High-praised 156-536 Practice Exam: Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Displays High-quality Exam Simulation - Exam4Free

Our worldwide after sale staffs will provide the most considerate after-sale service for you in twenty four hours a day, seven days a week, that is to say, no matter you are or whenever it is, as long as you have any question about our 156-536 exam torrent or about the exam or even about the related certification，you can feel free to contact our after sale service staffs who will always waiting for you on the internet. Wherever you are in the world we will provide you with the most useful and effectively 156-536 Guide Torrent in this website, which will help you to pass the exam as well as getting the related certification with a great ease.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.
Topic 2	• Troubleshooting: In this final section, CheckPoint Security Administrators will demonstrate their troubleshooting skills related to Harmony Endpoint. This involves identifying and resolving issues that may arise during deployment or operation of the endpoint security solution.
Topic 3	• Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.
Topic 4	• Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.
Topic 5	• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.

Best Preparation Material For The CheckPoint 156-536 Dumps PDF from

Exam4Free

With our 156-536 exam questions, the most important and the most effective reward is that you can pass the exam and get the 156-536 certification. And it is also what all of the candidates care about. At the same time, you can also get some more practical skills. Your work efficiency will increase and your life will be more capable. Our 156-536 Guide questions are such a very versatile product to change your life and make you become better.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q52-Q57):

NEW QUESTION # 52
Which option allows the Endpoint Security Management Server to modify client settings such as shutting down or restarting the clientcomputers without installing policy?

- A. Push Operations
- B. Node Management
- C. Remote Operations
- D. Remote Help

Answer: A

NEW QUESTION # 53
Before installing the Endpoint Security Management Server, it is necessary to consider this

- A. A Network Security Management Server must be installed
- B. MS SQL Server must be available with full admin access
- C. An Endpoint Security Gateway must be installed
- D. A Network Security Management Server must NOT be installed on the same machine

Answer: B

NEW QUESTION # 54
The Remote Help tool can be used to assist users in password recovery. What type of assistance does this tool provide?

- A. The Remote Help tool only provides procedural information and FAQs about the Endpoint Security Client, including the procedure to reset the password
- B. The Remote Help tool unlocks admin accounts on SmartEndpoint
- C. The Remote Help tool provides:a) User Logon Pre-boot Remote Helpb) Media Encryption Remote Help
- D. The Remote Help tool provides:a) Link to the secret location of an encrypted password fileb) Key to decrypt the password file

Answer: C

NEW QUESTION # 55
"Heartbeat" refers to what?

- A. A server connection that happens every 5 minutes
- B. A periodic client connection to the server
- C. A client connection that happens every 60 seconds
- D. A random server connection

Answer: B

NEW QUESTION # 56
Is it possible to change the encryption algorithm on a fully encrypted disk, without need to decrypt it first? Is it possible to re-encrypt

the disk on-the-fly?

- A. Changing the encryption algorithm is only on machines that have EFI or IJEFI firmware. BIOS Firmware is not supported.
- B. Changing the encryption algorithm is supported on all machines, but you must first decrypt it, change encryption algorithm, and encrypt it again with new encryption algorithm.
- C. Changing the encryption algorithm is supported on all machines, no matter which firmware they have.
- D. Changing the encryption algorithm is only supported on machines with legacy BIOS firmware. EFI or UEFI Firmware is not supported.

Answer: B

Explanation:
* Process Requirement:
* Full decryption is mandatory before changing the encryption algorithm (e.g., switching from AES-128 to AES-256).
* Re-encryption occurs after algorithm selection, with no on-the-fly conversion supported.
* Firmware Agnostic:
* Applies uniformly to BIOS, UEFI, and legacy systems (no firmware-based exceptions).
* Documentation Source:
* *Check Point Full Disk Encryption Administration Guide R81.10+*:
"To modify the encryption algorithm, the disk must be fully decrypted first. After decryption, deploy a new policy with the updated algorithm to trigger re-encryption."
Critical Note:
Attempting to change algorithms without decryption corrupts data and requires recovery tools.
Why Other Options Fail:
* A/D: Incorrectly link algorithm changes to firmware (BIOS/UEFI), which is unsupported.
* C: On-the-fly re-encryption is technologically infeasible for FDE solutions due to cryptographic key hierarchy constraints.
# Official Reference: FDE Admin Guide (Section: Changing Encryption Settings).

NEW QUESTION # 57
