# PL-400 Certification Test Questions, New PL-400 Learning Materials

BTW, DOWNLOAD part of VCE4Dumps PL-400 dumps from Cloud Storage: https://drive.google.com/open?id=15J0APpkMir4_hWKR0VNFAJB4yoUdhyK_

Maybe on other web sites or books, you can also see the related training materials. But as long as you compare VCE4Dumps's product with theirs, you will find that our product has a broader coverage of the certification exam's outline. You can free download part of exam practice questions and answers about Microsoft certification PL-400 exam from VCE4Dumps website as a try to detect the quality of our products. Why VCE4Dumps can provide the comprehensive and high-quality information uniquely? Because we have a professional team of IT experts. They continue to use their IT knowledge and rich experience to study the previous years exams of Microsoft PL-400 and have developed practice questions and answers about Microsoft PL-400 exam certification exam. So VCE4Dumps's newest exam practice questions and answers about Microsoft certification PL-400 exam are so popular among the candidates participating in the Microsoft certification PL-400 exam.

The Microsoft PL-400 exam is designed for developers who have a minimum of one year of experience developing solutions with Power Platform. PL-400 exam is also suitable for professionals who have experience with Microsoft Dynamics 365, Microsoft Azure, and other Microsoft technologies. PL-400 Exam is available in a variety of languages, including English, Japanese, Korean, and Spanish.

New PL-400 Learning Materials & Exam PL-400 Bootcamp

Our PL-400 learning test was a high quality product revised by hundreds of experts according to the changes in the syllabus and the

latest developments in theory and practice, based on historical questions and industry trends. Whether you are a student or an office worker, whether you are a rookie or an experienced veteran with years of experience, PL-400 Guide Torrent will be your best choice. The main advantages of our PL-400 study materials is high pass rate of more than 98%, which will be enough for you to pass the PL-400 exam.

Microsoft PL-400: Microsoft Power Platform Developer is an essential certification exam for developers who work with Power Platform technologies. PL-400 Exam validates a candidate's knowledge of the Power Platform's various components and their ability to create, configure, and deploy custom solutions. Passing the exam can help developers advance their careers and become more valuable to their organizations.

Microsoft Power Platform Developer Sample Questions (Q337-Q342):

