Ace the Appian ACA-100 Exam Preparation with Exams Solutions Realistic Practice Tests

While making revisions and modifications to the Appian ACA-100 practice exam, our team takes reports from over 90,000 professionals worldwide to make the Appian Certified Analyst exam questions foolproof. To make you capable of preparing for the Appian ACA-100 Exam smoothly, we provide actual Appian ACA-100 exam dumps.

Appian Certified Analyst Sample Questions (Q21-Q26):

NEW QUESTION # 21

An organization wants to automate identification of its dissatisfied customers based on the ticket description and assign the appropriate team to provide a quick resolution.

What is the best way to auto-classify the dissatisfied customers as part of processing?

- A. Using a SAIL form
- B. Using an image analysis connected system
- C. Using a decision table
- **D. Using a natural language connected system**

Answer: D

Explanation:

The organization aims to automate the identification of dissatisfied customers based on the ticket description. To achieve this, leveraging natural language processing (NLP) capabilities is the most efficient method. Appian provides connected systems that allow integration with external NLP services. These services can analyze text data (such as ticket descriptions) to determine the sentiment or classify the text into predefined categories (like "dissatisfied customer").

Natural Language Connected System:

Appian can integrate with third-party NLP platforms such as Google Cloud Natural Language, AWS Comprehend, or Azure Text Analytics via connected systems.

These services analyze the text provided in the ticket description to detect sentiment, keywords, or specific categories indicating dissatisfaction.

Based on the analysis, the system can automatically assign the appropriate team to handle the case.

Why Not Other Options?:

B . Decision Table: While decision tables are useful for rule-based decisions, they are not suitable for interpreting unstructured text like ticket descriptions.

C . Image Analysis Connected System: This option is irrelevant as the task involves text processing, not image analysis.

D . SAIL Form: SAIL forms are primarily used for user interface creation and are not intended for text analysis or classification.

Implementation in Appian:

Create a connected system to integrate with the chosen NLP service.

Configure the NLP service to analyze the text data and return the sentiment or classification results.

Based on the results, use process models to route the ticket to the appropriate team for resolution.

NEW QUESTION # 22

The business has requested a requirement that developers say will be difficult to build in Appian.

Which next step should the Appian Analyst take?

- A. Use a mockup to illustrate alternatives with different user interfaces, and propose the alternatives to the business in the next requirements session.
- B. Ask the Product Owner if the requirement can be deprioritized.
- **C. Ask the business about the underlying need for this feature, and provide alternate approaches that can achieve the same functionality.**
- D. Ask the developers to investigate workarounds or plug-ins to reduce the implementation effort.

Answer: C

Explanation:

When developers identify that a requested requirement will be difficult to build in Appian, the next step for the Appian Analyst is to engage with the business to understand the underlying need for the feature. By discussing the core objectives, the analyst can propose alternative approaches or solutions that are feasible within Appian's capabilities. This approach ensures that the business's needs are met while also aligning with the technical constraints of the platform.

Note: Options A, C, and D may involve deprioritizing or investigating workarounds, but these steps should only be considered after thoroughly understanding the business requirement and exploring alternative solutions.

NEW QUESTION # 23

Which one of the following Appian object combinations allows you to directly access and use data from the Appian database?

- **A. An expression rule with a query**
- B. An expression rule with an integration call
- C. An interface object with an integration call
- D. A process model that uses an Export to Excel smart service

Answer: A

Explanation:

In Appian, the combination of an expression rule with a query allows you to directly access and use data from the Appian database. Expression rules are used to define business logic, while queries are used to retrieve data from the database.

Expression Rule with a Query:

An expression rule can be used to execute a query against the Appian database to retrieve data.

This combination allows you to filter, sort, and manipulate the data retrieved directly from the database within your application logic.

The `a!queryEntity()` function is commonly used within an expression rule to fetch data from a specific entity in the database.

Why Not Other Options?:

A . An expression rule with an integration call: This option is used for retrieving data from external systems, not directly from the Appian database.

C . A process model that uses an Export to Excel smart service: This is used for exporting data to Excel but does not directly access the database for querying purposes.

D . An interface object with an integration call: This combination is also used for interfacing with external systems rather than directly accessing the Appian database.

Implementation in Appian:

Define an expression rule that uses `a!queryEntity()` to fetch data from a specific table or view in the Appian database.

The query can be customized with filters, sorting, and paging to retrieve the exact data needed for the application.

NEW QUESTION # 24

Review this image:

AND, OR, XOR

What is this group of BPMN symbols called?

- A. Activities
- **B. Gateways**
- C. Events
- D. Flows

Answer: B

Explanation:

In BPMN (Business Process Model and Notation), the symbols AND, OR, XOR are categorized as Gateways. Gateways control the flow of processes by determining which path to follow based on certain conditions. They are essential in managing the decision points within a process, directing the flow based on the logic defined in the process model. Appian Documentation - BPMN Gateways

NEW QUESTION # 25

You are designing a user interface that requires a confirmation message when the user attempts to delete a row.

Review the image with the confirmation message:

"Are you sure you want to delete the item?"

According to best practices, which button labels should you choose?

- A. Back, Next
- B. Reject, Approve
- **C. Cancel, Delete**
- D. False, True

Answer: C

Explanation:

According to UI/UX best practices, the button labels in a confirmation dialog should be clear and directly related to the action the user is about to take. "Cancel" allows the user to abort the action, while "Delete" confirms the action to delete the item. This approach ensures that the user understands exactly what will happen when they click either button, reducing the risk of accidental deletion or confusion.

NEW QUESTION # 26

.....

For everyone, time is money and life. Are you still hesitant about selecting what kind of ACA-100 exam materials? We have a high reputation on the career to help our customers pass their exams and get their desired certifications. There is no exaggeration to say that you can pass the ACA-100 Exam with ease after studying with our ACA-100 practice guide for 20 to 30 hours. Numerous of the candidates have been benefited from our exam torrent and they obtained the achievements just as they wanted.

ACA-100 Exam Fee: <https://www.passtorrent.com/ACA-100-latest-torrent.html>

Appian Formal ACA-100 Test You can pay by your credit card and instant download within 10 minutes, In order to provide better after sale service for our customers, our customer service agents will be available in twenty four hours, seven days a week, so after buying our ACA-100 exam questions: Appian Certified Analyst, if you have any question about ACA-100 study materials or the IT examination please feel free to contact with our customer service staffs at any time, we will be glad to provide service for you and will be patient to answer your questions about Appian Certified Analyst best questions and make every endeavor to solve your problems both before-sale and after-sale, Once you are determined to learn our ACA-100 study materials, you will become positive and take your life seriously.

Copernicus and Galileo revealed that the stars are not so much in motion Latest ACA-100 Dumps Sheet as the Earth is rotating, Using Expressions and Operators, You can pay by your credit card and instant download within 10 minutes.

Formal ACA-100 Test Is The Useful Key to Pass Appian Certified Analyst

In order to provide better after sale service for our customers, our customer service agents will be available in twenty four hours, seven days a week, so after buying our ACA-100 Exam Questions: Appian Certified Analyst, if you have any question about ACA-100 study materials or the IT examination please feel free to contact with our customer service staffs at any time, we will be glad ACA-100 to provide service for you and will be patient to answer your questions about Appian Certified Analyst best questions and make every endeavor to solve your problems both before-sale and after-sale.

Once you are determined to learn our ACA-100 study materials, you will become positive and take your life seriously, You only need to spend 20 to 30 hours on practicing and consolidating of our ACA-100 learning material, you will have a good result.

If you don't believe, you can give it a try.
