. Through a large number of simulation tests, you can rationally arrange your own Associate-Cloud-Engineer exam time, adjust your mentality in the examination room, find your own weak points and carry out targeted exercises. But I am so sorry to say that Associate-Cloud-Engineer Test Answers can only run on Windows operating systems and our engineers are stepping up to improve this. In fact, many people only spent 20-30 hours practicing our Associate-Cloud-Engineer guide torrent and passed the exam. This sounds incredible, but we did, helping them save a lot of time.

Google Associate-Cloud-Engineer Certification is an excellent way to showcase your expertise in GCP to potential employers. Google Associate Cloud Engineer Exam certification demonstrates that you have a deep understanding of GCP and can deploy and manage applications on the platform. Google Associate Cloud Engineer Exam certification also provides access to a network of GCP professionals and resources that can help you stay up to date with the latest trends and best practices in the industry.

Google Associate Cloud Engineer Exam Sample Questions (Q33-Q38):

NEW QUESTION # 33
You are developing a financial trading application that will be used globally. Data is stored and queried using a relational structure, and clients from all over the world should get the exact identical state of the dat a. The application will be deployed in multiple

regions to provide the lowest latency to end users. You need to select a storage option for the application data while minimizing latency. What should you do?

- A. Use Firestore for data storage.
- B. Use Cloud Bigtable for data storage.
- C. Use Cloud SQL for data storage.
- D. Use Cloud Spanner for data storage.

Answer: D

Explanation:
Keywords, Financial data (large data) used globally, data stored and queried using relational structure (SQL), clients should get exact identical copies(Strong Consistency), Multiple region, low latency to end user, select storage option to minimize latency.

NEW QUESTION # 34
You're in charge of setting up a Stackdriver account to monitor 3 separate projects. Which of the following is a Google best practice?

- A. Use the existing project with the most resources as the host project for the Stackdriver account.
- B. Use one of the existing projects as the host project for the Stackdriver account.
- C. Create a new, empty project to use as the host project for the Stackdriver account.
- D. Use the existing project with the least resources as the host project for the Stackdriver account.

Answer: A,C

NEW QUESTION # 35
(You are deploying an application to Google Kubernetes Engine (GKE). The application needs to make API calls to a private Cloud Storage bucket. You need to configure your application Pods to authenticate to the Cloud Storage API, but your organization policy prevents the usage of service account keys. You want to follow Google-recommended practices. What should you do?)

- A. Create the GKE cluster and deploy the application. Request a security exception to create a Google service account key. Set the constraints/iam.serviceAccountKeyExpiryHours organization policy to 8 hours.
- B. Create the GKE cluster with Workload Identity Federation. Configure the default node service account to access the bucket. Deploy the application into the cluster so the application can use the node service account permissions. Use Identity and Access Management (IAM) to grant the service account access to the bucket.
- C. Create the GKE cluster with Workload Identity Federation. Create a Google service account and a Kubernetes ServiceAccount, and configure both service accounts to use Workload Identity Federation.Attach the Kubernetes ServiceAccount to the application Pods and configure the Google service account to access the bucket with Identity and Access Management (IAM).
- D. Create the GKE cluster and deploy the application. Request a security exception to create a Google service account key. Set the constraints/iam.serviceAccountKeyExpiryHours organization policy to 24 hours.

Answer: C

Explanation:
The organization policy explicitly prevents the use of service account keys, so options A and B, which involve requesting exceptions to create them, are not in line with the policy and Google's recommended practices for secure authentication.

NEW QUESTION # 36
You will have several applications running on different Compute Engine instances in the same project. You want to specify at a more granular level the service account each instance uses when calling Google Cloud APIs. What should you do?

- A. When creating the instances, specify a Service Account for each instance
- B. After starting the instances, use gcloud compute instances update to assign the name of the relevant Service Account as instance metadata
- C. After starting the instances, use gcloud compute instances update to specify a Service Account for each instance
- D. When creating the instances, assign the name of each Service Account as instance metadata

Answer: A

Explanation:
Explanation
https://cloud.google.com/compute/docs/access/service-accounts#associating_a_service_account_to_an_instance

NEW QUESTION # 37

You have created a new project in Google Cloud through the gcloud command line interface (CLI) and linked a billing account. You need to create a new Compute Engine instance using the CLI.
You need to perform the prerequisite stops. What should you do?

- A. Enable the compute googleapis.com API.
- B. Create a VPC network in the project.
- C. Create a Cloud Monitoring Workspace.
- D. Grant yourself the IAM role of Computer Admin.

Answer: A

Explanation:
Always grant access to apis first in order to use GCP services

NEW QUESTION # 38

......

With so many online resources, knowing where to start when preparing for an Google Associate-Cloud-Engineer exam can be tough. But with Google Associate-Cloud-Engineer practice test, you can be confident you're getting the best possible Google Associate-Cloud-Engineer Exam Dumps. Google exam mirrors the Google Associate-Cloud-Engineer exam-taking experience, so you know what to expect on Google Associate-Cloud-Engineer exam day.
