Users can easily pass the Heroku-Architect exam by learning our Heroku-Architect practice materials, and can learn some new knowledge in this field for you have a brighter future.

Salesforce Certified Heroku Architect Sample Questions (Q74-Q79):

NEW QUESTION # 74

Universal Containers (UC) uses Heroku Connect to synchronize changes to the Account object in their Salesforce org. UC's Heroku application makes a batch update that changes one million records to the Heroku Postgres database table that mirrors the Account object. Approximately, how long will these updates take to sync back to the Salesforce org?

- A. 12 hours.
- B. One million updates is too many for Heroku Connect to handle; therefore, the sync will fail
- C. 1 hour.
- D. It depends on the sync performance, which can vary from one connection to another.

Answer: D

Explanation:

NEW QUESTION # 75

Universal Containers experienced an outage with their production Heroku Postgres database due to a fault with the underlying infrastructure. The database was unavailable for an hour. The database is on the Standard-0 plan.

Which two actions should an Architect recommend to mitigate such database failures and outages in the future? (Choose two.)

- A. Migrate the database to a larger Standard-tier plan.
- B. Create a fork of the database that uses the same plan as the leader.
- C. Migrate the database to a Premium-tier plan.
- D. Create a follower database that uses the same plan as the leader.

Answer: A,D

NEW QUESTION # 76

A client runs an application on a background worker dyno. The application allows its users to request personalized information as a PDF. At peak usage, the app processes millions of requests at once. The resulting number of requests has caused a bottleneck that is impacting its performance.

Which two solutions can an Architect recommend to resolve the bottleneck and improve performance? (Choose two.)

- A. Increase the number of workers to consume the job faster.
- B. Add a CDN add-on from the Elements marketplace.
- C. Add Heroku Redis as a job queue.
- D. Move the application to a Private Space.

Answer: A,D

NEW QUESTION # 77

A client's Heroku application syncs data between a Heroku Postgres database and a Salesforce org using the Salesforce Bulk API. The client has determined the application currently uses 90% of the client's daily Salesforce Bulk API limit.

To overcome this issue, what feature, to replace the Bulk API implementation in this scenario, should an Architect recommend?

- A. Custom Apex callouts
- B. Salesforce SOAP API
- C. Salesforce Connect
- D. Heroku Connect

Answer: D

NEW QUESTION # 78

A client has a web application that persists data to a local JSON file. They are migrating the application to Heroku. In order for the application to conform to the Twelve-Factor methodology, what changes should an Architect recommend?

- A. The application should persist the data to a local SQLite database.
- B. The application should be stateless and therefore not persist data at all.
- C. The application should use at least 2 dynos to ensure that the JSON file is highly available.
- D. The application should persist the data to a database add-on.

Answer: D

NEW QUESTION # 79

.....

Salesforce Heroku-Architect practice exam support team cooperates with users to tie up any issues with the correct equipment. If Salesforce Heroku-Architect certification exam material changes, TestkingPDF also issues updates free of charge for 1 year following the purchase of our Heroku-Architect Exam Questions.
