We believe that our products will

help you successfully pass your exam and hope you will like our product.

IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q134-Q139):

NEW QUESTION # 134

The main reason the response to this incident should be integrated into the Business Continuity Plan (BCP) is because?

- A. The repercussions for the company could have significant environmental impacts.
- B. The need for retraining employees will be paramount.
- C. Major stakeholders are involved from every critical area of the business.
- D. The impact on the company's competitive advantage is potentially significant.

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

A Business Continuity Plan (BCP) ensures that organizations can recover from disruptions and maintain essential functions. Major stakeholders from every critical area must be involved to coordinate an effective response.

Option A (Environmental impacts) is relevant for physical disaster recovery but not directly for a data breach.

Option B (Retraining employees) is important but does not justify integrating the incident into BCP.

Option D (Competitive advantage loss) is a consequence but not the primary reason for BCP integration.

Option C (Major stakeholders are involved from every critical area of the business) is the correct answer because a comprehensive response requires cross-functional collaboration, including IT, legal, HR, and compliance teams.

NEW QUESTION # 135

SCENARIO

Please use the following to answer the next QUESTION:

Penny has recently joined Ace Space, a company that sells homeware accessories online, as its new privacy officer. The company is based in California but thanks to some great publicity from a social media influencer last year, the company has received an influx of sales from the EU and has set up a regional office in Ireland to support this expansion. To become familiar with Ace Space's practices and assess what her privacy priorities will be, Penny has set up meetings with a number of colleagues to hear about the work that they have been doing and their compliance efforts.

Penny's colleague in Marketing is excited by the new sales and the company's plans, but is also concerned that Penny may curtail some of the growth opportunities he has planned. He tells her "I heard someone in the breakroom talking about some new privacy laws but I really don't think it affects us. We're just a small company. I mean we just sell accessories online, so what's the real risk?" He has also told her that he works with a number of small companies that help him get projects completed in a hurry. "We've got to meet our deadlines otherwise we lose money. I just sign the contracts and get Jim in finance to push through the payment. Reviewing the contracts takes time that we just don't have." In her meeting with a member of the IT team, Penny has learned that although Ace Space has taken a number of precautions to protect its website from malicious activity, it has not taken the same level of care of its physical files or internal infrastructure. Penny's colleague in IT has told her that a former employee lost an encrypted USB key with financial data on it when he left. The company nearly lost access to their customer database last year after they fell victim to a phishing attack. Penny is told by her IT colleague that the IT team "didn't know what to do or who should do what. We hadn't been trained on it but we're a small team though, so it worked out OK in the end." Penny is concerned that these issues will compromise Ace Space's privacy and data protection.

Penny is aware that the company has solid plans to grow its international sales and will be working closely with the CEO to give the organization a data "shake up". Her mission is to cultivate a strong privacy culture within the company.

Penny has a meeting with Ace Space's CEO today and has been asked to give her first impressions and an overview of her next steps.

What is the best way for Penny to understand the location, classification and processing purpose of the personal data Ace Space has?

- A. Audit all vendors' privacy practices and safeguards
- B. Analyze the data inventory to map data flows
- C. Conduct a Privacy Impact Assessment for the company
- D. Review all cloud contracts to identify the location of data servers used

Answer: A

NEW QUESTION # 136

The General Data Protection Regulation (GDPR) specifies fines that may be levied against data controllers for certain infringements. Which of the following will be subject to administrative fines of up to 10 000 000 EUR, or in the case of an undertaking, up to 2% of the total worldwide annual turnover of the preceding financial year?

- A. Failure to implement technical and organizational measures to ensure data protection is enshrined by design and default
- **B. Failure to demonstrate that consent was given by the data subject to the processing of their personal data where it is used as the basis for processing**
- C. Failure to process personal information in a manner compatible with its original purpose
- D. Failure to provide the means for a data subject to rectify inaccuracies in personal data

Answer: B

NEW QUESTION # 137

SCENARIO

Please use the following to answer the next QUESTION:

Natalia, CFO of the Nationwide Grill restaurant chain, had never seen her fellow executives so anxious. Last week, a data processing firm used by the company reported that its system may have been hacked, and customer data such as names, addresses, and birthdays may have been compromised. Although the attempt was proven unsuccessful, the scare has prompted several Nationwide Grill executives to Question the company's privacy program at today's meeting.

Alice, a vice president, said that the incident could have opened the door to lawsuits, potentially damaging Nationwide Grill's market position. The Chief Information Officer (CIO), Brendan, tried to assure her that even if there had been an actual breach, the chances of a successful suit against the company were slim. But Alice remained unconvinced.