NEW QUESTION # 337
A company updates their client contact information periodically. The contact entity has alternate keys defined.
You have the following code. (Line numbers are included for reference only.)

```
1.  Entity contact = new Entity()
2.  {
3.    LogicalName = "contact",
4.    KeyAttributes =
5.    {
6.      {"lastname", "Smith"},
7.      {"clientnumber", "abc123"}
8.    }
9.  },
10 contact["lastname"] = "Doe";
11. UpsertRequest updcontact = new UpsertRequest ();
12. {
13.   Target = contact;
14.  }
15. UpsertResponse response = ( UpsertResponse )service.Execute(updcontact);
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
If the last name is an alternate key and there are no contacts with the last name Smith, the stored value of the last name is Smith.	○	○
If the client number is an alternate key and the client number exists, the stored value of the last name is Smith.	○	○
If the last name is an alternate key and there are people who have the last name Smith, the stored value of the last name is Smith.	○	○
If the client number is an alternate key and the client number does not exist, the stored value of the last name is Smith.	○	○

Answer:

Explanation:

Statement	Yes	No
If the last name is an alternate key and there are no contacts with the last name Smith, the stored value of the last name is Smith.	○	◉
If the client number is an alternate key and the client number exists, the stored value of the last name is Smith.	◉	○
If the last name is an alternate key and there are people who have the last name Smith, the stored value of the last name is Smith.	○	◉
If the client number is an alternate key and the client number does not exist, the stored value of the last name is Smith.	○	◉

NEW QUESTION # 338

An online store has a custom web page that allows customers to place their orders against a Microsoft Dataverse database that uses custom products. The custom web page uses Web API patterns to create and update records.

Customers report that orders can be placed for out-of-stock items.

You need to update the page code to ensure that inventory is available before confirming an order.

Which pattern should you use for each step? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Step	Pattern
Check the inventory table before retrieving the inventory record.	ChangeTrackingEnabled / DaysSinceRecordLastModified / IsOptimisticConcurrencyEnabled
Update the quantity on the inventory record using PATCH.	If-Match: * / If-Match: Etag / If-None-Match: * / If-None-Match: Etag

Answer:

Explanation:

Step	Pattern
Check the inventory table before retrieving the inventory record.	▼ ChangeTrackingEnabled DaysSinceRecordLastModified IsOptimisticConcurrencyEnabled
Update the quantity on the inventory record using PATCH.	▼ If-Match: * If-Match: Etag If-None-Match: * If-None-Match: Etag

Explanation:

Box 1: IsOptimisticConcurrencyEnabled

On a multi-threaded and multi-user system like Power Apps, operations and data changes often happen in parallel. A problem arises when two or more update or delete operations on the same piece of data happen at the same time. This situation could potentially result in data loss. The optimistic concurrency feature provides the ability for your applications to detect whether a table record has changed on the server in the time between when your application retrieved the record and when it tries to update or delete that record.

Box 2: If-Match: Etag

Use If-Match and If-None-Match headers with ETag values to check whether the current version of a resource matches the one last retrieved, matches any previous version or matches no version. These comparisons form the basis of conditional operation support. Dataverse provides ETags to support conditional retrievals, optimistic concurrency, and limited upsert operations.

Reference:

https://docs.microsoft.com/en-us/powerapps/developer/data-platform/optimistic-concurrency

https://docs.microsoft.com/en-us/powerapps/developer/data-platform/webapi/perform-conditional-operations-usi

https://docs.microsoft.com/en-us/powerapps/developer/data-platform/webapi/perform-conditional-operations-usi

NEW QUESTION # 339

You create an alternate key named AlternateKey1 on the Account entity. The definition for AlternateKey1 is shown in the following exhibit:

Display name ↑ ∨	Name ∨	Fields ∨
AlternateKey1	cr27f_AlternateKey1	Account Number, Account Name

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

How is uniqueness enforced based on the definition of AlternateKey1?

The combination of Account Number and Account Name must be unique
Either Account Number or Account Name must be unique
Account Number and Account Name must both be unique

You must add a third field to AlternateKey1. What should you do?

Update AlternateKey1 and add the missing field
Delete AlternateKey1 and re-create it with all three fields
Create a new alternate key named AlternateKey2 with only the missing field

Answer:

Explanation:

How is uniqueness enforced based on the definition of AlternateKey1?

The combination of Account Number and Account Name must be unique
Either Account Number or Account Name must be unique
Account Number and Account Name must both be unique

You must add a third field to AlternateKey1. What should you do?

Update AlternateKey1 and add the missing field
Delete AlternateKey1 and re-create it with all three fields
Create a new alternate key named AlternateKey2 with only the missing field

Explanation
Table Description automatically generated

Box 1: The combination of Account Number and Account Name must be unique With alternate keys you can now define a column in a Dataverse table to correspond to a unique identifier or unique combination of columns.
Box 2: Delete AlternateKey1 and re-create it with all three fields
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/define-alternate-keys-entity

NEW QUESTION # 340
You need to configure the row filter on the Dataverse trigger. Which filter should you use?

- A. not contains(new_dataid, '')
- B. new_dataid eq null
