

1Z1-771テスト模擬問題集 & 1Z1-771試験対応

P.S. Pass4TestがGoogle Driveで共有している無料かつ新しい1Z1-771ダンプ: <https://drive.google.com/open?id=1Dv34IW7B1cT5qfeGxayxnaso6BLZd0hk>

Pass4TestのOracleの1Z1-771問題集を買う前に、一部の問題と解答を無料で試用することができます。そうすると、Pass4TestのOracleの1Z1-771トレーニング資料の品質をよく知っています。Pass4TestのOracleの1Z1-771問題集は絶対あなたの最良の選択です。

Oracle 1Z1-771 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
トピック 2	Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.

トピック 3	Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
トピック 4	Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
トピック 5	Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
トピック 6	Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
トピック 7	Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
トピック 8	Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
トピック 9	Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
トピック 10	Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.
トピック 11	Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
トピック 12	Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.

1Z1-771試験対応 & 1Z1-771関連試験

1Z1-771の実際のテストは、さまざまな分野の多くの専門家によって設計され、顧客のさまざまな状況を考慮し、顧客が時間を節約できるように実用的な1Z1-771学習教材を設計しました。学生であろうとオフィスワーカーであろうと、1Z1-771試験の準備にすべての時間を費やすことはないと思います。専門知識の勉強、家事、子供の世話などに取り組んでいます。簡素化された情報により、効率的に学習することができます。そして、あなたは事前に本当の試験を感じたいですか？ 1Z1-771試験問題を購入するだけです！

Oracle APEX Cloud Developer Professional 認定 1Z1-771 試験問題 (Q29-Q34):

質問 # 29

In your application, you want to display data in a searchable, customizable report that supports inline editing at runtime using the mouse or keyboard. Which report type will you create?

- **A. Interactive Grid**
- B. Interactive Report
- C. Classic Report
- D. Smart Filters

正解: A

解説:

An Interactive Grid is the report type that supports searchable, customizable data display with inline editing at runtime using mouse or keyboard. Interactive Reports are searchable and customizable but lack inline editing. Classic Reports are static, and Smart Filters is a component, not a report type.

質問 # 30

At what level does a developer enable push notifications so that end users can receive them on their devices from an APEX application?

- A. Page
- **B. Application**
- C. Instance
- D. Region

正解: B

解説:

Push notifications in Oracle APEX are enabled at the application level. This allows the application to register with the Progressive Web App (PWA) framework and manage subscriptions for all end users. Once enabled in the Application Definition under "Progressive Web App" settings, APEX handles the subscription process, and developers can use APIs like APEX_PWA.SEND to send notifications. Enabling at the region, page, or instance level is not supported for this feature.

質問 # 31

Which two tasks can be performed by using the Generate Text with AI Dynamic Action?

- **A. Draft an email**
- B. Update the underlying database tables
- C. Invoke a Workflow
- **D. Summarize or translate text**

正解: A、D

解説:

The "Generate Text with AI" Dynamic Action uses Generative AI to:

Draft an email: Creates text content like emails based on prompts.

Summarize or translate text: Processes existing text to summarize or translate it.

It does not update database tables or invoke workflows, as it's focused on text generation.

質問 # 32

You must use a Static Content region type to display messages about the employee of the month. Which text, when placed in this region, will display the message correctly?

- A. Join me in congratulating & P1_ENAME, as the new employee of the month!
- **B. Join me in congratulating: &P1_ENAME, as the new employee of the month!**
- C. Join me in congratulating: P1_ENAME as the new employee of the month!
- D. Join me in congratulating V('P1_ENAME') as the new employee of the month!

正解: B

解説:

Static Content regions display fixed text with substitution:

B. &P1_ENAME.: The &ITEM_NAME. syntax substitutes the value of P1_ENAME at runtime (e.g., "Join me in congratulating John as..."), correctly rendering the item's value. The dot ensures proper parsing.

A. P1_ENAME: Treated as literal text, not substituted.

C. V('P1_ENAME'): A PL/SQL function, invalid in static content; it's for server-side code.

D. & P1_ENAME.: Space before P1_ENAME breaks substitution syntax.

Pitfall: Ensure P1_ENAME is populated (e.g., via a page process) to avoid blank output.

質問 # 33

Which two statements are true about creating and using dynamic actions?

- A. You can execute JavaScript code by creating a dynamic action.
- B. After you create a dynamic action, you cannot add more true actions.
- C. If a client-side condition is defined, the true action will fire when the condition is met.
- D. If no client-side condition is defined, true actions will not fire.

正解: A、C

解説:

Dynamic Actions in APEX enable responsive behavior:

If a client-side condition is defined, the true action will fire when the condition is met: A condition (e.g., this.browserEvent === 'click') ensures the true action (e.g., Show, Hide) executes only when true, enhancing precision in event handling.

You can execute JavaScript code by creating a dynamic action: The "Execute JavaScript Code" action type allows custom scripts (e.g., alert('Clicked!')); extending functionality beyond declarative options.

Cannot add more true actions: False; multiple true actions can be added post-creation.

No condition, true actions won't fire: False; without a condition, true actions fire unconditionally on the event.

Dynamic Actions are a cornerstone of interactive UIs in APEX.

質問 # 34

.....

1Z1-771試験はIT業界でのあなたにとって重要な証明です。1Z1-771証明書があって、輝かしい未来が見えます。だから、あなたはこのような重要な試験に参加する必要があります。よく考えてOracle試験に参加しましょう。皆様を支持するために、我々の提供する1Z1-771問題集は一番全面的で、的中率が高いです。我々は弊社の1Z1-771資料の100%の通過率を保証しています。
