

Dumps DP-420 Questions | Valid DP-420 Exam Objectives

segment so that they are distracted from high-value targets and may be monitored?

- A. MAC
- B. Honeypot
- C. Intrusion prevention system
- D. Rogue AP

● B. Answer: While engaging in an attack, the attacker sends an email message to the targeted victim that contains malicious software as an attachment. What phase of the Cyber Kill Chain is occurring?

- A. Weaponization
- B. Delivery
- C. Action on Objectives
- D. Reconnaissance

● A. Answer: Betsy receives many requests from IT staff members for remote access to internal systems through the DMZ. What type of system might Betsy place in the DMZ to accommodate these requests?

- A. Jump box
- B. Virtual machine
- C. Honeypot
- D. Firewall

P.S. Free 2026 Microsoft DP-420 dumps are available on Google Drive shared by PassExamDumps:
<https://drive.google.com/open?id=1JKCI8b-mu2ScRvveKxb1PvX9fNxCAPFc>

For candidates who will attend the exam, choose the right DP-420 exam torrent is important. We offer you the DP-420 exam dumps to help you pass the exam. With the skilled experts to compile the exam dumps, the DP-420 study materials of us contain the questions and answers, and you can get enough practicing by using them. Besides, the DP-420 Soft test engine stimulates the real exam environment, and you can know what the real exam is like by using this version.

In our study, we found that many people have the strongest ability to use knowledge for a period of time at the beginning of their knowledge. As time goes on, memory fades. Our DP-420 training materials are designed to help users consolidate what they have learned, will add to the instant of many training, the user can test their learning effect in time after finished the part of the learning content, have a special set of wrong topics in our DP-420 Guide dump, enable users to find their weak spot of knowledge in this function, iterate through constant practice, finally reach a high success rate. As a result, our DP-420 study questions are designed to form a complete set of the contents of practice can let users master knowledge as much as possible, although such repeated sometimes very boring, but it can achieve good effect of consolidation.

Valid DP-420 Exam Objectives | DP-420 Reliable Exam Online

As the leader in the market for over ten years, our DP-420 practice engine owns a lot of the advantages. Our DP-420 study guide is featured less time input, high passing rate, three versions, reasonable price, excellent service and so on. All your worries can be

wiped out because our DP-420 learning quiz is designed for you. We hope that that you can try our free trials before making decisions.

Microsoft Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Sample Questions (Q127-Q132):

NEW QUESTION # 127

You have an application that queries an Azure Cosmos DB for NoSQL account.

You discover that the following two queries run frequently,

☐ You need to minimize the request units (RUs) consumed by reads and writes. What should you create?

- A. a composite index for (name ASC time stamp ASC) and a composite index for (name, time stamp desc)
- B. a composite index for (name DESC, time stamp ASC)
- C. a composite index for (name ASC, time stamp ASC)
- D. a composite index for (name ASC, time stamp DESC)

Answer: C

NEW QUESTION # 128

You have an Azure Cosmos DB for NoSQL container. The container contains items that have the following properties.

☐ You need to protect the data stored in the container by using Always Encrypted. For each property, you must use the strongest type of encryption and ensure that queries execute properly.

What is the strongest type of encryption that you can apply to each property? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

Box 1 = Randomized

Box 2 = Deterministic

Always Encrypted for Azure Cosmos DB supports two types of encryption: deterministic and randomized1.

Deterministic encryption always produces the same encrypted value for any given plain text value.

Randomized encryption produces a different encrypted value for the same plain text value.

For dateOfBirth, randomized encryption is the strongest type of encryption because it provides better protection against statistical analysis and brute-force attacks. Deterministic encryption would not be suitable for dateOfBirth because it could reveal patterns or allow equality comparisons1.

For healthStatus, deterministic encryption is the strongest type of encryption because it allows queries to perform equality comparisons and filters on the encrypted property. Randomized encryption would not be suitable for healthStatus because it would prevent any queries on the encrypted property1.

NEW QUESTION # 129

You plan to create an Azure Cosmos DB database named db1 that will contain two containers. One of the containers will contain blog posts, and the other will contain users. Each item in the blog post container will include:

- * A single blog post
- * All the comments associated to the blog post
- * The names of the users who created the blog post and added the comments.

You need to design a solution to update usernames in the user container without causing data integrity issues.

The solution must minimize administrative and development effort. What should you include in the solution?

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation

☐

NEW QUESTION # 130

You are creating a database in an Azure Cosmos DB Core (SQL) API account. The database will be used by an application that will provide users with the ability to share online posts. Users will also be able to submit comments on other users' posts. You need to store the data shown in the following table.

☐ The application has the following characteristics:

Users can submit an unlimited number of posts.

The average number of posts submitted by a user will be more than 1,000.

Posts can have an unlimited number of comments from different users.

The average number of comments per post will be 100, but many posts will exceed 1,000 comments.

Users will be limited to having a maximum of 20 interests.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

☐ Box 1: Yes

Non-relational data increases write costs, but can decrease read costs.

☐ Box 2: Yes

Non-relational data increases write costs, but can decrease read costs.

☐ Box 3: No

Non-relational data increases write costs, but can decrease read costs.

NEW QUESTION # 131

You have an Azure Cosmos DB for NoSQL account that frequently receives the same three queries.

You need to configure indexing to minimize RUs consumed by the queries.

Which type of index should you use for each query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation

☐ Box 1 = Range Azure Cosmos DB supports three types of indexes: range, spatial and composite. For the query you provided, which is an equality query on a single property, the best type of index to use is range. Range index is based on an ordered tree-like structure and it is used for equality queries, range queries and checking for the presence of a property1. Range index also supports any string or number.

☐ Box 2 = Composite

Azure Cosmos DB supports three types of indexes: range, spatial and composite. For the query you provided, which is an order by query on two properties, the best type of index to use is composite. Composite index is used for optimizing order by queries on multiple properties1. Composite index allows you to specify a list of property paths and sort orders that are used for ordering items2.

☐ Box 3 = spatial

Azure Cosmos DB supports three types of indexes: range, spatial and composite. For the query you provided, which is a spatial query on a point property, the best type of index to use is spatial. Spatial index is used for querying items based on their location or proximity to a given point1. Spatial index supports point, polygon and linestring data types2.

NEW QUESTION # 132

.....

This version of the software is extremely useful. It may necessitate product license validation, but it does not necessitate an internet connection. If you have any issues, the PassExamDumps is only an email away, and they will be happy to help you with any issues you may be having! This desktop DP-420 practice test software is compatible with Windows computers. This makes studying for your test more convenient, as you can use your computer to track your progress with each Microsoft DP-420 Mock Test. The software is also constantly updated, so you can be confident that you're using the most up-to-date version.
