Google Professional-Cloud-Database-Engineer Valid Dumps Book | Professional-Cloud-Database-Engineer Questions Pdf

Our Professional-Cloud-Database-Engineer exam cram is famous for instant access to download, and you can receive the downloading link and password within ten minutes, so that you can start your practice as early as possible. Furthermore, Professional-Cloud-Database-Engineer exam dump are high-quality, since we have experienced professionals to edit and verify them. We offer you free demo for you to have a try before buying Professional-Cloud-Database-Engineer Exam Braindumps, so that you can have a deeper understanding of what you are going to buy. You can enjoy free update for one year for Professional-Cloud-Database-Engineer exam dumps, and the update version for Professional-Cloud-Database-Engineer exam dumps will be sent to your email automatically.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q65-Q70):

NEW QUESTION # 65

Your organization operates in a highly regulated industry. Separation of concerns (SoC) and security principle of least privilege (PoLP) are critical. The operations team consists of:

Person A is a database administrator.

Person B is an analyst who generates metric reports.

Application C is responsible for automatic backups.

You need to assign roles to team members for Cloud Spanner. Which roles should you assign?

- A. roles/spanner.databaseAdmin for Person A
roles/spanner.databaseReader for Person B
roles/spanner.backupWriter for Application C
- B. roles/spanner.databaseAdmin for Person A
roles/spanner.databaseUser for Person B
roles/spanner.backupWriter for Application C
- C. roles/spanner.databaseAdmin for Person A
roles/spanner.databaseUser for Person B
roles/spanner.databaseReader for Application C
- D. roles/spanner.databaseAdmin for Person A
roles/spanner.databaseReader for Person B
roles/spanner.backupAdmin for Application C

Answer: D

NEW QUESTION # 66

Your organization is running a Firestore-backed Firebase app that serves the same top ten news stories on a daily basis to a large global audience. You want to optimize content delivery while decreasing cost and latency. What should you do?

- A. Create a Firestore index on the news story date.
- B. Build a Firestore bundle, and deploy bundles to Cloud CDN.
- C. Deploy a US multi-region Firestore location.
- D. Enable serializable isolation in the Firebase app.

Answer: B

NEW QUESTION # 67

Your ecommerce application connecting to your Cloud SQL for SQL Server is expected to have additional traffic due to the holiday weekend. You want to follow Google-recommended practices to set up alerts for CPU and memory metrics so you can be notified by text message at the first sign of potential issues. What should you do?

- A. Use Cloud Logging to set up a log sink for CPU and memory metrics and to configure a sink destination to send a message to Pub/Sub.
- B. Use a Cloud Function to pull CPU and memory metrics from your Cloud SQL instance and to call a custom service to send alerts.

- C. Use Cloud Monitoring to set up an alerting policy for CPU and memory metrics and to configure SMS notification channels.
- **D. Use Error Reporting to monitor CPU and memory metrics and to configure SMS notification channels.**

Answer: D

NEW QUESTION # 68

You work in the logistics department. Your data analysis team needs daily extracts from Cloud SQL for MySQL to train a machine learning model. The model will be used to optimize next-day routes. You need to export the data in CSV format. You want to follow Google-recommended practices. What should you do?

- **A. Use Cloud Scheduler to trigger a Cloud Function that will run a select * from table(s) query to call the cloudsqlinstances.export API.**
- B. Use Cloud Composer to execute a select * from table(s) query and export results.
- C. Use Cloud Scheduler to trigger a Cloud Function through Pub/Sub to call the cloudsqlinstances.export API.
- D. Use Cloud Composer to orchestrate an export by calling the cloudsqlinstances.export API.

Answer: A

NEW QUESTION # 69

Your customer has a global chat application that uses a multi-regional Cloud Spanner instance. The application has recently experienced degraded performance after a new version of the application was launched. Your customer asked you for assistance. During initial troubleshooting, you observed high read latency. What should you do?

- A. Change the Cloud Spanner configuration from multi-region to single region.
- B. Use query parameters to speed up frequently executed queries.
- C. Use SQL statements to analyze SPANNER_SYS.QUERY_STATS* tables.
- **D. Use SQL statements to analyze SPANNER_SYS.READ_STATS* tables.**

Answer: D

Explanation:

To troubleshoot high read latency, you can use SQL statements to analyze the SPANNER_SYS.READ_STATS* tables. These tables contain statistics about read operations in Cloud Spanner, including the number of reads, read latency, and the number of read errors. By analyzing these tables, you can identify the cause of the high read latency and take appropriate action to resolve the issue. Other options, such as using query parameters to speed up frequently executed queries or changing the Cloud Spanner configuration from multi-region to single region, may not be directly related to the issue of high read latency. Similarly, analyzing the SPANNER_SYS.QUERY_STATS* tables, which contain statistics about query operations, may not be relevant to the issue of high read latency.

NEW QUESTION # 70

.....

The VCEdumps Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) PDF format of questions is user-friendly, portable, and printable that's easy to use on smartphones, laptops, and tablets. This way, you can prepare for the Professional-Cloud-Database-Engineer test anywhere without time restrictions.
