

# Pass Guaranteed Quiz Accurate SAP - C-TS462-2023 Exam Vce Format

What's more, part of that Free4Dump C-TS462-2023 dumps now are free: [https://drive.google.com/open?id=1qkLO\\_CZ0D7uSSF5mVJqesjAKSy9AhMTL](https://drive.google.com/open?id=1qkLO_CZ0D7uSSF5mVJqesjAKSy9AhMTL)

Demos of C-TS462-2023 PDF and practice tests are free to download for you to validate the SAP C-TS462-2023 practice material before actually buying the SAP C-TS462-2023 product. Trying a free demo of SAP C-TS462-2023 questions will ease your mind while purchasing the product.

## SAP C-TS462-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Sales Documents: This topic covers the explanation and performance of tasks related to sales document customization, including pricing and condition techniques. It also encompasses the shipping process and its associated customization settings.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Basic Functions (Customizing): It focuses on explaining and performing tasks related to basic functions (customizing).</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Organizational Structures: This topic discusses the role of organizational structures and how they relate to basic functions within the sales process.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Shipping Process and Customizing: This topic describes the processing of shipping transactions and their integration with sales order management, including the relevant customization settings.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Billing Process and Customizing: This topic covers the basics of the billing process and the necessary customization settings, ensuring a smooth billing procedure.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Managing Clean Core: The topic of Managing Clean Core is about applying principles to ERP to enhance business process agility and reduce adaptation efforts.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Pricing and Condition Technique: The section on pricing and condition technique falls under the broader topic of sales documents and customizing, covering related tasks and explanations.</li> </ul>

## Valid Test C-TS462-2023 Tips - Authentic C-TS462-2023 Exam Questions

As is known to all, C-TS462-2023 practice test simulation plays an important part in the success of exams. By simulation, you can get the hang of the situation of the real exam with the help of our free demo. You can fight a hundred battles with no danger of defeat. Simulation of our C-TS462-2023 Training Materials make it possible to have a clear understanding of what your strong points and weak points are and at the same time, you can learn comprehensively about the exam. By combining the two aspects, you are more likely to achieve high grades in the real exam.

### SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Sales Sample Questions (Q54-Q59):

#### NEW QUESTION # 54

Which of the following settings are required to be able to deliver a product? Note: There are 2 correct answers to this question.

- A. You need to set up the item category as relevant for delivery-related billing.
- B. You need to set the Schedule Lines Allowed indicator in the item category.
- C. You need to set up copying control in Logistics Execution System for the item category.
- D. You need to set the Item Relevant for Delivery indicator in the item category.

Answer: A,B

#### NEW QUESTION # 55

You are using multiple address handling in a sales document. At which levels can you assign the address determination? Note: There are 2 correct answers to this question.

- A. Address usage of the business partner
- B. Origin and source of the partner function
- C. Generic partner function
- D. Partner determination procedure

Answer: A,D

#### NEW QUESTION # 56

In your pricing procedure you have several condition types for a price such as PROO, PR02, PN00 and HM00. Only one of these prices is taken into account Which setting causes this behavior?

- A. Condition class
- B. Exclusion indicator
- C. Header condition
- D. Condition function

Answer: B

Explanation:

In SAP S/4HANA, a pricing procedure determines how pricing conditions (e.g., PROO, PR02, PN00, HM00) are applied to calculate the final price in a sales document, such as a sales order. The question states that only one of several condition types for a price is taken into account, meaning that only one price condition is selected or applied, while the others are ignored. This behavior is controlled by the Exclusion indicator in the pricing procedure configuration.

Let's break down the question and analyze each option to understand why the Exclusion indicator is the correct choice:

Understanding Pricing in SAP S/4HANA

\* A pricing procedure is a sequence of steps that determines how prices, discounts, surcharges, and taxes are calculated in a sales document.

\* Condition types (e.g., PROO, PR02, PN00, HM00) represent individual pricing elements, such as base prices, promotional prices, or net prices. Each condition type has specific settings that control its behavior.

\* When multiple condition types for prices exist in a pricing procedure (e.g., multiple price conditions), SAP allows configuration to ensure only one price is applied to avoid conflicts or double pricing.

\* The question implies that the system selects only one price condition from PROO, PR02, PN00, or HM00, which suggests a mechanism is in place to exclude the others.

## Analysis of Options

### \* A. Condition function:

\* TheCondition function is not a standard term in SAP S/4HANA pricing configuration. It may refer to the role of a condition type (e.g., price, discount, surcharge), but it is not a specific setting that controls whether only one condition is applied. Instead, the condition function is determined by settings like the condition class and calculation type, which define the purpose and calculation logic of a condition type.

\* Why incorrect: There is no "Condition function" setting that directly causes only one price condition to be selected among multiple price conditions.

### \* B. Exclusion indicator:

\* TheExclusion indicator is a setting in the pricing procedure configuration that controls condition type exclusivity. It is used to define condition exclusion groups, which determine which condition types are mutually exclusive. If multiple price condition types (e.g., PROO, PR02, PN00, HM00) are assigned to an exclusion group, the system applies a rule (e.g., selecting the condition with the best price, most specific condition, or first valid condition) to ensure only one condition is active.