- C. new dataid ne null
- D. DataIdnenull

Answer: C

Explanation:
Topic 6, City Power & Light
Background
City Power & Light is an energy and utilities company that has offices in Europe. The company subsidizes home improvements for domestic customers, to improve energy efficiency and to meet environmental commitments. The company also distributes and generates electricity for domestic and commercial customers. The company has 2,000 employees in multiple offices and in work-from-home locations.
City Power & Light uses a team of schedulers, assessors, field engineers, and customer support agents for home improvements in a program named Get Energy Fit.
Current Environment
Get Energy Fit Program
City Power & Light uses the following to manage the Get Energy Fit program:
* The company uses a Microsoft Excel spreadsheet named Planning Hub on Microsoft SharePoint Online to store information about customer appointments, customer details, and customer eligibility in the program.
* The company records sensitive customer information that includes the document identification numbers and the customer's financial information.
* The company uses an assessor to verify customer eligibility in the program and to perform a suitability assessment. The assessor completes the suitability assessment by using a paper and clipboard at the customer property and enters the data to tte Planning Hub after the assessment is completed. The assessor also uploads * photographs to an on-premises document library. The assessor completes the eligibility assessment by using an application written in React.
* Schedulers use Microsoft Outlook to schedule engineers and assessors for home improvement appointments. About 200 appointments are scheduled daily.
* Employees for the company submit funding claims on behalf of the customer by uploading evidence and compliance checks information to an application named the Claim Submission Portal.
Technical Environment
* Schedulers use Windows 11 desktop and laptop computers with the latest version of Microsoft Edge.
* Assessors use iOS and Android tablet devices.
* The Claim Submission Portal uses REST-based APIs for all operations and a dedicated testing environment. Authentication to the API is provided by using the following example header key and value pair o Authentication:
2C8D41431415E429C7FC7A74D8315
* The company uses Microsoft Azure for hosting multiple applications.
Requirements
Overview
City Power & Light plans to implement Microsoft Power Platform to improve the customer experience and increase delivery for the Get Energy Fit program.
Business Requirements
* Only team leaders and senior managers should have access to read personally identifiable information (Pll).
* All development changes must be tested in a separate environment.
* The company requires out-of-the-box solutions, when possible.
* Sensitive credentials, such as user passwords and API secrets, must be stored securely.
* The Claim Submission Portal must allow citizen developers to create automated solutions.
* Customer and appointment information must be accessible to all applications.
Planning Hub Application
The company is planning to replace the Planning Hub spreadsheet with a new application. The new application has the following requirements:
* The application must support a component design that provides rapid changes requested by the schedulers.
* The data model for the application must capture the following information:
* The application must support a component design that provides rapid changes requested by the schedulers.
* The data model for the application must capture the following information; o Information about customers such as name, address, and other PH.
o The data and time for an assessor's or engineer's appointment. Schedulers must be able to view all appointments without filters, o Records the details of the home improvements installed for the customer, o Contains all the information and evidence for submission to the Claim Submission Portal.
* After an assessor uploads the funding application and all evidence after a home improvement has been complete, the company requires that the status of the application is set to Submit and should run the following:
o Retrieve the details about the customer and the improvement installed, o Send an approval to a senior manager to review and approve in Microsoft Teams.
o Upload the information to the API endpoint.
o if the upload fails to complete, it should retry after a delay of 30 seconds up to three times. If an error occurs after three times, the application should send an email notification to the application support team.
o Must record the status on the funding application.

Suitability Assessment Tool

The company plans to implement a new application named the Suitability Assessment Tool for the assessors. The new application has the following requirements:

* Must integrate with Microsoft Power Platform.
* Assessors must be able to complete the eligibility assessment by using the Suitability Assessment Tool. The assessors must be able to upload photographs to the on-premises file share.
* Must be developed by using modular components that can be used by other applications.
* Must be optimized for use on tablet devices.
* All changes to the application must be completed in the Suitability Assessment Tool solution.

Reporting

The company has the following requirements for a reporting solution:

* The data source for the reporting solution must support incremental refreshes.
* The solution must report accurate data if an error occurs.

NEW QUESTION # 341

A company uses SharePoint for its intranet and other functions. The company has also implemented model-driven apps.
SharePoint users must be able to create contact records in the Common Data Service (CDS), without having to navigate to the model-driven apps.
You need to create a link in SharePoint to open the CDS contact from displaying data from SharePoint.
How should you complete the URL? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
