Salesforce Nonprofit-Cloud-Consultant Practice Test Prepare for Success

The Salesforce Nonprofit-Cloud-Consultant certification will further demonstrate your expertise in your profession and remove any room for ambiguity on the hiring committee's part. Have you, however, consider how you might get ready for the Salesforce Nonprofit-Cloud-Consultant Exam Questions? Do you know how we can unlock the door so that our dreams might take flight? Let's talk about some information that can help you prepare for the Salesforce Nonprofit-Cloud-Consultant Certification Exam, and alter your route to success.

Salesforce Nonprofit-Cloud-Consultant certification exam is designed for individuals who want to demonstrate their expertise in implementing and configuring Salesforce Nonprofit Cloud solutions. Nonprofit-Cloud-Consultant exam is intended for those who have the skills and knowledge to work with nonprofit organizations to help them achieve their goals through the effective use of Salesforce technology.

Salesforce Nonprofit Cloud is a powerful solution that helps nonprofit organizations to better manage their programs, engage with stakeholders, and raise funds. Salesforce Certified Nonprofit Cloud Consultant Exam certification exam is intended to ensure that individuals have the necessary expertise to leverage the full potential of the Nonprofit Cloud platform. Nonprofit-Cloud-Consultant Exam is a rigorous test of knowledge and skills, and passing it demonstrates that an individual can effectively implement and manage Salesforce Nonprofit Cloud solutions for nonprofit organizations.

Salesforce Certified Nonprofit Cloud Consultant Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

A nonprofit customer is concerned about its users having their Salesforce usernames and passwords compromised. Which Salesforce security feature should the consultant recommend?

- A. Add IP ranges on user profiles
- B. Specify a My Domain login policy for its Salesforce instance
- C. Specify a Trusted IP Range for each user
- **D. Set up two-factor authentication**

Answer: D

Explanation:

To enhance the security of Salesforce usernames and passwords and prevent them from being compromised, setting up two-factor authentication (2FA) is the recommended approach. Here's how to implement it:

Enable Two-Factor Authentication for the Org:

Navigate to Setup.

In the Quick Find box, type "Two-Factor Authentication" and select it.

Enable 2FA at the organization level.

Assign 2FA to User Profiles:

Go to the user profiles that require 2FA.

Under the profile settings, enable the requirement for two-factor authentication.

Configure 2FA Methods:

Allow users to register their preferred authentication method (e.g., Salesforce Authenticator app, SMS, email, or third-party authenticator apps).

Ensure users set up their 2FA methods through their personal settings.

User Training and Support:

Provide training materials and support to help users understand and set up 2FA.

Offer assistance for troubleshooting common issues during the setup process.

Monitor and Enforce:

Use Salesforce's monitoring tools to ensure compliance with 2FA requirements.

Regularly review and update security policies to maintain a high level of security.

Implementing two-factor authentication significantly reduces the risk of account compromise by adding an extra layer of security beyond just usernames and passwords.

"Salesforce Authenticator" from Salesforce Help: Salesforce Authenticator

NEW QUESTION # 33

A nonprofit using NPSP has just implemented the Program Management Module. The nonprofit wants to migrate its client and program data.

Which two steps should the consultant use to import and deduplicate the data against existing records?

Choose 2 answers

- **A. Upload the client information using the NPSP Data Importer.**
- B. Upload the client data using the Data Import Wizard.
- **C. Upload the program data using the Data Import Wizard.**
- D. Upload the program data using the NPSP Data Importer.

Answer: A,C

Explanation:

<https://powerofus.force.com/s/article/NPSP-BP-Getting-Started-Program-Management#week4> When migrating client and program data to the Program Management Module (PMM) in NPSP, it is important to use the appropriate tools for data import and deduplication to ensure data integrity and avoid duplication. The NPSP Data Importer is specifically designed for importing client information, including deduplication against existing records. The Data Import Wizard can be used for uploading program data, which may not require the same level of deduplication as client data.

Steps:

Prepare the client data, ensuring all necessary fields are included and formatted correctly.

Use the NPSP Data Importer to upload the client information, which includes built-in deduplication features to match against existing records.

Prepare the program data similarly, ensuring proper formatting and completeness.

Use the Data Import Wizard to upload the program data. This tool is suitable for handling bulk data uploads and does not inherently include deduplication, which is less critical for program data compared to client data.

Reference:

CertGod Nonprofit Cloud Consultant Guide: Discusses best practices for data migration and the tools available in NPSP for importing and deduplicating data.

Salesforce Documentation on NPSP Data Importer and Data Import Wizard: Provides detailed instructions on using these tools for data import.

NEW QUESTION # 34

A consultant using CumulusCI has customized a nonprofit's org and wants them to validate these changes with the latest release of NPSP which will be pushed to production one week later.

What are two ways the consultant can deploy this for the nonprofit after the release is announced?

Choose 2 answers

- **A. Test customizations in an updated sandbox.**
- B. Install NPSP and test the customizations in a new Developer Edition org.
- C. Compare the customizations to the NPSP roadmap and create a new trial org.
- **D. Configure a scratch org with NPSP dependency and test customizations.**

Answer: A,D

Explanation:

When preparing for an upcoming NPSP release and wanting to validate customizations, the consultant can take the following approaches:

Test Customizations in an Updated Sandbox (A):

Update the sandbox to the latest release of NPSP.

Deploy the customizations to the updated sandbox and thoroughly test them to ensure compatibility with the new release.

Configure a Scratch Org with NPSP Dependency and Test Customizations (D):

Set up a new scratch org using Salesforce DX and include the NPSP dependency.

Deploy the customizations to the scratch org and test them to validate their functionality with the latest NPSP release.

Steps to Implement:

Update Sandbox:

Refresh the sandbox and ensure it is on the same version as the upcoming NPSP release.

Deploy and test the customizations in the sandbox environment.

Set Up Scratch Org:

Use Salesforce DX to create a scratch org with the necessary NPSP configurations.

Deploy the customizations to the scratch org and perform testing.

NEW QUESTION # 35

A nonprofit wants to segment its constituents based on their donations from the prior fiscal year. The nonprofit wants to include only onetime gifts it received.

Which NPSP feature should the consultant use to meet this requirement?

- A. Advanced Mapping
- B. Customizable Rollups
- C. Levels
- D. Engagement Plans

Answer: C

NEW QUESTION # 36

A nonprofit using NPSP has just implemented the Program Management Module. The nonprofit wants to migrate its client and program data.

Which two steps should the consultant use to import and deduplicate the data against existing records?

Choose 2 answers

- A. Upload the client data using the Data Import Wizard.
- B. Upload the client information using the NPSP Data Importer.
- C. Upload the program data using the Data Import Wizard.
- D. Upload the program data using the NPSP Data Importer.

Answer: A,C