Spencer - a former CEO and currently a senior advisor - said that he had always warned against the use of contractors for data processing. At the very least, he argued, they should be held contractually liable for telling customers about any security incidents. In his view, Nationwide Grill should not be forced to soil the company name for a problem it did not cause.

One of the business development (BD) executives, Haley, then spoke, imploring everyone to see reason. "Breaches can happen, despite organizations' best efforts," she remarked. "Reasonable preparedness is key." She reminded everyone of the incident seven years ago when the large grocery chain Tinkerton's had its financial information compromised after a large order of Nationwide Grill frozen dinners. As a long-time BD executive with a solid understanding of Tinkerton's's corporate culture, built up through many years of cultivating relationships, Haley was able to successfully manage the company's incident response.

Spencer replied that acting with reason means allowing security to be handled by the security functions within the company - not BD staff. In a similar way, he said, Human Resources (HR) needs to do a better job training employees to prevent incidents. He pointed out that Nationwide Grill employees are overwhelmed with posters, emails, and memos from both HR and the ethics department related to the company's privacy program. Both the volume and the duplication of information means that it is often ignored altogether.

Spencer said, "The company needs to dedicate itself to its privacy program and set regular in-person trainings for all staff once a month." Alice responded that the suggestion, while well-meaning, is not practical. With many locations, local HR departments need to have flexibility with their training schedules. Silently, Natalia agreed.

How could the objection to Spencer's training suggestion be addressed?

- A. By requiring training only on an as-needed basis.
- **B. By offering alternative delivery methods for trainings.**
- C. By customizing training based on length of employee tenure.
- D. By introducing a system of periodic refresher trainings.

Answer: B

Explanation:

This answer is the best way to address the objection to Spencer's training suggestion, as it can provide flexibility and convenience for employees who work in different locations or have different schedules. Alternative delivery methods for trainings can include online courses, webinars, podcasts, videos or self-paced modules that can be accessed anytime and anywhere by employees. Alternative delivery methods can also reduce the cost and time required for in-person trainings, while still ensuring that employees receive consistent and relevant information on the company's privacy program. NEW QUESTION # 138

SCENARIO

Please use the following to answer the next QUESTION:

It's just what you were afraid of. Without consulting you, the information technology director at your organization launched a new initiative to encourage employees to use personal devices for conducting business. The initiative made purchasing a new, high-specification laptop computer an attractive option, with discounted laptops paid for as a payroll deduction spread over a year of paychecks. The organization is also paying the sales taxes. It's a great deal, and after a month, more than half the organization's employees have signed on and acquired new laptops. Walking through the facility, you see them happily customizing and comparing notes on their new computers, and at the end of the day, most take their laptops with them, potentially carrying personal data to their homes or other unknown locations. It's enough to give you data- protection nightmares, and you've pointed out to the information technology Director and many others in the organization the potential hazards of this new practice, including the inevitability of eventual data loss or theft.

Today you have in your office a representative of the organization's marketing department who shares with you, reluctantly, a story with potentially serious consequences. The night before, straight from work, with laptop in hand, he went to the Bull and Horn Pub to play billiards with his friends. A fine night of sport and socializing began, with the laptop "safely" tucked on a bench, beneath his jacket. Later that night, when it was time to depart, he retrieved the jacket, but the laptop was gone. It was not beneath the bench or on another bench nearby. The waitstaff had not seen it. His friends were not playing a joke on him. After a sleepless night, he confirmed it this morning, stopping by the pub to talk to the cleanup crew. They had not found it. The laptop was missing. Stolen, it seems. He looks at you, embarrassed and upset.

You ask him if the laptop contains any personal data from clients, and, sadly, he nods his head, yes. He believes it contains files on about 100 clients, including names, addresses and governmental identification numbers. He sighs and places his head in his hands in despair.

Which is the best way to ensure that data on personal equipment is protected?

- A. Encryption of the data.
- B. Biometric security.
- C. Frequent data backups.
- D. User risk training.

Answer: A

Explanation:

Explanation

Encryption of the data is the best way to ensure that data on personal equipment is protected, as it prevents unauthorized access to the data even if the equipment is lost or stolen. Encryption is the process of transforming data into an unreadable format that can only be decrypted with a valid key or password.

Encryption can be applied to the entire device, a specific folder or file, or a removable storage media. Encryption is one of the most effective technical safeguards for data protection and is recommended by many privacy laws and standards.