\* In SAP, condition exclusion is configured via condition exclusion groups (transaction V/08 or SPRO > Sales and Distribution > Basic Functions > Pricing > Condition Exclusion). For example:

\* You create an exclusion group and assign condition types PROO, PR02, PN00, and HM00 to it.

\* You define an exclusion rule, such as "select the condition with the lowest price" or "select the first valid condition."

\* During pricing, the system evaluates the conditions in the exclusion group and applies only one based on the rule, deactivating the others.

\* This mechanism perfectly explains the behavior described in the question, where only one price condition is taken into account.

\* Why correct: The Exclusion indicator (via condition exclusion groups) ensures that only one of the price condition types is applied, based on the defined exclusion rule.

### \* C. Condition class:

\* TheCondition class is a setting in the condition type configuration (transaction V/06) that categorizes the condition type's purpose, such as:

\* B: Prices (e.g., PROO, PR02 for base prices).

\* A: Discounts or surcharges.

\* C: Taxes, etc.

\* While the condition class determines whether a condition is treated as a price, discount, or tax, it does not control whether multiple price conditions are mutually exclusive. For example, multiple condition types can have the condition class "B" (Prices) and still coexist unless an exclusion rule is applied.

\* Why incorrect: The Condition class defines the type of condition but does not enforce the selection of only one price condition among multiple price conditions.

### \* D. Header condition:

\* AHeader condition is a setting in the condition type configuration that determines whether a condition is applied at the header level (affecting the entire document) or the item level (affecting specific items). For example, a header condition might apply a flat surcharge to the entire sales order, while item conditions like PROO or PR02 apply to specific materials.

\* While header conditions affect how a condition is applied, they do not control whether only one price condition is selected from multiple price conditions at the item level.

\* Why incorrect: The Header condition setting is unrelated to ensuring that only one price condition (e.g., PROO, PR02, PN00, or HM00) is applied.

## Why Exclusion Indicator is the Correct Choice

\* TheExclusion indicator is part of the condition exclusion configuration in the pricing procedure. It is used to manage scenarios where multiple price condition types (e.g., PROO for standard price, PR02 for promotional price, PN00 for net price, HM00 for manual price) are defined, but only one should be applied to avoid conflicting prices.

\* For example:

\* In the pricing procedure (transaction V/08), you define a condition exclusion group and assign PROO, PR02, PN00, and HM00 to it.

\* You set an exclusion rule, such as:

\* Rule A: Select the condition with the lowest price.

\* Rule B: Select the condition with the highest price.

\* Rule C: Select the first valid condition in the sequence.

\* During sales order processing, the system evaluates the conditions in the exclusion group, applies the rule, and deactivates all other conditions in the group, ensuring only one price is used.

\* This is a common setup in SAP S/4HANA to handle scenarios with multiple price conditions, such as standard prices, promotional prices, or customer-specific prices, ensuring clarity and consistency in pricing.

## Practical Context

\* In the SAP system, condition exclusion is configured in the following path:

\* SPRO > Sales and Distribution > Basic Functions > Pricing > Condition Exclusion > Condition Exclusion for Groups of Conditions.

\* Alternatively, use transaction VOK8 to maintain condition exclusion groups and assign condition types.

- \* During sales order creation, the system checks the pricing procedure, identifies the exclusion group, and applies the exclusion rule to select one condition type (e.g., PROO) while deactivating others (e.g., PR02, PN00, HM00).
  - \* For example, if PROO has a price of \$100, PR02 has \$90, and the exclusion rule is "select the lowest price," the system will apply PR02 and exclude the others.
- Why Other Options Don't Fit
- \* Condition function: Not a standard SAP term or setting for controlling exclusivity.
  - \* Condition class: Defines the type of condition (e.g., price vs. discount) but doesn't manage exclusivity between multiple price conditions.
  - \* Header condition: Controls the level of application (header vs. item) but doesn't determine which price condition is selected.

### NEW QUESTION # 57

You are a consultant on an SAP S/4HANA Cloud brownfield project. In a meeting the customer decides to remodel an existing business process in accordance with clean core principles.

Which of the following SAP Signavio solutions can be used for the remodeling?

- A. SAP Signavio Process Governance
- B. SAP Signavio Process Manager
- C. SAP Signavio Process Insights
- D. SAP Signavio Process Intelligence

**Answer: A,B**

### NEW QUESTION # 58

How is the link between SAP S/4HANA Sales and SAP S/4HANA Finance set up?

- A. Via the link between a billing document request and an accounting document
- B. Via the copying control between the invoice and the accounting document
- C. Via the general billing interface available in the system
- D. Via a unique assignment of a sales organization to a company code

**Answer: D**

Explanation:

The link between SAP S/4HANA Sales and SAP S/4HANA Finance is set up:

D. Via a unique assignment of a sales organization to a company code: This linkage ensures that sales transactions in S/4HANA Sales are properly integrated with financial accounting in S/4HANA Finance, facilitating automatic posting of sales-related financial transactions to the correct company code.
